

Sr. UI Developer Sr. UI Developer Sr. UI Developer - GE CORPORATE San Ramon, CA ? Around 10 years of IT experience in Software Development having an in-depth knowledge and extensive work experience on different types of web-based applications and architectures. ? Extensive programming experience in developing Web based applications and Client- Server technologies using JSP, Servlets, HTML4/5, CSS2/3, JavaScript, and jQuery, AJAX, JSON, Angular JS, XML, DOM and XHTML/DHTML. ? Proficient in using front- end systems with JavaScript, Bootstrap, HTML5, CSS3 and MVC frameworks such as AngularJS, Backbone.js to develop Responsive Single Page Application. ? Hands on experience in user interface development frameworks like Angular JS, Bootstrap and Ionic UI. ? Developed applications using AngularJS single page applications (SPAs) to improve page performance. ? Used JavaScript and jQuery to develop custom validations for validating various inputs given by the user. ? Excellent knowledge in JavaScript frameworks like Underscore.js, React.js and Backbone.js. ? Basic knowledge to build Data Visualization and Geo-Clustering using D3.js. ? Experienced in understanding the server side technologies like Java, ASP.Net, Ruby, and Python. ? Familiar with major web application Servers like Web Logic, WAMP Server and Apache Tomcat Web Server. ? In-Depth knowledge of Web 2.0, JavaScript, JQuery, CSS3, W3C Standards. ? Proficiently Apply JavaScript tasks runner like Gulp and Grunt to make web development easy to maintain and understand. ? Basic understanding of CSS pre-processing platforms, such as LESS and SASS. ? Solid knowledge in software development life cycle including requirements analysis, design, development, maintenance, implementation and testing. ? Knowledge in working with RESTful Web Services and implementing. ? Experience with SVN Source Control and Git for code management. ? Used different cross-browser testing tools like BrowserStack and IETester to improve the performance of the web pages. ? Good Experience with working in Agile and Waterfall environments. ? Excellent knowledge on MVC frameworks like Struts, Spring. ? Excellent Knowledge on Search Engine Optimization (SEO) techniques. ? Responsible for checking cross-browser compatibility and hence worked on different browsers like Safari, Internet Explorer, Mozilla Firefox and Google Chrome. ? Solid working Experience in various IDE's: Eclipse, NetBeans, Visual Studio, Notepad++ etc. ? Experience in creating as well as editing

images for the websites using Photoshop and InDesign. ? Experience in implementing Web applications, Web Content Management and Digital Asset Management solutions using Adobe CQ5 platform. ? Experienced both in working on Designing table-less layouts and table-based layouts. ? Experienced in writing database queries, tables, stored procedures and triggers using database like SQL and Oracle. ? Involved in creating unit test cases using Jasmine. ? Worked with teams where requirements are constantly being implemented, tested and improved. ? Involved in Understanding functional specifications and developing creative solutions to meet business requirements. ? Adaptive to team environment and also has the capability of completing complex tasks independently. ? Strong Communication skills with the ability to convey concepts/requirements between technical and non-technical stakeholders. Authorized to work in the US for any employer

Work Experience Sr. UI Developer GE CORPORATE - San Ramon, CA June 2017 to Present

Responsibilities: ? Strong hands-on background on UI frameworks like ReactJS, Redux, ES6 JavaScript, CSS/CSS3, CSS Pre-processors, Web pack, NodeJS, core JavaScript, development of reusable & performance efficient UI components using JavaScript. ? Strong hands-on & conceptual background of basic UI skills like HTML, CSS, JavaScript, HTML5, CSS3, AJAX, Asynchronous communication with backend layers. ? Background on working on web development projects or portals including above skills. ? Understanding of JS frameworks like NodeJS and all its internal features & aspects. ? Good hands-on background on advanced CSS specific tools like pre-processors (LESS, SASS) ? Strong knowledge about RWD (Responsive web design) concepts, ways to achieve RWD in both web as well as native development scenarios. ? Hands-on working background (or adaptability to work on), on various latest & advanced UI frameworks, (like ReactJS, Redux as mentioned above), & relevant knowledge of associated tools like Webpack bundler, Nodejs, Redux-Thunk, Flux, uni-directional data flow, As-synchronous API calling (using Axios for example) & communication. ? Strong hands-on knowledge about source controls systems like GIT, and build tools like Teamcity/Jenkins & other tools like JIRA, HP ALM ? Adaptability to work on advanced native development frameworks like ReactNative. ? Adaptability to work on other native development frameworks like Android/iOS in both web or hybrid and native development scenarios.

