February 2019 to February 2022 A Certified Ethical Hacker is a skilled professional who
understands and knows how to look for weaknesses and vulnerabilities in target systems and uses
the same knowledge and tools as a malicious hacker, but in a lawful and legitimate manner to
assess the security posture of a target system(s). The CEH credential certifies individuals in the
specific network security discipline of Ethical Hacking from a vendor-neutral perspective. Security+
May 2018 to May 2021 Security+ certification is an international, vendor-neutral professional
certification provided by CompTIA for IT professionals who want to become certified in IT security.
The certification deals with various IT security topics such as cryptography and access control, as
well as topics in the business-related IT subfields of risk management and disaster recovery.
