

Senior Developer Senior Developer Senior Developer - St. Petersburg College Saint Petersburg, FL  
Problem solver. Perpetual learner. Workhorse. Reliable teammate. My specialties include n-tier application development leveraging relational databases and web APIs, as well as CMS and front-end development.

**Work Experience**

**Senior Developer St. Petersburg College July 2014 to Present**

Support the college's main public-facing website, built in Ingeniux CMS on the .Net MVC platform. Add new functionality and usability features as requested by the creative and content teams.

Developed a .Net Core RESTful API used to leverage curriculum data. This application is currently being extended to also provide career data from the CareerOneStop API.

Developed a .Net Core application which serves as an interface between the college's WordPress event calendar and the Ingeniux CMS. The application parses events from a json feed to CMS web pages leveraging the Ingeniux API.

Administer multiple web servers which include Windows Server 2012, 2016 and 2019.

**Web Developer/Programmer Raymond James Financial December 2010 to July 2014**

Worked on a team to develop a Sitecore CMS for financial advisor websites.

Worked on a team to develop a Sitecore Foundry CMS which dynamically creates over 3000 financial advisor websites leveraging internal data.

Developed an ASP.Net Webforms application which allowed financial advisors from other firms to apply to become a Raymond James advisor. This application used SOAP to read and write data to Microsoft Dynamics CRM.

Developed an ASP.Net Webforms application to manage email subscriptions for marketing material.

Maintained and extended an ASP.Net Webforms application which allowed financial advisors to create retirement presentations for clients.

Support for approximately 100 legacy ASP/VBScript forms and applications, used for a variety of internal business needs.

Supported the firm's main website, which was built in ASP/VBScript and included heavy usage of JavaScript

**Web Developer Web Tools & Technology May 2008 to December 2010**

Develop web sites using HTML, CSS and JavaScript with a focus on search engine optimization (SEO).
