

Python Developer Python Developer Python Developer - American Airlines New York, NY, NY, NY

Work Experience Python Developer American Airlines December 2016 to Present Responsibilities:

Developed Python based API (RESTful Web Service) to track the events and perform analysis using Django. Created a Python/Django based web application using Python scripting for data processing, MySQL for the database, and HTML/CSS/jQuery and High Charts for data visualization of the served pages. Designed and developed the UI of the website using HTML, AJAX, CSS and JavaScript. Worked on writing and as well as read data from csv and excel file formats with Perl/Python scripts. Used python libraries like Beautiful Soap, NumPy and SQL Alchemy. Build integration with many third parties, making heavy use of asynchronous processing with Celery and Rabbit MQ. Worked with routing protocols and hardware platforms utilizing TCP/IP, IP Routing, Metro Ethernet protocols, Cisco & Junos OS. Implemented Cloud Infrastructure as a Service environment using open source technology OpenStack to enable portability of cloud services across hybrid cloud environments. Worked with HTTP which is designed to permit intermediate network elements to improve or enable communications between clients and servers. Provided technical support on networking including port-forwarding, TCP/IP settings. Managed requirements and tasks using JIRA. Built web-services using SOAP that allowed integrating the business application with the legacy applications and facilitates for future applications. Involved in debugging the applications monitored on JIRA using agile methodology. Automated the existing scripts for performance calculations using NumPy and SQL Alchemy. Developed application which accessed the Cloud foundry API to monitor trends in development environments using other CF tools: Jenkins, Chef, and Puppet. Translated design specs into responsive user interface component for web & devices using HTML5, CSS3, Bootstrap, jQuery, JavaScript, Angular JS & AJAX. Involved in creating and extracting data from database using SQL Queries, PL/SQL on Oracle database. Used Python and Django creating graphics, XML processing, data exchange and business logic implementation. Involved in Using AWS Cloud Watch performed Monitoring, customized metrics and file logging. Environment: Python 2.7, Django 1.6, HTML5, CSS, XML, MySQL, MongoDB, JavaScript, Angular JS, jQuery, CSS Bootstrap, Rabbit MQ, Celery, T-SQL, JavaScript, Eclipse, Git,

GitHub Linux, Redis, Shell Scripting Python Developer Walmart- NY June 2015 to November 2016

Responsibilities: Translated the customer requirements into design specifications and ensured that the requirements translate into software solution. Application was based on service-oriented architecture and used Python 2.5, Django 1.5, JSF 2, Spring 2, Ajax, HTML, CSS for the frontend. Involved in web application development for backend system using AngularJS and Node.js with cutting edge HTML5 and CSS techniques. Designed the front end of the application using Python, HTML, CSS, AJAX, JSON and JQuery. Worked on backend of the application, mainly using Active Records. Involved in the design, development and testing phases of application using AGILE methodology. Developing applications using RESTFUL architecture using Node.js and PHP as backend languages and Used Numpy for Numerical analysis Used the Python language to develop web-based data retrieval systems. Designed and maintained databases using Python and developed Python based API (RESTful Web Service) using Flask, SQL and PostgreSQL. Developed web sites using Django, Python, XHTML, CSS, JavaScript and Node.js. Developed and designed e-mail marketing campaigns using HTML and CSS. Tested and implemented applications built using Python and Node.js Developed and tested many features for dashboard using Python, ROBOT framework, Bootstrap, CSS, and JavaScript. Created complex dynamic HTML UI using jQuery. Automated Regression analysis for determining fund returns based on index returns (Python/Excel) Worked on development of SQL and stored procedures, trigger and function on MYSQL. Developed shopping cart for Library and integrated web services to access the payment. Used Php language on lamp server to develop page. Developed server-based web traffic statistical analysis tool using Flask, Pandas. Implemented and tested python-based web applications interacting with MySQL. Developed dynamic interaction page on .net MSvisualbasic 2014, using SQL developer tools. Performed joins, group by and other operations in MapReduce using Python. Wrote MapReduce code to make un-structured data into semi- structured data and loaded into Hive tables. Supported MapReduce Programs those are running on the cluster. Executed queries using Hive and developed MapReduce jobs to analyze data. Involved in doing AGILE (SCRUM) practices and planning of sprint attending daily agile (SCRUM) meetings and

SPRINT retrospective meetings to produce quality deliverables within time. Developer Accenture January 2014 to March 2015 Responsibilities: Used Python scripts to update content in the database and manipulate files. Generated Python Django Forms to record data of online users. Used python libraries like Beautiful Soup and matplotlib and Built efficient Node.js backend for client web application. Used Python and Django creating graphics, XML processing, data exchange and business logic implementation. Used PHP as an HTML embedded scripting language, in front end web development. Developed tools using Python, Shell scripting, XML to automate some of the menial tasks. Designed and developed the UI of the website using HTML, XHTML, AJAX, CSS, JQuery, JSON and JavaScript. Used Bootstrap as a mechanism to manage and organize the html page layout. Used Django configuration to manage URLs and application parameters. Developed various algorithms for generating several data patterns and Worked on Node.js for developing server-side web applications and Used JIRA for bug tracking and issue tracking. Wrote and executed various MYSQL database queries from Python using Python-MYSQL connector and MySQL db package. Involved in development of Web Services using SOAP for sending and getting data from the external interface in the XML format. Developed entire front-end and backend modules using Python on Django Web Framework. Designed and developed data management system using MySQL. Rewrite existing Python/Django module to deliver certain format of data. Used Django Database API's to access database objects. Wrote python scripts to parse XML documents and load the data in database. Responsible for debugging and troubleshooting the web application. Developer Oracle Corporation IN June 2012 to December 2013 Jun2012- dec 2013 Responsibilities: Involved in various phases of Software Development Life Cycle (SDLC) such as requirements gathering, modelling, analysis, design and development. Generated Use case diagrams, Activity flow diagrams, Class diagrams and Object diagrams in the design phase. Responsible for entire data migration from Sybase ASE server to Oracle Migration of API code written for Sybase to Oracle. Overlook the migration activity of PL/SQL programs Migration of the PL/SQL code from Sybase to Oracle. Migration of the data contained in the earlier ASPL Database from Sybase to Oracle. Migrate the Libraries written using Sybase

API's to Oracle's OCCI API's Automation of testing using Python. Environment: Python 2.7, Shell scripting, PL/SQL, SVN, Quality Centre, Solaris, Windows, Perl. Skills AJAX (6 years), DJANGO (6 years), HTML (6 years), JAVASCRIPT (6 years), MYSQL (6 years) Additional Information Skills PYTHON (5 years), AJAX (4 years), BOOTSTRAP (4 years), DJANGO (4 years), HTML (4 years), C (Less than 1 year), AWS (Less than 1 year), Javascript (Less than 1 year), Java (Less than 1 year), Flask (Less than 1 year) TECHNICAL SKILLS: Primary Languages Python 2.7/2.4, Core Java, C, C++, Shell Script, Perl. Python Libraries Beautiful Soup, numpy, scipy, matplotlib, python-twitter, Pandas dataframe. Databases MySQL, SQL Server 2008, PostgreSQL, MSSQL, MongoDB Web Technologies AJAX, JavaScript, HTML, DHTML, XHTML, XML Versioning Tools Git, SVN, VSS Web servers Apache, Nginix, Tomcat Framework Flask, Parsekit (Enigma.io), Bootstrap, Django, Node.JS, PyJamas, Pyramid, Hibernate Other Tools Putty, SQL developer, Photoshop SDLC Methods SCRUM, Agile
