Associate Director IT Program / Project Management KPMG US March 2015 to February 2017

Manage the Project Delivery pillar in the KTech Management / Operations group, effectively gathering and understanding client requirements, and ensuring that the vision is clear and that project goals are met or exceeded.      Responsible for a team of project managers and business analysts conducting multiple projects concurrently to support IT operations as well as Project and Portfolio Management Office (PPMO) operations. Partner with other pillars of PPMO to promote and implement Tools and Reporting, Process and Standard, and Investment Governance. Liaise with the business to manage priorities, set expectations and handle budget changes/re-allocations as required.      Responsible for governance processes including preparing projects for gate approvals and budget change requests. Promote and ensure timely and correct utilization of PPMO reporting tools (PlanView and Sharepoint).      Direct management of strategic projects primarily SaaS roll out or Cloud based systems upgrades.      Key Projects and Accomplishments: Implemented Apptio, the leading Cloud based Technology Business Management platform (TBM), providing IT cost transparency and IT chargeback system (BoIT) enabling the COO to identify and achieve greater profitability. Developed a financial interface for PlanView financial reporting with the goal to harness actual project costs from various sources (such as G/L) and automate the entries in PlanView. Project resulted in increased data integrity and significantly reduced the time required on a monthly basis to enter expenses in PlanView. Successfully managed the 2015 and 2016 Town Hall events: recipient of the CIO Encore award both times. Conducted the case study to present the Team with the AWS Cloud based services to consider for FY17.

Head of IT Infrastructure Project Management Portfolio Thomson Reuters September 2014 to February 2015      Manage the Portfolio supporting the technology requirements for Internal Product Projects (such as Thomson Reuters Hosting Services) and for offices that were opening, closing, and/or relocating to other Thomson Reuters locations.

Liaison for all Business Units and Real Estate Heads to identify, prioritize, and plan for worldwide project management support to handle all of the IT aspects of any given site migration or site build out: LAN/WAN, IP Telephony, etc. Responsible for a team of 9 senior project managers strategically located in the Americas, EMEA, and Asia. Administered a pipeline of roughly 60 projects simultaneously for a total budget of \$10M. Assisted Business Units in their business cases by providing technology preliminary budget figures, timelines, risks, and dependencies. Worked in concert with PMO to promote and ensure team members understanding and adherence to corporate processes and corporate tools throughout the project delivery which provided clear visibility on portfolio status at all times. Key Projects and Accomplishments: Consolidation of Data Centers in London to reduce footprint and achieve cost savings Implemented a cross shadowing plan to partner Project Managers from different regions which resulted in reduced customer response times, improved time management and a more balanced workload. Increased Clarity reporting tools adoption and accuracy: The Team went from a monthly 75% score in project status accuracy and availability in Clarity to close to 100%. Only IT Team Member identified as Rising Talent in the 9-box Leadership Bench Strength Map for 2014. Senior Project Manager Thomson Reuters - New York, NY December 2012 to September 2014 Manage several projects concurrently in different time zones and to support Collaboration, Analytics and IT Infrastructure initiatives. Identified and engaged stakeholders across varying groups from Internal Resources (Engineering, Architecture), Business Units (Financial and Risk, Tax and Accounting) and 3rd party vendors (Verizon, AT&T, Level 3, and NetApp). Clarify scope, create plan, identify risks and conduct and administer procurement to ensure proper cost center allocation. Key Projects and Accomplishments: Successfully delivered the Paris Haussman project. The largest cost saving initiative and site consolidation reducing space from six floors to two. Completed the consolidation of the server room, the telecom links, PBX, cabling, News media infrastructure within cost and on schedule. Volunteered to handle the PAN TR Data Analytics initiative. Key initiative selected out of the 2014 Enterprise Innovation Workshop with the purpose of sharing select data depicting deals that have recently closed (TR Sales Resource, product sold, value of deal, etc.) to be used by Analytic teams

within each BU to enhance cross-sell/up-sell propensity models. Promoted to Head of Portfolio.
