

Net Developer Net Developer Net Developer Hartford, CT ? Software developer with over 5 years of experience in Software Development Life Cycle (SDLC) and web application development, which comprises of User Interaction, Business Analysis/Modeling, Design/Architecture, Development, Implementation, Integration, Documentation, Testing, and Deployment environment using .NET, Python, Java and webtechnologies ? Experience in SQL and NoSQL databases. Proficiency in writing PL/SQL in both SQL Server and Oracle. Participated in query optimization and performance tuning sessions while writing stored procedures Experience in MongoDB NoSQL. ? Experience designing and developing Winforms and Webforms and used Delegates and Events to establish communication between the Winforms. ? Strong understanding of OOPS concepts and design implementations using UML. ? Proficiency in .NET languages C#, VB.NET, web technologies ASP.NET (Web Forms and MVC), and Win Forms, WPF. ? Extensive experience in ORM, Entity Framework Code First, Database First approaches, implemented the Features Security, Performance, CRUD operations and Migrations etc. ? Expertise on ADO.NET components such as Datasets, Data Adapter, Data Reader, Data View, Data Table. ? Worked in Agile SDLC methodology, SCRUM framework and Test driven development (TDD) based on story points. ? Expertise in building Web Services using WSDL, UDDI, SOAP Protocol and consuming/publishing Web services Designed, modeled and architected enterprise n-tier software agent using WCF web service. ? Expertise in implementing SOA using WCF technology developed and consumed WCF services with features versioning, security, optimization and reliability. ? Experienced working with MS-SSIS and MS-SSRS for the data integration and data reporting services. Knowledge of creating reports with Crystal Reports 9/10. ? Experience in web development using XML, XSD, X-Path and XSLT. Experience in migration of Data from Excel, Flat file, to MS SQL Server by using SQL Server Integration Services (SSIS), BCP and DTS utility. ? Hands on experience in working with development of Stored Procedures, Queries, Indexes, Triggers and Views using SQL Server 2008 and T-SQL. ? Experience in developing web-centric applications using JavaScript framework AngularJS, HTML5, JQuery, AJAX, Bootstrap, CSS. Experience hosting web applications in IIS, developing applications using the ASP.NET MVC. ? Exposed to Python libraries NumPy, SciPy,

Matplotlib and familiarity with Django framework using Integrated Development Environment PyCharm 2017.1 and Brackets.io ? Excellent Java development using IntelliJ IDEA 2017.2.1, Eclipse and NetBeans 8.2 ? Expert in C# programming, ASP.NET, MVC 4 and web services RESTful API, SOAP using Visual studio 2017 ? Knowledge of Relational databases SQL server, MySQL, Oracle and NoSQL database CortexDB ? Professional experience of Business analysis over 2 years and its principles by vigorously fortifying business solutions and analyzing business operations ? Strong understanding with 2+ years of experience in PHP, JavaScript, HTML5, CSS3 and AngularJS ? 1-year hands on experience with Laravel - the PHP framework following MVC, PSR standards ? Implemented AngularJS Controllers to maintain each view data. Implemented Angular Service calls using Angular Factory ? Possesses knowledge in SaaS (Software as a Service) and Big Data with Pig, Hive and MapReduce.. Authorized to work in the US for any employer Work Experience Net Developer Charter communications - Stamford, CT July 2017 to October 2017 Responsibilities: ? Involved in Design, Development, and Maintenance and Production Support activities. ? Developed dynamic ASPX web pages for Application using ASP.NET, C#, XML, XSL/XSLT, HTML5, CSS3 and JavaScript, Angular JS. ? Used technologies like AJAX for a rich UI experience and better performance. ? Developed core functionality with the .NET Framework (C#.NET, ADO.NET). ? Used Dev express grid to give user more attractive interface and functionalities. ? Developed the Business Layer, Presentation Layer and Data Access Layer for the application. ? Used ADO.NET objects such as Data Reader, Dataset and Data Adapter, for consistent access to SQL datasources. ? Wrote complex queries, User Defined Functions (UDF's) and Stored Procedures ? Created numerous simple to complex queries involving self joins, correlated sub-queries, functions, \ cursors, dynamic T-SQL. ? Implemented N-Tier Architecture and integrated the UI with Data base for data retrieval and manipulation using ADO.NET data objects and ADO.NET Entity Framework. ? Worked extensively on the UI, created Views by utilizing MVC 4, created View models and wrote clientside validations using JQuery and Ajax Toolkit. ? Created LINQ enabled database layer using API such as LINQ to SQL and Entity Framework. ? Handling the tasks of designing and maintaining SQL databases and VB6

