

Guidewire Developer Guidewire Developer Guidewire Developer - Berkley Risk Administrators Company LLC MN Work Experience Guidewire Developer Berkley Risk Administrators Company LLC February 2018 to Present Responsibilities: Actively involved in the Requirement gathering for the Guidewire Claim Center 9.0 upgrade an existing version Claim Center 7.0 Developing the Claim Center 9.0 Integration Modules like Policy Integration, Configuration enhancements and upgrade. Actively involved in developing coverages and exposures to P&C business like Commercial Auto, Package, General Liability, Excess and Workers Compensation Business Claims.

Developed SOAP Web Service endpoints for policy external systems and published to integrate with Guidewire Claim Center Actively Supporting Guidewire Claim Center 7.0 Production Environment. Developing Claim Center Configuration Modules like PCF Designing, Event Rules, and Messaging. Developed Guidewire plugins to integrate with external Systems like Jopari, PeopleSoft, EPICOR, Mitchell, Policy Administrative System. Developed Rules for the integration points using GOSU Language. Developed Modules using the Spring Batch to extract data from a database and creating files. Used Hibernate Criteria, Projections for reading and writing data to the database. Using Atlassian tools like Bamboo, JIRA, Confluence, Stash for application builds and deployment. Used Tidal Scheduler to schedule the batch jobs on a daily basis. Used Eclipse as development environment. Using GIT as Version control tools and Stash (BIT BUCKET) as Repository. Using JIRA for tracking defects and new user stories. Environment: Guidewire Claim Center 7 & 9.0, GOSU, J2EE, JAVA, Spring Batch XML, spring, Web Services, Windows 7, GIT, JIRA, JUnit, Log4j, Ant, Maven, UNIX, TIDAL, putty, open shift enterprise (OSE3), DCRUM, STS IDE, Eclipse, Bamboo. Java Application Developer OPTUM - Eden Prairie, MN March 2017 to January 2018 Consumer Activity Presentment Portal (CAP) and Employer Activity Presentment Portal (EAP) are web applications that are used to enroll and maintain customer HSA (Health savings accounts) and HRA (Health reimbursement accounts and employer information. CAP and EAP both are regular J2EE web applications build by using JSF framework. Responsibilities: Involved in capturing the business requirements, design, development and testing of the application.

Spring MVC Framework was used to make application Web-centric and followed the MVC

modular architecture for the application. Used customized services and directives in Angular JS to develop dynamic and responsive webpages. Involved in application deployment, writing unit test cases and performed unit testing. Used Soap UI tool for unit testing and debugging of the developed module. 24x7 on call support in production environment on rotation basis. Ensured Applications were up and running by utilizing proactive monitoring tools like Dynatrace Client 6.2, DCRUM, Site scope, HPBSM. Diagnose and resolving production issues. Used Splunk and Kibana elastic search tool to monitor the logs. Used Jenkins, Docker Images & OpenShift enterprise (OSE3) environment for application builds and deployment. Using SVN and GIT for Version Controlling tools. Used Web-Sphere RAD IDE. Scheduling and running jobs using IBM Tivoli Workload Scheduler tool. Environment: J2EE, JAVA, Soap, JAX-WS, JSP, Spring MVC, Angular JS, Web Services, Windows 7, GIT, JUnit, Log4j, Ant, Maven, UNIX, IBM TWS, Dynatrace 6.2, Service Now, HP BSM, Splunk, Kibana, open shift enterprise (OSE3), DCRUM, RAD 8.0, Jenkins Java/J2EE Developer Great American Insurance - Cincinnati, OH February 2016 to March 2017 Guidewire Claim Center an end-to-end claims management solution, including loss-report intake, adjudication process, and operational reporting. Integration is the communication between the guidewire and external systems. Policy system and retrieval (PSAR), ISO Claim search are the main integration parts. Responsibilities: Developed a code for Web services using XML, SOAP and used SOAP UI tool for testing the services. Involved in configuring PCF, Rule Sets, Workflows, and Datatypes. Involved in Integrating Guidewire ClaimCenter with the external system using SOAP Web Services. Developed SOAP Web Services clients using Apache AXIS 2 framework. Experience in Implementation and generating of WSDL, client STUBS and Server Side code. Involved in requirements gathering and analysis from the existing system. Designed and developed Guidewire policy search integration adapters per business requirements. Developed Rules for the integration points using GOSU Language. Involved in the planning process of iterations under the Agile Scrum methodology. Apache Ant was used for the entire build process. Worked with Messaging queues for ISO Claim Search and exposure to batch process. Used Dimensions for version controlling. Scheduling and running cron jobs using UC4 automatic tool.

