

Front End Developer Front End Developer Front End Developer Medford, OR A determined deep thinker who changed a company's understanding of websites. A strong advocate for the site visitor, known for offering options that create beneficial and practical experiences for said visitor. A meticulous developer who consistently churns out quality work. Authorized to work in the US for any employer

Work Experience Front End Developer Good Life Inc - Medford, OR June 2015 to Present

General Work: Update websites as requested, improve sites during downtime. Highlights: - Acquired mock design project for new website a month in. Concluded the project with high praise. Mocks linked in "Links" are a subset of prototypes (Google Drive link). - Researched, then instructed development team on implementing a sustainable CSS framework (ITCSS + BEMIT) that is now used in the new site (<https://ultimatebarkcontrol.com>) and will continue to be used in future sites. - Created and implemented company's first style guide. - Asserted self as the authority for all things UX in the company. - Made accessibility (as applied to websites) known to the company and caused it to become a requirement. - Re themed older website to be mobile first. Skills CSS (3 years), UX (2 years), HTML5 (3 years), SCSS (2 years), Web Design (1 year), PHP (2 years), Liquid (Shopify) (Less than 1 year), Drupal (2 years), Aria (Accessibility) (2 years), UI (1 year) Links <http://github.com/VeeDoubleYuh>

<https://ultimatebarkcontrol.com> Additional Information The #1 priority in a website is the experience of the user. Everything comes after that. I am not fit for a JavaScript-heavy position unless the employer allows for plenty of time to learn on the job.
