

Systems Administrator II Systems Administrator II Systems Administrator II - Northrop Grumman Corporation Technical Services Jacksonville, FL Work Experience Systems Administrator II Northrop Grumman Corporation Technical Services April 2018 to Present with a very wide variety of IT problems ranging from printer Drawing connectivity, internet/network connectivity, outlook troubleshooting, software installation and repair, Red Hat Systems Administrator II 04/2018 to Present Enterprise Linux Administration and deployment, Debian OS Northrop Grumman Corporation Technical Services deployment and management, active roles, Certificate authority 513 Child St, Naval Air station JAX, Jacksonville, FL 32214 and permissions, share drive map, and remote desktop support. Experience in Patching PC's - networked and legacy, Windows Monitored networks, nodes and interfaces 10 installation and troubleshooting Skills, Experience using and using OpenFire Enterprise Software assigning tickets in E-NET trouble ticketing system, as well as Installed, investigated and resolved routine Remedy for remote support issues, Windows Server and complex matters of significance with 2008/2012r2 management, Server Virtualization and computer software and hardware equipment. Administration, Networking Troubleshooting, CHCS account Analyzed, logged, tracked and resolved set up and recovery, ESSESTRIS account recovery, Switch and complex software/hardware matters of Router Configuration, Experience in troubleshooting computer significance pertaining to networking peripherals - printers, Projectors and smart boards. Performed connectivity issues, printer, servers, and cross platform audits of Active Directory (AD) objects and user applications to meet business needs permissions, Managed User Accounts on Windows and UNIX Coordinated hardware/software installations Platform (Creation, Deletion, Permissions, and VPN Access), and upgrades to ensure work is properly Developed organizational units in Active Directory (AD) and performed in accordance with company managed user security with group policies, Created entries in policy. DNS, Created and maintained email addresses and distribution Recommended resolution to complex lists in MS Exchange, and Compiled data to assist technical matters of significance and coordinated the writers with IT new hire manuals and prepared data to report to implementation of the approved solution testers for system enhancements. My higher education is

geared Coordinates and monitors troubleshooting to isolate and diagnose common system
towards Server Administration, Virtualization, Technology problems; documents system ends
course of Infrastructure, and Network Virtualization with Python Scripts. action and implements as
approved. Although new to the civilian side of the IT industry, I have Performed installation of and
basic years of relevant experience in the field, and I look forward to troubleshooting of Windows &
Linux servers progressing to new positions in the near future. Created Powershell scripts to help
with day to day management of Active Directory and Exchange inboxes. SKILLS Award Name #1
Support LANs, WANs, network segments, Internet, Coordinated testing, upgrades and 2015
configuration of system files and intranet systems and services. Ensured changes were in Dolor

Server Back Ups 149 IQ Score Created and managed network accounts in Active Directory 121
ASVAB Score Maintained smooth operation of multi-user computer systems, including
coordination Troubleshooting expertise with network administrators. Interacts with users and
evaluates vendor Trained in security products. Made recommendations to purchase Trained in
counter-terrorism strategies hardware and software, coordinates installation and provides backup
recovery. Versatile Installation and Management of Developed and monitored policies and
Communications Infrastructure standards for allocation related to the use of computing resources.
Multiple Overseas Deployments Ancillary duties included setting up administrator and service

accounts, Strong Verbal Communication maintaining system documentation, tuning system performance, installing system wide Server Management/Administration software and allocating mass storage space. Planned, implemented, and maintained a Development of Foreign Government Relations Windows domain based infrastructure Rebuilt/configured the secret/SCI workstations and Critical thinking servers; Provided technical support to the customers; Installation and Operation of equipment troubleshoot hardware & software; installed imagery & satellite software and development tools Cisco Router Configuration Senior Graphic Designer Special Forces - Camp Blanding, FL September 2017 to Present VMWARE workstation, vSphere 5.5, 6.0, and 6.5 ODA 2, ACO, 3rd BN, 20th SFG (A), Camp Blanding, Florida Maintain networking in individual machines, such From. Established and commanded field communication operations. Top settings of personal computers as As drivers and Frank Kelinerev Secret Security Clearance Senior Graphic Designer Ensured the successful operation of a SDN (Satellite Deployable Well as printers Node), with NIPR and SIPR networks for a total of 12 months in hostile, remote environments. Monitor networks to ensure security Maintained and successfully performed troubleshoots on Computer Operating systems for a 12-man team for 12 months in Administer servers, laptop and desktop a remote location. Computers, printers, routers, switches, Properly managed and disposed of cryptographic material for Satellite Communications, SINGARS, THALES, and HARRIS radio Firewalls, phones, company mobile phones, systems. Advised Detachment Commander on Direct Action, Special Smart phones, software deployment, security Reconnaissance, Unconventional Warfare, Foreign Internal Defense, and Advanced Special Operations missions. Updates and patches Advised and assisted the installation of all radios, communications Windows 10 Installation/Troubleshooting Developed the teams' tactical communications plan; Data Transfer between secured and maintained critical and continuous communications in the exigent and fluid environment of Afghanistan. Unsecured networks Maintained accountability and serviceability of detachment's communications equipment Operational knowledge of Linux/Unix valued in excess of \$600,000. Operating Systems and Interfaces Trained, organized, advised, and led indigenous forces in combat. Printer installation

and troubleshooting Led multiple patrols with Afghan Special Forces and Afghanistan Police Forces, increasing the Subject Matter Expert in the operation, stability in Afghanistan. Cross-trained team on radios and equipment in Maintenance, and troubleshooting of preparation for deployments to Afghanistan and Colombia, increasing Team's ability to function in a Advanced special missions radio jungle environment. Communications equipment Obtained a certification in a 40-hour course in COMPTIA Security+. Served as custodian of classified documents. Implementation of Information Security Policy Performed basic troubleshooting skills for all In-depth knowledge of computer systems computers and communications equipment Maintained a high-level of fitness and operational Trained in Cyber Warfare fortitude Proven track record of resolving basic issues EKMS Custodian for cryptographic material Managed and controlled various airborne assets on Associated with system configuration the battlefield via radio communications Management Built, Configured, Maintained, and Troubles hooted Classified, Unclassified, and local networks Experience in records retention and Performed Switch and Router Configuration IAW with best practices in isolated, remote locations with no oversight Destruction policies Performed Data back-ups and audits on all systems Ability to solve problems quickly Established and maintained secure military communications through Networking and Advanced Missions Radio Systems Coordinated Medevac Operations to remove wounded comrades from the battlefield without incident during extremely volatile conditions SKILLS Lorem ipsum dolor sit amet, consectetur adipiscing. Etiam eget nisi ac justo feugiat pharetra. Curabitur id Server Virtualization Created a tracking system for cryptographic material; justo scerisque, pulvinar dolor imperdiet, feugiat transported crypto on two OCONUS deployments without VMWare knowledge and expertise erat vel, turpis.