applications. ? Worked with ASP.NET Web Forms, Webservices, WPF, and State Management, caching features, configuring optimizations and securing the web application. ? Used Angular JS as the development framework to build a single-page application. ? Implemented web services with SOA using WCF and CSLA for passing data to multiple platforms. ? Integrated WCF with help desk system to Sharepoint for ticketing. ? Designed and developed remote client access using SOAP/XML/Web Services to allow for syncing of data at remote sites and the main data site. ? Implemented MVVM (Model View View Model) pattern to create Silverlight user controls ? Built GUI using Silverlight 3.0, XAML, HTML, DHTML, Web Forms classes and AJAX control for providing a consistent look and their individual states persisted across sessions, thus saving individual preferences and providing a smooth navigation experience. ? Worked on backend processes like SSIS, report generation using SSRS, and rule engine processing. ? Used TFS (Team Foundation Server) for the source control, data collection, reporting and project tracking. Environment: Visual Studio 2013, .Net Framework 3.5/4.0, MVC 4, C#, ASP.NET, IIS, XAML, WCF, WPF, Html 5, JQuery, AJAX, CSS3, Web services, LINQ, SQL SERVER 2012, SSIS, AngularJS, JavaScript. Net Developer Enlightened. Inc - Washington, DC January 2017 to May 2017 Responsibilities: ? Design and developing .Net web applications using ASP.NET 3.5 /4.0/4.5, MVC 5.0/4.0/3.0. C#.NET, CSS JavaScript and Angular JS and creating the content management system. ? Creating responsive web application using Bootstrap. It is the faster way to create a responsive web application. ? Implementing MVC 4 architecture using C# .NET, HTML 5 and Razor view engine. ? Creating the application using Code First Approach and generating the migration files for database. ? Analytical and problem solving skills to assist Team members in the project, using LINQ over collections and Entity framework for data querying and filtering the results. ? Preparing the Requirement gathering and analysis, Change Management, Design Documents, Data Modeling, Deployment guide and unit test cases documents. ? Extensively involved in developing SQL Server, T-SQL schema objects such as Indexed views, stored procedures, user defined functions, triggers, Performance tuning, roles and users. ? Involved in designing, developing, debugging and testing of reports in SQL Server Reporting Services (SSRS) ? Generating the reports using SQL

Server Reporting Services (SSRS) reporting tool for the managers. ? Creating the controls, families and populating the values and controls using XML files. ? Creating WebAPI, WCF in the business logic layer and consuming API through AngularJs in displaying the control Families from XML to the view of the web Application. ? Involved in giving support to the testing and quality assurance and user acceptance testing teams for the application testing. ? Extensively worked with TFS as the source control repository and timely merging to the testing and staging. ? Support production deployment of applications and perform "validation testing", NLog. ? Produce technical documentation for new and existing applications. Environment: ASP.NET MVC 4.0/3.0, C#.Net, ADO.NET, HTML, DHTML, CSS, JavaScript, JQuery, Angular, XML, XSLT, JSON, AJAX, IIS 6.0, Oracle, SQL Server 2000/2008, SSRS, Web API, Visual Studio 2008/2010/2015, .NET Framework 2.0/3.0/3.5/4.0/4.5, Windows XP and Windows 2003/2008 Servers, SQL, T-SQL MS office, TFS (Team Foundation Server). Python Developer-Intern Agfa Health Care - Westerly, RI May 2016 to July 2016 Responsibilities: ? Participated in requirement gathering and analysis phase of the project in documenting the business requirements by conducting workshops/meetings with various business users. ? Used the Django Framework to develop the application. ? Implemented web applications in Flask and spring frameworks following MVC architecture. ? Used Python to place data into JSON files for testing Django Websites. ? Updated and manipulated content and files by using python scripts. ? Implemented web applications in Flask and spring frameworks following MVC architecture. ? Used Django configuration to manage URLs and application parameters. ? Worked on Python Open stack API's. ? Used Python scripts to update content in the database and manipulate files. ? Generated Python Django Forms to record data of online users ? Used Python and Django creating graphics, XML processing, data exchange and business logic implementation ? Used Pandas API to put the data as time series and tabular format for east timestamp data manipulation and retrieval. ? Added support for Amazon AWS S3 and RDS to host static/media files and the database into Amazon Cloud. ? Developed tools using Python, Shell scripting, XML to automate some of the menial tasks. ? Used HTML, CSS, JQuery, JSON and JavaScript for front end applications. ? Designed and developed the UI of the website using HTML, XHTML, AJAX,

