

Oracle DBA Oracle DBA Oracle DBA - Heron Solutions Group Arlington, TX Over 6 years of hands-on experience in Oracle Database Administrator with in-depth knowledge and proficiency in Backup & Recovery using RMAN utility, Security Implementations, Database Design, Performance Monitoring & Tuning, Data Migration, Upgrades, Patching, Cloning/Refresh and Replication, OEM, Oracle RDBMS, Data Guard, RAC. I am also proficient in an assortment of technologies including Oracle 10g, 11g and 12c. I possess extraordinary written, verbal, analytical and organizational abilities in English. I am proven leader with motivational management style, a solid reputation for building and retaining highly motivated teams and development of innovative solutions. Authorized to work in the US for any employer

Work Experience

Oracle DBA Heron Solutions Group - Atlanta, GA February 2016 to Present

Implementation and Installation of High Availability solutions with Oracle 12c, 11g RAC, 10g RAC, Standby Database (Active Data Guard), Disaster Recovery

Involved in Design and implementation of oracle 11g Data Guard both physical/logical Standby databases for high availability and disaster recovery. Installation and configuration of Oracle Enterprise Manager Implemented Monitoring Templates and Incident Rule notifications using OEM for database alerting. Ensure system integrity, efficiency and performance through management of core system resources (CPU/Memory/IO Performance) Worked extensively on OEM and configured DB alerts for DBA Effectively made use of Indexes, Table Partitioning, Collections, Analytical functions, Materialized Views & Query Re-Write. Supported functional data warehouse projects. Deploy bug fixes, patches and security updates to ensure system readiness, performance, resource.

Data migration, Cloning/Refresh, Backup and Recover using RMAN utility Tablespace and User Management Installation, Configuration, Upgrade, patching of Oracle RDBMS and applications Work on different versions of Databases with OEM Grid control to maintain the database effectively. Configured different levels of replication such as DDL replication, DML replication for table level, schema level, database level using Oracle Streams. Query optimization, PL/SQL Performance Tuning using Oracle Cost based Optimization techniques, Trace, Hints. SQL, PL/SQL and UNIX shell scripting. Monitored the Applications and database using OEM, PATROL(BMC Tool)

Document and communicate changes to the OLTP, OLAP systems and data warehouse teams,

including Data Modeling, ETL and Database teams. Used Automatic Workload Repository (AWR) & Automatic Database Diagnostic Monitor (ADDM) in RAC for Performance Tuning. Built 2 node RAC 11gr2 Standby database and set up DG Broker Setup of High Availability of the database using RAC, Standby, Data guard. Provide 24X7 support for Oracle 10g/11g/12c databases on windows/Linux platforms DBA activities such as configuring Grid events, Regular Backup's, Replication, Tuning, and troubleshooting performance issues. Advanced Backup and Recovery using Oracle RMAN utility Provide development and production support related to database Perform other regular DBA activities including space management and performance monitoring. Design, development, testing, performance tuning, deployment, and support in Data warehouse system Upgrade of database (10g to 11g and 11g to 12c) and applying patches whenever required

Oracle Database Administrator EchoStar Corporation - Suwanee, GA May 2013 to August 2016

Responsibility Perform maintenance of the data backup systems. Deploy bug fixes, patches and security updates to ensure system readiness, performance, resource Gather data pertaining to client needs, and use the information to identify, predict, interpret, and evaluate system and network requirements Monitor server performance, network capacity, and security issues. Assist with audits on existing software to verify authorized use and license certification Remain up-to-date on products available in the market; support new technologies. Disaster Recovery Testing; working with multiple departments in testing disaster recovery plans. Monitored backup operations, and schedules manual backups as needed Perform installations and configurations of grid infrastructure, databases, clients and much more. Create and monitor roles and profiles, audit users

Researched, tested, and made recommendations of data validation tools Provides recommendations to management on behalf of the team Developing functional process diagrams for Oracle database services. Providing support to developers working on SQL, including development of best practices, hands on demos, and knowledge transfer Assisting with procurement of hardware, software, and services Monitor Oracle trends for hardware, system and user load utilization Ensure system integrity, efficiency and performance through management of core system resources (CPU/Memory/IO Performance) Assess and perform systems utilization and

headroom reports to assist in troubleshooting and performance tuning Perform database upgrade from 10.2.0.1 to 11.2.0.4 Evaluate and manage existing software and licensing configurations, systems and the design, implementation and management of new/improved systems Provide 24X7 support for Oracle 10g/11g/12c databases on windows/Linux platforms Responded to and resolved database access and performance issues. Performed capacity planning of Oracle server environment and provides recommendations to management to sustain business growth. Experience of working on Oracle 9i/10/g/11g server infrastructures Schedule jobs using various Oracle tools such as Oracle OEM, DBMS JOBS and SCHEDULER Education BSc. in Computer & Business Information Systems Ladoke Akintola University of Technology Osun Skills DATABASE, ORACLE, ORACLE 10G, PL/SQL, RDMS, SQL, LINUX, RED HAT, UNIX, UNIX SHELL, RMAN, VM, OEM, CONFIDENT, WRITTEN AND VERBAL, TEAM PLAYER, EXCEL, MICROSOFT OFFICE, OUTLOOK, WORD, Oracle Db, DBA Certifications/Licenses Oracle Certified Associate Present
