

Software Engineer Software Engineer Software Engineer - MSTS Kansas City, MO Authorized to work in the US for any employer Work Experience Software Engineer MSTS March 2017 to Present

Developed part of the customer portal allows customers to view their transactions and make payments online. I wrote restful API endpoints in ruby on rails. Wrote UI components to consume the endpoints in vue.js and quasar. These include transaction history, resetting password, adding a bank account and more. I helped fix errors with traefik and docker. Maintained large enterprise transaction processing systems for Bestbuy, Paccar, and GM Fleet. I fixed live bugs that were in production using oracle sql, log files, grep and other tools. This includes over 1 million dollars getting stuck in daily processing. Did around 50 production pushes using, git, jenkins, linux and many other tools. Implemented a transaction processing component that allows for gated transaction. My role was to write PLSQL packages used in the process. Software Engineer Cerner July 2016 to October 2016

Created a survey tracking system using .NET C#, MVC5, Entity Framework 6.0 for the backend and .NET Razor, and Javascript for the front end and using the SurveyMonkey API Senior Java Developer Consultant Emerge Consulting - Denver, CO March 2014 to May 2016

Created an end to end workflow for publishers like National Geographic. The workflow went from the magazine platform to the website. We took the publishers design documents and created xml and html.
