Work Experience Software Developer KMR Group, Inc October 2017 to Present

Developed interactive and scalable web applications used by pharmaceutical companies for slicing and dicing huge chunks of data to make business decisions. These web applications mine the data and provide recommendations in the form of Client-Industry Data Comparison and Trend/Cost Analysis for conducting clinical studies. Code and optimize performance metric and summary statistics computations. Worked with analysts and statisticians to achieve required product features. Developed a web-based pivot table app to increase data analysis permutations. Implemented dashboard's with graphing functionality to visualize the data and to investigate key business questions. Parsed XML data retrieved from Digital measures and used in search applications. Designed and implemented custom solutions leveraging cutting edge tools and technology to improve the data analysis infrastructure and reporting capability.