CSS, and JavaScript. ? Also, used Bootstrap as a mechanism to manage and organize the html page layout. ? Wrote and executed various MySQL database queries from Python using Python-MySQL connector and MySQLdB package. ? Involved in development of Web Services using SOAP for sending and getting data from the external interface in the XML format.

Environment: Python, Amazon AWS S3, MySQL, HTML, Python 2.7, Django 1.4, HTML5, CSS, XML, MySQL, MS SQL Server, JavaScript, AWS, Linux, Shell Scripting, AJAX Software Developer Arcelor Technologies - Pune, Maharashtra August 2013 to June 2015 Responsibilities: ? Introduced to develop scalable software solutions using cutting edge technologies Java, .NET and Python ? Implemented first Python project with MySQL for retail store providing possible operations in later period ? Designed and developed transactional and analytical data structures using Java in IntelliJ software ? Implemented the frontend user interface using Servlets, JSP and AJAX ? Developed distance calculation between any two points using RESTful API web services ? Contributed to a group of developers in user interface design and backend development on the quality analytics for authentic time communication application for iPad/iPhone ? Learned Amazon web services, Google cloud environment and used elastic search for the upcoming project

Environment: Python, MySQL, Java, .NET, JSP, AJAX, AWS, REST API, PHP, SQL, XCode, waterfall, HTML5, CSS3 Web Developer (Intern) Arcelor Technologies - Pune, Maharashtra January 2012 to August 2013 Responsibilities: ? Selected to develop and assist in design very first web presence for the start-up company. Later, worked on various dynamic and content management system applications ? Responsible for Design and implementation of secure webpages using HTML, CSS, and PHP along with WordPress ? Search@click - Built first product for company to promote businesses ? Built databases following n-tier architecture methodology for ecommerce websites (PHP, HTML5, CSS3, introduced JavaScript) in MySQL and CRUD operations ? Maintained and Redesign deployed websites and achieved end user satisfaction by assisting them

Environment: HTML, CSS, PHP, JavaScript, WordPress, Joomla, APIs, MySQL, Bootstrap Education Masters of Computer Science in CT University of Bridgeport Bachelor of Engineering in Information Technology University of Pune Skills HTML5 (3 years), MYSQL (3 years), PHP (3 years), SQL (2 years), .NET (2 years) Additional

Information TECHNICAL SKILLS: Programming Languages: C, C++, C# .NET, Java, Python;
Familiar with Java, R, Ruby Databases: MySQL, SQL Server, Oracle, sqlite3 Web technologies:
PHP, HTML5, CSS3, ASP.NET, MVC4, Django, JavaScript, AngularJS, WordPress, Joomla, Drupal,
jQuery, Bootstrap, Node.js Operating Systems: Unix, Linux, Windows 7/8/10 Web servers: MAMP,
XAMPP, WAMP, nginx Python modules: NumPy, SciPy, Matplotlib, Django JAVA/J2EE
Methodologies: Spring, Hibernate, Struts APIs: RESTful, SOAP Tools: Visual studio 2017,
Jetbrains PyCharm 2017.1.2, IntelliJ IDEA 2017.2.1, Netbeans 8.2, Eclipse, Brackets.io, Microsoft
Office 365, SPSS
