

Front End Developer Front End Developer Assist in projects outside of Development department  
Greenville, SC Authorized to work in the US for any employer Work Experience Front End  
Developer Ettain Group - Greenville, SC September 2018 to Present Overhauled multinational  
power tools website including sizing/accessibility/ end user support over mobile and tablets as well  
as tool registration. Front End Developer DOM360 - Greenville, SC November 2015 to June 2018  
Developed applications using JavaScript and PHP to mass produce most common keyword pages.

Set responsive email standard replacing older static email template with responsive and versatile  
layouts. Translate design team s art into responsive Landing and Keyword Pages Education  
Bachelor of Science in Web Design and Multimedia Westwood College May 2015 Skills CSS (2  
years), HTML (2 years), HTML5 (2 years), JAVASCRIPT (2 years), jQuery (2 years), PHP (1 year),  
SQL (1 year), UI, Front-End, Front End, Bootstrap, CSS3 Additional Information NOTEABLE  
PROJECTS Landing Page Builder Using HTML5 JQuery and PHP I developed an application to  
allow our Account s team to request copies of commonly used content pages without having to send  
a job ticket though the coding department. This saved an immeasurable amount of work hours since  
the type of pages it built were often requested by dealership in bulk. This also drastically changed  
the nature of my position from grinding out many landing pages to crafting templates. CDK Helper  
Simple but helpful web page that streamlined the process of posting pages on the CMS CDK by  
splitting HTML code into the requested types. This was a task Accounts complained was time  
consuming and demanded a solution for. Responsive E-blast Templates