? Strong background or exposure of interaction with UX team to get understanding about templates/wireframes & overall layout to be translated into corresponding UI. ? Strong exposure to closely work with middleware team, to analyze APIs that provide data to front end layer. (JSON format), consuming API provided data & monitor any errors & exceptions for handling the same on front end level. ? Background on frameworks like D3.js, JQuery, EmberJS, TypeScript etc. is preferable or would be advantageous on the top of above primary skills. ? Exposure of working on native mobile app development using android, iOS, windows 8 for mobile, frameworks will be advantageous. ? Background on working on project that run on Agile mode. ? Strong communication skills to interact effectively with all stakeholders of the project. Environment: HTML5, CSS, JavaScript, Angular.js, Typescript, Angular4/5/6, Bootstrap (3.3.2/4), MDB Angular, AJAX, JQuery, SOAP, MySQL, NPM, Oracle 11g, Eclipse, JSON, Apache Tomcat, Maven, JUnit, SASS and PaaS, Restful, Grunt, and GitHub. UI Developer JPMC - Columbus, OH March 2015 to May 2017 Responsibilities: ? Involved in Agile process, Sprints, and daily Scrums to discuss the development of the application. ? Communicate with the client to understand the requirement of the website, gained experience in project planning. ? Heavily used jQuery to create various components such as Tabs, Accordions and Auto-completes etc. ? Hand coded HTML5, CSS3, JavaScript and jQuery to create the front- end. ? Built more user-interactive web pages using jQuery plug-ins, AJAX, JavaScript, and Angular JS. ? Wrote code to build Views and Models as part of MVC pattern using Angular JS. ? Wrote application level code to perform client side validation using jQuery and JavaScript. ? Designed and developed intranet web applications using JavaScript and CSS. ? Involved in using Bootstrap for effective design of web pages. ? Hands on experience with third party web services APIs and Web Services using AJAX and jQuery. ? Used Oracle as a database in this project. ? Developed code to fetch data from back- end and populate on UI using AJAX and JSON. ? Used AJAX to call the java functions from the webpage via JavaScript/jQuery. ? Used Firebug and web developer toolbar for finding and fixing bugs. ? Developed the application using NetBeans IDE. ? Used SVN for version control and JIRA to keep track of outstanding bugs to reduce downtime, increase productivity and improve communication. ? Performed Grunt jobs to

minify HTML, CSS and JS files in order to improve the performance of the website. ? Maintain, enhance and recommend solutions that best suit business and technology needs from UI standpoint. ? Define technical requirements based upon business requirements. Environment: HTML5, CSS3, AJAX, JSON, JavaScript, Bootstrap, jQuery, Angular JS, Photoshop, web services, NetBeans IDE, SVN, Oracle, Agile and JIRA. UI/Web Developer HP - Chicago, IL November 2013 to February 2015 Responsibilities: ? Involved in Requirement gathering phase to gather the requirements from the business users and dealing with UXteam to continuously accommodate changing user requirements. ? Developed the front end of the application using HTML5, CSS3, SASS, JSP, JavaScript ? Applied advanced HTML, JavaScript, and CSS to deliver innovative user interfaces and components. ? Created interactive websites and website features using JavaScript and JQuery UI. ? Extensively used Angular2 with HTML, CSS, and Bootstrap to create rich User Experience. ? Developed Angular 2Template driven forms and Model driven forms builder by using ng model. ? Used Angular.js for developing single page web applications. ? Used Angular 2for Client-side validations while rendering JSON validation errors in the backend. ? Used Node. JS Application in building the minified versions. ? Created Typescript reusable components and services to consume REST API's using Component based architecture provided by Angular 2. ? Wrote Page level code using JavaScript with Angular.js framework along with JQUERY and other JavaScript libraries. ? Spearheaded adoption of Responsive Web design principles. ? Creating interactive prototypes using HTML5, CSS3, JavaScript front end code from a combination of wireframes, visual designs, and design standards. ? Utilized Adobe Fireworks, Adobe Photoshop, Adobe Dreamweaver, and Illustrator for the front- end development such as graphics and multimedia's. ? Converted existing websites to Responsive websites. ? Used Jasmine to perform unit testing of custom filters, custom directives, and various parts of AngularJS application. ? Enhanced user experience by designing new web features using MVC Framework like Backbone JS and Node JS. ? Build service-based architectures and platforms using core JAVA, Servlets, JSP and Web - Services. ? Worked with Node.js to give a structure with rich API over a RESTful JSON interface. ? Wrote application level code to interact with the backend databases JQUERY, AJAX

and JSON. ? Implemented Grails Services and controllers to perform actions. ? Used Dreamweaver, Photoshop, Flex for implementing application and designing graphics and images. ? Applied JQuery scripts for basic animation and end user screen customization purposes. ? Involved in rendering custom HTML tags using React.js. ? Implementing client-side Interface using React.js. ? Used Node JS for heavy DOM manipulation. ? Worked upon the dashboard for the project which contained a variety of charts and drag gable components using JQUERYUI Library. ? Used AJAX for asynchronously exchanging small amount of data with the server behind the scenes and updating the JSP page. ? Used AJAX and JSON to make asynchronous calls to the project server to fetch data on the fly. ? Developed and deployed Action Classes and JSP for DynamicHTML generation. ? Generated new and edited existing design with CSS to accommodate new changes in design

