

Founder Software Architect Founder Software Architect Founder Software Architect - SooriTech Inc
San Diego, CA Consummate Architect with outstanding experience and problem solving skills.
Dedicated and organized with on-time delivery record and proficiency in enterprise systems. Diverse
expertise in dynamic multimedia websites, enterprise applications, e-commerce and Rich Internet
Application development and Telephony Applications. Core technical strengths include:
Object-Oriented Design & Development Technical Analysis Systems Development Life Cycle
Architecture and Design Unit, Integration, Production testing Quality improvement Customer
interface/liaison Project & Time management Mentoring/Training development Product &
System Specification Programming and Software Skills Java Java Technologies SOA
Oracle/MySQL/ Microsoft SQLServer 2000, 2005, 2012 NoSQL Mongo DB Database design
J2EE architecture specialist Windows, Linux, Solaris, VM Excellent problem-solving abilities
Excellent communication skills Website Develop/Design & maintenance IMS/Telephony
Network/SIP JMeter Soap UI Cloud AWS EC2 AZUR Google Technical specifications creation
QA tools Enterprise technologies Coding and modularization Project Management Remote
access technology Data privacy applications Website and portal monitoring JBoss Tomcat
Weblogic Build (Ant, Maven) Code (CVS, Subversion, GIT Android IOS Engineering Work
Experience Founder Software Architect SooriTech Inc - Atlanta, GA May 2012 to Present Software
Engineer Architect AT&T - Atlanta, GA May 2005 to April 2012 Software Engineer Consultant
Bellsouth - Atlanta, GA May 2004 to May 2005 Software Engineer Consultant Alternate Tech Inc -
Atlanta, GA September 2003 to April 2004 Application Developer/Analyst Digital Oilfield Inc -
Calgary, AB January 2002 to August 2003 Programmer Analyst Cedar Enterprise Solutions -
Calgary, AB March 2001 to January 2002 Programmer Analyst Critical Mass Inc - Calgary, AB June
1999 to March 2001 Work Responsibilities Business Solutions architected and operated.
Successfully built a thriving company, orchestrating business launch and endured economic and
driving marketing for the past years. Sharpened holistic leadership in business development, market
assessment and profit and loss and client management. Design and develop architectural
solutions for the contact services at CSPD, building the cache mechanism to optimize

request/response time, Identify technical risks and provide mitigation strategies, implement, building upon and working on AT&T Silver Lining cloud. Implementing Cloud computing on all layers: application, platform and Infrastructure Work as a member of a cross functional project team contributing to the technology-based solutions and consult on concept feasibility Design and develop components of BBNMS application utilizing Cramer Inventory Management database, Java, J2EE technologies, web services, Network creation, circuit modeling, Centralized Inventory Management and provisioning Architect, Design and develop of internal and external business systems and applications such as Web dashboard and Monitor framework GUI to support new systems functionality supporting business objectives utilizing struts, DAO objects, Java technologies

Service Creation of SIP/non-SIP converged Applications in IMS infrastructure using variety of technologies and architectures to prove the feasibility of integration of IMS Solutions and web services which are the newest concepts in Next Generation Network Lead, Architect, Design, Implement, Deploy and test the following projects Employee Directory Lookup, ASI Presence Lookup, ASI Click-to-Communicate, ASI Persona Tuning, ASI IP Call Center, ASI Parental Control Education Master of Internet Technology in Internet Technology University of Georgia - Atlanta, GA 2013 Certificate of 1200 Southern Alberta Institute of Technology - Calgary, AB 2000 Bachelor of Science in Pure Mathematics Alzahra University - Tehran, IR 1993 Links <https://catmousavi.wordpress.com> <https://www.sooritech.com>