Involved in resolving Integration Test, UAT and deployment    Involved in Production Support Issues and maintenance.    Developed Exception handling framework and used log4J for logging and used JUNIT for unit testing.    Used Eclipse IDE for development, JIRA and HP Quality Center for defect tracking.    Environment: J2EE, JAVA, Soap, JAX-WS, JSP, JavaScript, HTML, Ajax, XML, Web Services, Windows 7, Dimensions, JUnit, Log4j, Ant, Maven, UNIX, Guidewire Claim Center 6.0, GOSU, SQL Server, WSDL Tester. Java/ J2EE Developer American Express - Phoenix, AZ June 2015 to February 2016 Merchant List Exchange (MLE) is a global capability that generates and manages Merchant lists containing Consumer Relevant Merchant Data (CRMD) enriched by Enterprise Location Based Services (ELBS) to support several different enterprise initiatives both inside and outside the Global Digital Offers Ecosystem (DOE)    Responsibilities:    Actively involved in the Requirement gathering for the enhancements to the existing project. Used Jenkins and Maven for application builds and deployment.    Implement RESTful API based Web services and integrated with Spring MVC and Hibernate    Developed code using IOC concepts (Spring Framework) for injecting dependencies.    Implemented Spring POJO classes for business logic and form bean classes for validation by using spring framework. Used JAXB for marshaling and unmarshalling. Used Log4J to capture the log that includes runtime exceptions, monitored error logs and fixed the problems. Used Eclipse IDE for development, RALLY for defect tracking.    Actively participated in the daily SCRUM meetings to produce quality deliverables within time.    Deployed the application on JBOSS Application Server.    Good experience in using version control tools like GIT and SVN. Environment: J2EE, Spring MVC, JPA, RESTful API, JAX-RS, JAVA, JAXB, Servlets, JSP, JSTL, JNDI, JavaScript, HTML, jQuery, Ajax, XML, Windows 7, Git, Source Tree, JUnit, Log4j, Maven, Unix, JBOSS, Splunk. Java/ J2EE Developer SYSCON ERM Services Pvt. Ltd - Hyderabad, Telangana May 2012 to December 2013 The application used by organizations to maintain their schedules, resources and data. It acts as activity Management tool. The application facilitates to maintain the projects along with their sub modules and tasks going on in a company. It also contains Meeting schedules, Issues, Billing facilities etc.    Responsibilities:    Involved in Design and the Development of the Application.    Exposure in development of the following: Enterprise Java Beans,

Servlets, JSP, JSF, JavaScript, Oracle, HTML, and CSS. Configured the Data source in hibernate Configuration file Performed unit testing, system testing and integration testing Used Hibernate as persistent component for accessing the Relational Data from SQL Server. Developed the J2EE components using Eclipse Indigo. Used SVN for version control. Environment: JDK, J2EE, HTML, XML, CSS, JavaScript, SVN, JSP, Servlets, JSF, Eclipse, Tomcat and Hibernate Education Masters in Computer Technology Eastern Illinois University May 2015 Bachelor of Technology in Information Technology Jawaharlal Nehru Technological University Hyderabad - Hyderabad, Telangana April 2012 Skills J2EE (5 years), JAVA (5 years), ECLIPSE (4 years), XML (4 years), JUNIT (4 years), SQL, Javascript, HTML Certifications/Licenses Driver's License Additional Information Technical Skills: Languages Gosu, Java, J2EE, C, SQL Server J2EE Technologies JDBC, JNDI, Servlets 2.5, JSPs 2.1 XML Technologies XSD, SAX, DOM, JAXB, JAX-RPC, JAX-WS, and XSLT Frameworks Spring 3.0, Hibernate 3.0, JSF 1.2, JUnit, Log4j, ANT and Maven Scripting/Markup Languages JavaScript, HTML, HTML5, DHTML, AJAX, CSS3, Angular Web Services SOAP, WSDL, JAX-WS Web/App Servers Apache Tomcat 3.0, IBM WebSphere 8.0, JBOSS IDE's Eclipse, RAD 7, IntelliJ Databases Oracle 10g, SQL Server 12 Version Control Tools Git, SVN, Dimensions Operating Systems Windows, UNIX, Linux
