

Senior Software Developer Senior Software Developer Senior Software Developer - VELIR STUDIO  
Austin, TX Work Experience Senior Software Developer VELIR STUDIO - Somerville, MA July 2014  
to Present Roles and Responsibilities: Development (Code implementations in C#, .Net) User  
different tools necessary to implement owned areas of web applications using Content management  
system in C#, .Net frame work. Produce quality code in all layers of web applications; including  
business logic and front-end areas. Steer resolution of issues on production through to complete  
resolution in a timely manner while working with team members and clients directly. Leadership:  
Serve as an escalation point for developers and provide technical leadership as needed. Oversee  
the development team throughout the support lifecycle. Lead and contribute to technical decision  
making on task resolutions. Successful completion of projects involving off shore teams. Risk  
Management: Raise risks internally related to account health, including tasks, timelines, budget,  
technical debt, etc. Provide solutions that mitigate risk and communicate to account team. Code  
Management: ? Ensure development infrastructure is setup and configured according to  
established best practices - including areas such as solution structure, source control, continuous  
integration, and build scripts. Ensure deployment procedures are in line with established best  
practices and that the procedures are consistently followed. Testing: ? Ensure adequate testing  
on part of development team before delivering functionality to QA. Environments: ? Understand  
the roles and architecture of each Internal Environment. Design and recommend development,  
testing, and production environments which account for technology stack, security, performance,  
and integration considerations. Estimation and Planning: ? Assist and intervene when needed to  
keep development tasks on schedule and budget. Participate in the creation and validation of  
development estimates for use in business development or project planning. Process: ? Ensure  
that annual reviews are completed across accounts. Identify and implement areas for improvement  
within accounts through regular account level reviews with team members. Identify and  
communicate areas for improvement on the overall development and support processes. Software  
Developer VELIR STUDIO - Somerville, MA January 2011 to July 2014 Roles and Responsibilities:  
Code implementations in C#, .Net Deploy new code and functionality to production solutions

Maintain deployment procedures for existing applications    Maintain documentation for production systems    Identify possible risks with proposed solutions or actions    Use best practices with source control    Participate in the creation and validation of development estimates    Lead at least one client solution and participate in development for additional clients

Intermediate Software Developer  
CRAWFORD & COMPANY (CANADA) - Kitchener, ON June 2008 to January 2011

Roles and Responsibilities:

- Consults with and advises users concerning problem areas of data processing applications in operations. E.g.: ? Conduct research to solve any questions    ? Travel to remote locations to solve any mass system problems    ? Provide any follow-up services required    Test coordinate and debug upgrades E.g.: ? Conduct complete testing    ? Maintain records of upgrades
- Develop, write, and maintain programs of a complex nature E.g.: ? Coding (java script, C#, Asp.NET)    ? Research new software and technology

Research Assistant  
UNIVERSITY OF WESTERN ONTARIO - London, ON April 2007 to September 2008

Roles and Responsibilities:

- Analyze the full set of requirements of the project as set up by professor    Developed the solution using four prototyping phases with Fortran.    Maintain constant refer with the professor to ensure the solution met his expectation.

Education  
M.E.SC Computer Engineering  
UNIVERSITY OF WESTERN ONTARIO - London, ON September 2009 to October 2012  
BSc in Computer Science  
UNIVERSITY OF WESTERN ONTARIO - London, ON September 2006 to June 2008
