

Front End Developer Front End Developer Software Engineer - Synapse Los Angeles, CA Software Engineer in JavaScript - day to day work focused on building fast, responsive web applications using React and Redux architecture. Outside of Javascript, I dream, take long walks and train in Muay Thai Authorized to work in the US for any employer Work Experience Front End Developer Synapse May 2018 to Present ? Interpreted design team s UX wireframes/mockups into responsive, interactive features using React and Redux ? Ensuring cross-browser compatibility and usability across multiple devices ? Utilized Webpack s code splitting ability to decrease user load times ? Refactor and maintain template for statements being generated ? Sped up the team s development process by introducing eslint and adopting Airbnb s style guide in order to standardize the codebase Engineer Webpack Monitor 2017 to 2018 Developer Tool that Keeps Track of Webpack Bundle 2017 ? Optimized and standardized user interface by leveraging React's higher order components to dynamically render relevant build statistics based on user interaction ? Leveraged React-Router to enable multiple application entry-points and bookmarking to improve user experience ? Accessed source code of Webpack's assets at build time by listening for Webpack's compiler module lifecycle events using a plugin in order to classify prospective optimizations ? Provided user with recommendations to minify JS files or remove unused CSS files by using the babel core transform method and the Purify-CSS Node module which in term will increase user's application load time ? Prevented React and D3 DOM manipulation conflicts by creating a React component that renders an svg element and have D3 attach to that element in order to render statistics for graphs Education BS in Engineering Cal State Long Beach 2011 to 2016 Skills Front End, Javascript, React, Front-End, User Interface, UI, HTML5 Links <http://github.com/bzuhair> <http://linkedin.com/in/balal-zuhair>
