

Consultant, IT Regulatory & Controls Division Consultant, IT Regulatory & Controls Division Consultant, IT Regulatory & Controls Division Fort Lee, NJ Work Experience Consultant, IT Regulatory & Controls Division Credit Suisse, NY, NY - Midtown, NJ, US 2017 to 2019 Managed the responsibilities among two cross-functional teams (CISO & TSS) in delivering IT quarterly reports to the regulators for the FED, SEC, and DFS that pertained to financials, benchmarks, outages, and new infrastructure builds. Managed and outlined new procedures and processes for workstream leaders, and communicated those timelines to multiple groups. Established appropriate project governance structures and processes by engaging key stakeholders to develop appropriate thresholds and cadence for governance discussions. Improved and recreated a historically ineffectual project charter, identifying the project scope, deliverables, benefits, and timelines in successfully completing the project. Implemented and streamlined processes by identifying areas of improvement within the workflow of those groups. Evaluated progress among the stream leads by identifying, tracking, managing, and resolving project issues.

Consultant, Carrier Services Division Deutsche Bank, New Jersey - Jersey City, NJ 2016 to 2017 Responsible for building business cases for the networking engineering team and other key stakeholders in assembling multiple project plans consisting of resources/personal, budget requirements, deadline dates, carrier requirements, costs, and risks associated with the project. Led meetings with cross-functional IT teams to help understand the issues and reduce costs in areas pertaining to network/voice circuits and data center migrations. Defined and documented Roadmaps and Project Plans that were utilizing the four phases of the project life cycle. Created and presented a PowerPoint presentation showing a cost-benefit analysis with KPI metrics, highlighting all the successful measures within each business case scenario. Managed and organized a structured template in Microsoft Project outlining the operations and schedules to the timelines for each phase within the workstream.

Project Manager, Telecom & Network Division Scholastic, NY, NY - Downtown, NJ, US 2012 to 2016 Point of contact for all vendor related services affecting IT infrastructure and network outages Managed the initiation through completion process using the Waterfall Method in implementing a technology expense solution called Tangoe; the program was

used to track and pay invoices, and streamline inventory and vendor contracts   Led the processing and implementation stages of the Enterprise Mobility Management tool called AirWatch, the program was used to allow IT to deploy, configure, manage mobility devices (Smartphones and MIFI)

Negotiated vendor contracts: terms and conditions, and scope of work and pricing to achieve substantial savings   Consultant, Billing Department Intralinks, NY, NY - Midtown, NJ, US 2011 to 2012   Responsible for making recommendations based on parallel performance between new and old billing systems   Documented new requirements and processes during migration phase

Suggested various enhancements to the existing system improving efficiency   Developed a standardized workflow tracker to coordinate and monitor tasks that were tested on the new billing system   Claims Specialist, Sales and Accounting Department MetTel, NY, NY - Downtown, NJ, US 2009 to 2011   Implemented a new claims process amongst vendor carriers, educating analysts and interns the methodology in submitting a dispute.   Collaborated with multiple internal departments on finding additional information regarding disputes.   Leveraged relationships with carriers to resolve complex disputes and escalations in achieving a high success rate for submitted claims.
