Firewalls Work Experience Network Administrator Federated Logistics - Taylor, MI March 2009 to
Present Current responsibilities include developing and maintaining network system as well as the
design and implementation of new installations. Daily activities involve performing backups,
troubleshooting, and repairing all aspects of the network to ensure 100% efficiency and uptime. I am
also responsible for initiating and maintaining multiple IT vendor relationships. Professional
achievements include having revamped and improved a Fuel Tax reporting system, Dispatch
scheduling program, and border crossing procedures saving the company thousands of dollars.
Upgraded and installed the existing infrastructure and network, saving Federated over \$50,000 in
installation and maintenance costs. Education Associate of Applied Science in Information
Technology ITT Technical Institute - Canton, MI December 2009