UI Developer Eli Lilly - Indianapolis, IN July 2011 to October 2013 Environment: HTML5, CSS3, J Query, Handle Bars, AJAX, Responsive Web Design, Jasmine, Grails, Angular 2, Angular.js, MongoDB, Node.js, React.js, JSON, Dreamweaver, Photoshop, Flax, JavaScript, JSP, SASS and Windows. Client: Eli Lilly - Indianapolis, IN July 2011 - October 2013 Role: UI Developer

Responsibilities: ? Developed web pages using HTML5, CSS3 along with using JQuery and Javascript. ? Converted the entire secure payment system into Angularjs from pure Javascript. By identifying controllers for shared components. ? Worked with team UI/UX team in redesigning the front end for the entire website. ? Researched on different Node framework like Express and KOA, to identify which framework will suit our need to develop the application. ? Implemented the user interface guidelines and standards throughout the development and maintenance of website using HTML, XHTML, CSS3, Angularjs and Handlebars. ? Worked on creating SEO compatibility by using Angularjs hashbang mode. ? Developed fast loading images using Adobe Photoshop 3. ? Provided user authentication on Node backend service through customer OAuth2 server using Passport js. ? Used Ajax and JSON to make asynchronous calls to project server to fetch data on file. ? Responsible for debugging and troubleshooting web applications. ? Used Postman as a REST API client to test out the restfull services created using Node. ? Wrote Javascript object oriented code for inheritance and used module pattern for creating scalable code. ? Used Typescript along with

Angularjs for code with different types makes it less prone to run-time errors. ? Customized and created a built script using Gulp and Node for internal use. ? Helped in integrating the Node backend with the Angular UI. ? Used Curl to fetch third-party API JSON data. ? Developed CSS styles to maintain uniformity of all the screens throughout the application and positioning of screen objects. ? Used Jenkins for automation and continuous integration. ? Contributed in decision making of the software and hardware requirements and tool evaluation. ? Developed applications for CRM applications using Angularjs for SPA's. Environment: HTML, CSS, JSON, Handlebars, Javascript, Adobe Photoshop, Jenkins, Xhtml, cURL. Front End Developer CLEARTRIP - INDIA - IN March 2009 to June 2011 Responsibilities: ? Responsible for developing the partner Homepages using HTML5, CSS3, JavaScript, ReactJS, NodeJS and jQuery. ? Developed html views with HTML 5, CSS 3, jQuery, JSON, and AngularJS. ? Involved in writing dynamic functions to read JSON objects and display on HTML pages using AJAX and JavaScript. ? Used CSS Pre-processors SASS and LESS. ? Responsible for creating website-based applications using JavaScript and jQuery. ? Used JavaScript and AngularJS for validating client-side validations ? Creating a range loop directive and components in AngularJS, ReactJS and also Implemented MVC framework. ? Involved in developing react components for the partner homepages using ReactJS. ? Created SPA for the End User providing route technologies with faster and responsive using AngularJS Framework. ? Used AngularJS for controllers and services, NodeJS for server applications. ? Applied HTTP Service and REST web service to connect the Front- end AngularJS to Back- end NodeJS. ? Experience in using ReactJS to build web components such as signup form and rule form. ? Used ReactJS to improve rendering performance. ? Designed a loan calculator using React.js and displayed the results in a pie chart format using D3.js. ? Developed JSX files for maintaining contents like video, images, audio and display them in flash application. Used Responsive Web Design. ? Used WebStorm to integrates with NodeJS allowed for running, debugging, and unit testing of NodeJS apps ? Developed a core component of Analytics with BackboneJS and Implemented to create a dynamically changing website and for building User interfaces. ? Made AJAX calls using BackboneJS for getting the data and parsing it for showing on

the web page. ? Used BackboneJS and ReactJS to create a dynamically changing website. ? Responsible for React UI and architecture-built components library, including Tree, Slide-View and Table Grid. ? Extensively used CSS and Bootstrap for styling the HTML elements. ? Experience in popular build tools for JavaScript projects like Grunt or Gulp or Webpack task runners, Ant and Maven etc. ? Installed Node Package Manager (NPM) to manage the modules and used it to install useful tools such as Grunt, Gulp ? Worked on many custom modules and widgets using ReactJS/CSS/HTML and made those cross-browsers consistent. ? Used Version control system GIT and webpage screens for various modules using HTML, CSS, JavaScript, and AJAX and AngularJS. ? Used ReactJS, HTML, CSS, CSS3, DOM, JavaScript to produce high performance, rich and user-friendly Web interface. ? Experience in all phases of SDLC like Requirement Analysis, Implementation and Maintenance, and extensive experience with Agile and SCRUM. ? Defined all AngularJS controllers in a JS file and reused in various pages of application Conceptualized, designed and developed the UI that are visually pleasing and highly efficient. ? Provided effective and functional web designs to customers that met their specific business/personal needs.

Environment: HTML5, CSS3, JavaScript, SASS, REST, SVN, GIT, Gulp, DOM, ReactJS, XML, WebStorm, jQuery, AngularJS, Ajax, JSON, Bootstrap, D3.js. Education Bachelor's Skills Front End, UI, Front-End, React, Javascript, Angular, CSS3, HTML5
