

SQL Server DBA & Sr Project Consultant/Instructor SQL Server DBA & Sr Project Consultant/Instructor SQL Server DBA & Sr Project Consultant/Instructor - ModajPro IT Solutions Houston, TX A highly motivated IT professional with over 7 years of experience in SQL Server Administration and Design Strong Experience with SQL Server 2000 through SQL Server 2017 Production support in a 24/7 environment and project support. Interacts with clients, application team and project managers to design, implement and support solutions to meet client needs Install and Upgrade SQL Server 2008, 2012 and 2017 database standalone / cluster instances Service packs Complex database environments, Production, Test and Development Environments

**TECHNICAL EXPERIENCE** Build a complex, custom security model using Row-Level Security from SQL server(2016 - 2017). (2 years) Implement database backup Encryption Configure encryption for connections Configure Dynamic data masking in SQL Server 2016 through 2017. (2 years) SQL Server always encrypted. (2 years) Translating business requirements into conceptual, logical and physical data models (7 years) Data warehouse ( 5 years) In-place and Sid-by-Side Migration from sql Server 2008 - 2017 (7 + years) Administering, Managing, Developing and configuring SQL Server database design, (7 + years) Performance tuning and query Optimization (7 years) Production level support for onsite and offshore - On Call 24/7 environment (7 years) SQL Server Performance Dashboard Reports for Monitoring (7 years) Performance Baselining ( 7 years) High Availability Solution- Clustering, AlwaysOn, Database Mirroring and Log Shipping (7 years) Disaster Recovery Strategy (7 years) Query Store, Import/Export Wizard, SSMS, SQL Profiler, Extended Events, Red-Gate tools etc. (7 years ) Replication Models (Snapshot/Transactional/Merge) (6 years) Replication from SQL Server to Azure ( 5 years) Clustering Setup, Troubleshooting and Management (6 years) Central Management Server (CMS Reporting-Member) enrollment (5 years) Virtualization Managing Server and database security and identity (7 years) Integration Services (SSIS) and Reporting Services (SSRS) (5 years) Good T-SQL Writing skills (5 years) Temporal Tables (5 years) Knowledge of SQL Azure (5Years) Authorized to work in the US for any employer Work Experience SQL Server DBA & Sr Project Consultant/Instructor ModajPro IT Solutions - Houston, TX May 2018

to Present Contract With Multiple Clients]) Location: Houston Texas Role: SQL Server DBA & Sr Project Consultant/Instructor 05/2018 - Present Install and Upgrade SQL Server 2005, 2008, 2008R2, 2012, 2014, 2016 to 2017 database standalone / cluster instances and applied security fixes. Database Administrator Sanford - Sioux Falls December 2015 to March 2018 Migration in SQL Server from SQL Server 2012 to 2017 (In-place and Sid-by-Side Migration) Production support/ Project support High Availability Solution- Clustering, AlwaysOn, Database Mirroring and Log Shipping. SSIS, high performance data integration solutions, ETL packages Data warehouse Contained Database Database Mail \_and Operator SQL server Reporting services (SSRS) delivering enterprise, Web-enabled reporting to create reports that draw content from a variety of data sources. Capacity Planning and resource allocation Monitoring standby databases to ensure high availability Production level support for onsite and offshore Clients Management of Azure and services Management of database DTU's System monitoring Temporal Tables in Azure Database Troubleshooting client connectivity Lock resolution DBA In-place 2005 to 2017 and Sid-by-Side Migration) Maintained database response times in 24X7 Production environments Proactively generated performance reports. Automation of DBA Tasks and monitoring Planning and implementation of database backup/restore and disaster recovery SSIS, high performance data integration solutions, ETL packages Data warehouse High Availability Solution- Clustering, AlwaysOn, Database Mirroring and Log Shipping Configure Dynamic data masking in SQL Server 2016 - SQL Server 2017. SQL Server always encrypted. (NEW SQL FEATURE) Transparent Data Encryption Translating business requirements into conceptual, logical and physical data models Management of Azure and services Replication from on-prem sql server to Azure Database Mail \_and Operator SQL server Reporting services (SSRS) delivering enterprise, Web-enabled reporting to create reports that draw content from a variety of data sources. Capacity Planning and resource allocation Monitoring standby databases to ensure high availability Production level support for onsite and offshore Clients Management of Azure and services Management of database DTU's Database Administrator Rhodies World Communication - Lagos, NG March 2013 to December 2015 Production level

support for onsite and offshore Clients   System monitoring   Sid-by-Side Migration   Integrated Temporal Tables   Troubleshooting client connectivity   Lock resolution   SQL Server Performance Dashboard Reports for Monitoring   Performance Baselineing   Manage indexes to improve performance   Schedule jobs using SQL Server Agent   Developed routine jobs for data integrity check   Code deployment into Production   Information Risk Management Control   Tables Design, views, stored procedures Function etc.   Managing Server and database security and identity   Credentials management   Managing Firewall Rule, Triger, Rowversion, Temporal Tables, Change Data Capture (CDC) etc.   Column Store Index for performance   Contained Databases   Task Automation   Indexes Maintenance   Stabilized Performance   SQL Server Profiler, Extended Events, Query Store and Database Engine Tuning Advisor(DTA) for performance   System monitoring   Temporal Tables in Azure Database   Troubleshooting client connectivity   Lock resolution   Managed and reduced cost by effectively monitoring the databases elastic pool   SQL Server Performance Dashboard Reports for Monitoring   Performance Baselineing   Indexes Management   Azure function   Performance Tuning   Query Store for performance monitoring   Security management   Used Azure Active Directory authentication   Custom authorization for the web app, and certificate based authentication for restful endpoints   Firewall Rule, Triger, Rowversion, Change Data Capture (CDC) etc.   Database Elastic Pool   Database Migration   Log Analytics   Column Store Index   Integration and Reporting Services   Contained Database

Education B.S.C in Business Administration University of Calabar December 2005
