

Senior Software Developer Senior Software Developer Senior Software Developer Fontana, CA
Senior Software Engineer in C/C++/SQL looking for contract or permanent position. Work
Experience Senior Software Developer Volt Technical Services - Portland, OR June 2019 to July
2019 Modified and enhanced a back end rate calculation application to use multithreading logic
Analyzed and improved performance of the application. Worked in an Oracle Pro*C/C++
environment. Senior Software Developer Cast and Crew May 2019 to May 2019 Modified and
enhanced compatibility libraries enabling Unify programs to access Oracle database. Enhanced
performance of programs converted to Oracle. Enabled same programs to access PostgreSQL
databases. Wrote multi-threaded programs to enhance performance. References available on
request Senior Software Developer Entertainment Partners 2014 to December 2014 Developed
Data Access Object Libraries for the Payroll Services System. Maintained and enhanced data
entry and report programs written in C, C++, and Java, using C-ISAM, DB2, and RPC interfaces.
Created and documented a Data Validation Library for legacy Payroll Services System under
Windows. Used Rational ClearCase for version control, and ClearQuest for deployment control.
Worked in Agile environment, Scrum, and Mingle management tool. Senior Software Developer
Western Dental Corporation - Orange, CA January 2009 to December 2012 Made modifications to
existing Statements Production program to allow for charging of interest. The changes involved the
creation of DB2 stored procedures and modification of C++ programs. Made modifications to the
C++ Patient Information program which enhanced the matching of incoming records to existing
patient records. Participated in the design of a C++ Family Contracts program for the corporate
database. Designed and wrote a library of C++ template classes to facilitate access of a database
through MFC recordsets. Software Developer Expert Experian Corporation - Costa Mesa, CA
January 2007 to December 2008 From existing Business Requirements Documents, wrote
Functional Specifications for Trade, Bankruptcy, and Judgment Records Load Systems, and for a
Credit Reporting System. From these specifications, developed the Load Systems using the Probe
ETL tool. From these specifications, developed Display Rules for Trade, Bankruptcy, and
Judgment data, using the Probe ETL tool. Was the U. S. expert for Experian Corporation in the

use of the Probe ETL tool. Used BASH and Python for test scripts Contract Systems Analyst P. Murphy and Associates - Burbank, CA September 2006 to December 2006 From an existing high-level system requirements document, designed a web service based system for transmission of criminal case data between the Sheriff's Headquarters, Central District Attorney's Office, and Superior Court. Contract Programmer Triad Worktek - Calabasas, CA 1996 to October 2006 Using Visual Studio, Visual Basic, C#, C++, ASP, and Oracle, extended and maintained an Integrated Program Calendar, a multi-organization calendar management system. Using Visual Studio and C++, developed through the full SDLC a Document Analysis system, which scans text in documents for keywords, dates in dozens of formats, acronyms, and phrases, used to standardize document text. Using Visual Studio, Oracle, Pro*C++, SQL, PL/SQL, and SQR, maintained and enhanced the Electric Power Systems (EPS) application for the International Space Station. Using Visual Studio, XML, JavaScript, CGI, Oracle, and Pro*C++ on a Windows platform, developed through the full SDLC a browser-based interface to EPS reports. Using Visual Studio, Oracle, SQL, PL/SQL, and SQR, developed through the full SDLC an As- Designed/As-Build application, which compares design data (from MRP and EDS databases) to build data (from the ACTS database), provides a report of differences, entry of justifying commentary, and validation of the build for Boeing's customer(s). Education High school or equivalent Skills Linux, Javascript, C++ (10+ years), SQL (10+ years), PL/SQL (10+ years), Oracle (10+ years), DB2 (5 years), PostgreSQL (2 years), Informix 4GL (2 years) Links <http://www.linkedin.com/in/russellmorrison>
