

Java developer Java developer Java developer - CenturyLink Corp . 3+ years of experience in Design and Development of Enterprise Applications, Web Applications, and Web Services in Java/J2EE and related technologies. Experience in client-side validations using HTML, CSS, JavaScript, AJAX, jQuery, AngularJS, AngularJS 2.0, and NodeJS. Experience in developing software applications in Java using Object Relational Mapping (ORM) frameworks like Hibernate, Eclipse Link, MVC frameworks like JSF, Struts, spring modules such as Spring MVC/AOP. Experience in Unit and Integration testing using Junit, TestNG, Mockito, Jasmine, Selenium Proficient in Java, J2EE technologies like JDBC, JSP, Java Beans, Models, Struts, Spring, Hibernate, XML, JMS, JNDI, Java Reflection API (JRA), Java Persistence API (JPA). Proficient in developing GUI using web technologies like CSS, HTML, Java Script, JSF Prime Faces, Ajax, J Query, JSON, PHP, Angular JS, Node JS. Experience on the SPRING framework like SPRING IOC and SPRING DAO, JDBC Templates, Transactions, Security, AOP, MVC, ORM etc. Solid experience on API development using node JS, express JS and Mongoose. Experience in deploying, configuring and administering application servers such as IBM WebSphere, WebLogic, JBoss, JAX-WS, Glassfish and Apache Tomcat. Expertise in Junit Testing with Mockito and Power Mockito. Experience working in high pressure team environments with intense development and release activity. Solid command in Object Oriented concepts (OOPS) using Java and C# and hands on experience in front-end design using HTML 4.0/5, CSS 3, XML. Good Knowledge on continues integration using Jenkins and used SonarQube for quality testing the code in continues integration. Good experience with Software development methodologies like Agile methodologies and followed Test-Driven Development (TDD). Experienced with SDLC using waterfall as well as agile methodologies. Experience on fortify Static Code Analyzer (SCA) which is used for analyzing the source code for security issues. Experiences with Representational State Transfer (REST), Simple Object Access Protocol (SOAP), Java Messaging service (JMS) Web Services to expose the business logic. Experience working with Relational Database Management Systems (RDBMS) like MySQL, SQL, Oracle. Strong working knowledge on Web Services like REST/Restful, SOAP, WSDL, UDDI, to expose the functionality of business code. Work Experience Java developer

CenturyLink Corp - Dallas, TX June 2017 to Present Requirements: Involved in the creation of UI specification documents by interacting with business users and design documentation and data modelling for the entire project. Used Struts Tag Libraries, JSPs, HTML, JavaScript, DOJO and CSS to develop the frontend UI, certain shopping cart features are developed using Angular.js. Involved in the architecture, design and development of high traffic application built in Java/J2EE using MVC architecture integrating spring, Hibernate and Struts frameworks in SOA. Worked on Apache Ant as build tool to automate the build process for the entire application. Worked on SVN repositories for version controlling, and Log4J is used for logging errors, exceptions. Involved in integrating applications with other application using IBM WebSphere. Worked on automated data loading using SSIS package to fetch, load and parse data from various external sources such as spreadsheets and flat files from DB2. Involved in development, performance testing & defects fixing, also followed an issue tracker to log the issues and fixes applied daily to streamline the application development. Worked on GIT controls to track and maintain the different version of the project. Used struts validation framework to perform Server-side validations. Used Data Access Object (DAO) pattern to introduce an abstraction layer between the business logic tier (Business object) and the persistent storage tier (data source). Involved in writing complex HQL queries to handle the persistence operations. Defined beans in xml for dependency injection using Spring IOC/Core.

Java Developer FedEx USA - Memphis, TN June 2016 to May 2017 Responsibilities: Worked with Spring MVC framework, Hibernate ORM and Spring Boot for implementing the Web tier of the application with Oracle database. Developed logging framework in conjunction with Log4j for logging. Developed POJO classes for defining the variables in the object class. Involved in migrating from CVS to GIT which gave the developers branching capabilities for code merging. Involved in full development life cycle including requirements gathering, analysis, and implementation. Converted C- code to Java to improve the performance and maintenance of the project. Involved, executed and implemented the project in AGILE methodology. Used sonar lint for checking code quality real time which helped to check and fix any issues before creating a build and moving to the servers. Developed logging framework in conjunction with Log4j for logging.

Developed POJO classes for defining the variables in the object class. Involved in migrating from CVS to GIT which gave the developers branching capabilities for code merging. Use of jobs to set up batch jobs at regular intervals and used configuration file to set up and operate the jobs. Involved in the analysis, design and development and testing Phase of Software Development Life Cycle (SDLC). Design and Implemented the UI using HTML, JSP, CSS, AJAX and handled client-side validations using Java Script and jQuery. Implemented application with Spring MVC framework which includes writing controller class for handling request, processing form submissions. Developed code for consuming various web services using JAXB, JAX-WS, SOAP and Restful. Interacting with Business Analyst and Lead for understanding the requirement using Agile Methodologies and SCRUM Meeting to keep track the end client needs. Expertise in using Angular JS directives, Controllers, Filters, Services, Templates, Events and Injectors. Implemented several UI screens using Struts2, JSP, HTML and CSS. Used Spring Web MVC framework for the applying MVC Implementation to the web application. Involved in POC for developing a module using Spring Boot which improved time and efficiency. Release Support- Managing Release deployments to lower Environments in terms of software deliveries. Developed story/task by following TDD/BDD and Pair programming concepts and providing daily status in scrum meetings with the client. Telangana- Java Developer CA Technologies - Hyderabad, Telangana February 2015 to May 2016 Requirements: Created business logic and application in Struts Framework using JSP, and Servlets. Worked on implementation of MVC pattern by using its Custom Tag Library, UI Components, Server-side Helper Classes, Validators, Event Handlers and Navigation Handlers. Involved in developing JSP pages for the web tier and validating the client data using JavaScript. Developed web application using Spring MVC framework. Used Spring DAO concept in order to interact with database (DB2) using JDBC template. Proficient in Core Java concepts like Collections, Multithreading, Data Structures, Serialization, and JavaBeans. Developed XML documents and generated XSL files for Payment Transaction and Reserve Transaction systems. Wrote unit test cases for different modules and resolved the test findings. Implemented SOAP using Web services to communicate with other systems. Developed JDBC code for backend processing.

Used Subversion for version control and log4j for logging errors. Involved in writing test cases for testing functional specification and for unit testing Wrote Oracle PL/SQL Stored procedures, triggers and has a huge knowledge about it. Helped production support team to solve trouble reports and Interacted with testing team to fix defects. Involved in the creation of data model and data dictionary during the application design phase. Implemented ORM with HIBERNATE to make the Persistence class objects interact with numerous SQL Server tables spanned across various schemas as per MODOC standards. Defined multiple data sources on the server side to be used in applications with JNDI. Entire Application was developed in Eclipse and GWT plug-in is used for browser testing and compatibility of AJAX and J Query components along with JUnit. Experience on test environment for continuous build and deployments in Jenkins. Education Bachelor's in computer science and engineering in computer science and engineering Osmania University - Hyderabad, Telangana June 2015 Skills Java, Spring, Java J2Ee, J2Ee
