

Software Developer Software Developer Software Developer Racine, WI A passionate learner who enjoys facing new challenges and always looking for an opportunity to grow both in skills and abilities. Enjoys working with others to complete given tasks along with the ability to find solutions to problems when working on an individual basis. Work Experience Software Developer Enabling Technologies May 2018 to Present Working/Worked on Enabling studio and Enabling WebChat solutions Answered support emails/requests Fix any reported bugs in the solution Actively test the solution Tasked with building out complete features from back to front end Contract Software Developer 2017 to 2018 Project Foundry - A startup mobile app project developed in React Native to help technicians in the HVAC industry keep track of their schedules and invoices. The app gives access to google maps for ease of access getting from job to job as well as the ability to remotely mark a job as complete. My role was as the lead on this mobile app from the ground up as well as communicate clearly with what the company wanted this app to both look like, as well as to how it should function. Job4Site - Project Foundry is software used in schools to track project-based learning. I was contracted to build a feature to build a UI for a Superuser to enable/disable features for schools. The contract had me go from UI (HTML, and AngularJS) to the back-end (JAVA) as well as writing the SQL queries to interact with the database. Part-Time Mentor devCodeCamp - Milwaukee, WI 2017 to 2018 Answer questions asked by students about their code Code out examples to better explain specific scenarios Weekend management of the student help line Slack channel Barista Starbucks - Racine, WI 2016 to 2017 Brewed and crafted handmade coffee drinks Operated register and provided customer service Education Certificate in Software Development DevCodeCamp - Milwaukee, WI July 2017 to October 2017 Penn Foster High School - Foster, PA April 2017 Skills Visual studio, C#, Git, Html, Javascript, HTML 5, CSS, ASP Additional Information Technical Skills Proficient: JavaScript, Node.js, React.js, SQL, C#, HTML 5, CSS, Visual Studio, Git Familiar with: React Native, AngularJS, Java, ASP.NET MVC 5, Entity Framework
