Designed and developed UI screens using CSS3, Flex and Bootstrap to produce fluid, scalable, responsive designs; ensured that all designs were aligned with W3C standards and deployed to various global CMS sites Collaborated with designers to construct conceptual wireframes and mockups using InVision and

Sketch Optimized load time for high-traffic pages by consolidating CSS; compiled SASS with SCSS using LESS/SASS, Gulp, Grunt Performed complete application life cycle functions from conception to final release; including design and analysis, documentation, implementation, QA testing and debugging using Firebug, Version Control, HP ALM Developed SOAP and REST Web services which is based on XML and JSON format also by creating parsers Developed PPC campaigns with Google AdWords: tracked and analyzed results with Google Analytics Deployed from local environment to staging then to production using Git and private repository Full Stack Web Developer (Full Time - In House) Brightworks - Toronto, ON April 2012 to December 2018

Brightworks is a full service digital agency specializing in digital marketing and advertising primarily catering to Pharmaceutical, Banking and Telecom sector. I joined Brightworks in the capacity of Web Designer and Full Stack Web Developer where I developed: Client Retention Portal custom built from scratch. The portal was for Bell Canada for their call center teams in addition to View/Manage Customer Loyalty stats so to assist their sales cycle by providing offers and discounts that they could give to eligible customers. Development of Node.js Micro-services and Templates to create Micro-services. The portal was developed using custom PHP, CSS, and JavaScript. Several CRON jobs were set up to gather stats and populate live data using Reverse AJAX. Used Node.js to develop system that maintained extensive language files on the run time to ensure ease of usage by both French and English speaking reps. It used and maintained extensive language files on the run time to ensure ease of usage by both French and English speaking reps. It used extensive AI Modules/Algorithms which were the nucleus of the application and helping call center agents to determine competitive pricing to assist customers in a more profound fashion. It was fully responsive for all platforms Using Bootstrap and LESS. Extensive back- end was developed which was receiving data files in various formats available in order to power the front facing application. The multi role login and dashboard was built using Node.js. Version control set up using GitHub and repository management for the entire team using GitKraken. System migration from in-house server setup to Amazon AWS. A multi function fully responsive WP based real estate site with custom build plugins and advanced level Google map integration. Custom Built WP plugin for

special for multi user type and special access to specific property items. Full Stack Developer (Full Time - In House) Richmond Day - Toronto, ON July 2007 to March 2012 Richmond Day is an independent, full-service collaborative of creatives, designers, developers, and administrators, executing multi-channel campaigns for some of the world's most renowned brands. Since 2003, they've based their success on putting collaboration and big ideas ahead of archaic, linear agency processes. On any given day I was responsible for:

- Designing and maintaining a custom dynamic template website for multiple domains and multiple physical locations.
- Development of critical production grade sub components of cloud-based platform primarily written in JavaScript/Node.js.
- Designing and maintaining company's website using HTML, CSS, PHP, JavaScript, jQuery, AJAX, WordPress, Google Maps, and Custom Contact Forms.
- Development of Application in Node.js with the server side templating language and CSS preprocessors
- Assisting with the creation of the branding of the company, logos, colors and website content.
- Helping with the Graphic Design and Motion Graphics.

Front-end technologies: HTML, CSS, JavaScript, AJAX, jQuery. Back-end technologies: PHP, MySQL. Other technologies: Google Maps, Directions with Google Maps, Google Translate.

WordPress / Web Developer (Freelance - Remote) Extreme Pita : Project: (www.extremepita.com) Redesigned and developed a PHP based website for Extreme Pita. Designing and implementation of location search feature that efficiently determined and displayed restaurant locations using Google maps. Integrating a slider that displayed various products in a concise and clean manner.

Front End / PHP Developer (Freelance - Remote) Kinglet Inc. : Project: (www.gokinglet.com) Researched User experience across multiple real estate websites to create an improved and sharpened user interface. Developed wireframes for a new structure of the website, reexamined user interface to create a better user experience. Developed wireframes for a new structure of the experience. Overhauled the old design to create a new brand Identity for Kinglet's product (Real Estate for workplaces). Used LESS and SASS to create a fully responsive front.

WordPress (Freelance - Remote) ShootDotEdit : Project: (www.shootdotedit.com) Designed wireframes to improve the layout of the overall website. Created a new design which brought to their home page the quality of their work, introduced the team and explored the variety of work they

are capable of. Created a new batch of custom forms in order to cater to the diverse number of inquiries they faced. Designed the landing page in such a fashion that the average turnover rate was drastically increased. Designed the landing page in such a fashion that the average turnover rate was drastically increased. WordPress / Magento (Freelance - Remote) Austin Bazaar | Project: (www.austinbazaar.com) Created new wireframes, keeping in mind the products to be sold and the best ways to display their products. Created new sections for exhibiting the best deals available on Austin Bazaar. Removed radical space issues which wasted the real estate of the overall website, creating well occupied spaces for clearer presentation of products. Created a new cart, adding a wish list to the store as well as a mean to rate products based on the experience of previous orders done by users. WordPress (Freelance - Remote) Kim Komando : Project: (www.kimkomando.com) Created wireframes that took into account that the site was for a radio host who had a large quantity of listeners and followers for her blog. Created a new Blog like design to help users navigate through the wide variety of information available for followers. Implementation of design was done in such a manner that it did not hinder the upkeep of the website. Integration of new functionalities such as a URL generator and a showtime countdown timer were done at hours of low upkeep, making sure users did not face issues while browsing the site. Front End Developer (Freelance - Remote) Nite Nite | Project: (www.nitenite.com) Created wireframes to finalize a new design with better flow of data and a more straight forward user interface. Designed the homepage so that booking rooms and apartments were made simpler for potential customers increasing the website to product turnover rate. Integrated a booking engine API with the hotel's property management system. Integrated the booking system with PayPal s API to further simplify the payment process. WordPress (Freelance - (Remote) DigiVision Media | Project: (www.digivisionmedia.com) Created, much needed, contemporary design wireframes, keeping new functionalities in mind. Provided a design which brought to the forefront, the product that DigiVision was providing. Designed a multilayered menu and navigation that allowed ease of access to a great collection of blogs and video conferences. Built the website on WordPress, as it was the best CMS to build a blog oriented website. Education BS in Computer Science University of Toronto - Toronto, ON 2003 to

2007 Skills WordPress (7 years), WooCommerce (5 years), PHP (10+ years), MySQL (10+ years), Javascript (10+ years), ReactJS (3 years), React Native (1 year), HTML5 (10+ years), CSS3 (10+ years), Redux (2 years), SASS (3 years), LESS (3 years), Vue.js (1 year), Grunt (3 years), Laravel (4 years), jQuery (7 years), AngularJS (5 years), MongoDB (4 years), NodeJS (2 years), Git (5 years), AJAX (7 years), JSON (6 years), Gulp.js (3 years), Sketch (2 years), Shopify (3 years), Adobe XD (1 year), Photoshop (10+ years) Links <http://www.marcspicer.ca> Additional Information

Technical Skills: Platforms: Centos, Ubuntu and Windows. Virtualization: VM Ware, AWS (EC2, Elastic Beanstalk, ELB, Route53, S3, Cloud Front, SNS, RDS, IAM, Cloud Formation) Scripting: Shell scripting (Bash), Python, Perl, Ruby IDE: Eclipse, NetBeans, Sublime, Visual Studio, IntelliJ, Notepad++, Dreamweaver.
