

Senior Software Engineer Senior Software Engineer Software Developer, Java, Spring Framework, Liferay 7.X US ? Qualifications: ? Main technology: JAVA 8/11. ? Enterprise/Web Development: ? Spring Framework (Spring MVC, Data, JPA, REST, Security, ...), Spring Boot, JHipster, JSF, PrimeFaces, JPA, Portlets 2.0, Jasper Reports, TomCat, Docker, Jira, ... ? PHP & Symfony basics (For Drupal 8.x modules). ? Advanced knowledge of Liferay Portal (Based on Java & Spring) & Drupal CMS (admin, back-end development, optimization/tuning and security). Using these two solutions as development platforms, since I think building enterprise applications from scratch without using frameworks(or development platforms) looks quite inefficient (solving everyday problems which were solved already). ? Desktop Development: ? JAVA Swing / JavaFX. ? Advanced knowledge of NetBeans Platform (RCP) and plugins development. ? Other: ? Mobile Applications development: Android (Native), IONIC for hybrid development. ? Front-end stack: Angular, Bootstrap, jQuery. ? Solid background in Object-Oriented analysis and design, Design patterns, follow the best practices/clean code, ? Apache NetBeans Community : NetCat (Testing) member since 7.4, and Plugins Verifier (Plugins Portal). ? And, I keep an eye on Machine learning (especially deep learning), knowledge on computer graphics & video editing.

Let the conversation begin

... Sponsorship required to work in the US Work Experience Senior Software Engineer INSYS CONSULTING June 2016 to Present ? Java Software developer.
