

Sr. Software Developer Sr. Software Developer Sr. Software Developer - Telchemy Tampa, FL *

More than 10+ Years of experience in Web Application Development & Designing. * Experience in Object Oriented Programming (OOP) concepts and Model-View-Controller (MVC) based framework (ZEND FRAMEWORK, Cake PHP) * Experience developing application based on Magento, Magento 2, Symfony, Joomla, Wordpress and Content Management Systems (CMS) * Solid LAMP and WAMP stack development Experience. * Experience in PHP 5, MySQL, HTML5, CSS, XML, JavaScript, JSON, JQuery, AJAX and Content Management System, LAMP technology, web services, MVC Framework, cron management, Memcache and AWS cloud. * Strong command in leading Frameworks Team like Angular.js, backbone.js, bootstrap.js, D3.js, React.js, Node.js and Projects UI Designing Team. * Experience in using SAAS with CSS3 for designing purpose. * Experience in Apache web server administration/configuration. * Excellent knowledge and experience in Oracle Database, DB2, JDBC, PL/SQL, MS SQL Server, My SQL Server, Mongo DB. * Experience in end-to-end lifecycle of PHP based implementations. * Experience in enterprise web applications development in LAMP stack. * Experience in developing and implementing Web Services using SOAP, WSDL * Excellent Client interaction skills and proven experience in working independently as well as in a team.

CORE TECH SKILLS * PHP, Magento, Magento 2, LAMP, CodeIgniter, OAuth, WAMP, Zend Framework, Apache, GIT, JavaScript, Angular.js, Node.js, React.JS, Backbone.js, D3.js, HTML, CSS, Bootstrap.js, EXT-JS, Ajax, JQuery , MySQL, Linux , Unix. Authorized to work in the US for any employer Work Experience Sr. Software Developer Telchemy - Duluth, GA July 2018 to Present Responsibilities: * Designed, built, tested and implemented stand-alone modules for Magento 2, including payment and shipping modules. * Developed/Design the application using LAMP (Linux, Apache, MySQL5 and PHP) architecture using Magento/Zend Framework. * Designed and utilized LAMP, PHP, MySQL, HMTL/CSS, jQuery * Development in PHP, MySQL, HTML, CSS, JavaScript, JQuery, AJAX, REST web services in AWS cloud environment. * Develop new Magento functionality as well as extend REST API endpoints to provide flat data to ERP systems. * Developed and deployed scalable and appropriate website solutions using the Magentodevelopment (customization) framework * Worked on PHP

Development utilizing Zend, CakePHP, CodeIgniter and Symfony frameworks. * Integrate Magento 2 EE ecommerce platforms with Adobe Experience Manager/CQ5. * Development using Laravel PHP Framework on LAMP stack * Develop and maintain a lead aggregation system for marketing leads on various verticals using the CakePHP framework on a LAMP stack * Worked on UNIX/Linux, MVC, Subversion, CVS, Git, Zend, CodeIgniter Framework and LAMP toolset. * Install, re-platform, debug and migrate Magento ecommerce platforms. * Definition and develop of database ER-model, architecture and services with MySQL, Api services and data driven website implementing LAMP stack environment. * Design and develop web application functionalities with Object Oriented design, MVC Zend framework and LAMP,PHP library. * Development of Rest web services using spring with the enabled OAUTH. * Designed and developed third-party payment services, REST services to offer users convenient payment methods using various APIs provided by various third-party payment processors based on OAuth 2.0 protocol. * Worked on UNIX/Linux, MVC, Subversion, CVS, Git, Zend, CakePHP, CodeIgniter Framework and LAMP toolset. * Used PHP, HTML and JavaScript webpage coding integrated with MySQL using Apache HTTP. * Used all aspects of MySQL/PHP Programming (object oriented PHP), Zend Framework in LAMP environment. * Used LAMP for hosting the word press application. * Used on Linux platform (LAMP), Magento CMS, MySQL, REST web services, Git repository for this project. * Worked on automotive content management system (CMS) which is built in PHP Sweet framework, used LAMP setup. * Conceived, Designed, Installed and Implemented CI/ CD automation system. * Utilized agile methodology with JIRA and supporting CI/CD tools such as Bamboo to deploy to Pivotal Cloud Foundry. * Automating the application release build process with Jenkins and executing CI/CD for software development projects. * Used Jenkins as a primary tool for implementing the CI/CD during code releases. * Created several LAMP ,PHP library class wrappers for using system binaries (cross platform, OS X & Linux) * Migrated a portion of the site and publishing system from ColdFusion+SQL on four off-site servers to PHP on two on-site LAMP servers. * Code migration, db migration, and CentOS/Apache/PHP/MySQL installation and configuration. * Use PHP to handle web forms * Involved in creating responsive web pages with Bootstrap and CSS framework like

SAAS. * Contract LAMP/WAMP stack application, offsite development and maintenance. PHP, HTML, CSS, JavaScript, mixed with open source and third party imaging libraries. Eclipse/Mars, SVN, and MySQL databases. * Development of custom modules using LAMP ,PHP, AJAX, JavaScript, JQuery, JSON * Integration with client's ERP system using REST API through PHP calls * LAMP ,PHP-MySQL connectivity was used to fetch required data from the database. * Developed user interfaces using LAMP ,AJAX, JavaScript, JSON, HTML, and CSS. * Developed front end using Bootstrap.js, Angular.js, Node.js, D3.js, Backbone.js, where back end is JAX-RS (Jersey) REST webservice. * Providing a responsive, AJAX-driven design using JavaScript libraries such as Angular.Js, Node.js, D3.js, Backbone.js, Bootstrap.js and Bootstrap.js * Technology leadership for the direction of the Cloud based application using Node.JS, PDFJS, MongoDB and MS SQL Server integrating to a proprietary framework. * Used SAAS based cloud models, Virtualization of Servers and compute storage. * Developed application using JavaScript, Angular Js, SAAS and HTML. * Worked on implementing React.js flux based page updates using React fetchers, state mutating actions and stores. Extensively used React Flux implementations Alt and Redux and their architectures. * Performed BDD tests for custom built widgets using Cucumber JS, Protractor JS, Karma, Mocha, Chai. Build all database mapping classes using Django models and Cassandra * Created a Rich Single Page Application using HTML, CSS, JSON, Angularjs, and REST Services * To limit page-loading delay and visible browser-server interaction used MVC framework with Ajax, JavaScript, Angular.js, Backbone.js and Node.js, D3.js. * Developed application as Enterprise JavaScript using - AngularJs, NodeJs, Websockets, Jasmine, Karma, NPM, Gulp, Protractor etc. * Used Web Services for creating rate summary and used Rest, WSDL and SOAP messages for getting insurance plans from different module and used XML parsers for data retrieval. * Designed and implemented the web application in Node.js, HTML from initial concept development to beta launch. * Usage of version control repository Git, GitHub and JIRA * Developed backend applications with Node.js, MongoDB, CouchDB, Oracle, Apache, Java. * Worked on stored procedures, triggers, cursors, DB scheduler, PL/SQL, MySQL, JDBC, MS SQL Server. * Created tables, triggers, stored procedures, SQL queries, joins, integrity constraints and views for multiple

databases, using MS SQL Server Environment: PHP, Magento, Magento 2, WAMP, LAMP, Zend Framework , Apache, HTML, CSS, XML, JavaScript, AJAX, React.JS, JSON, Node.js, Angular.js, Backbone.js, Bootstrap, Cassandra, CodeIgniter, Java, MySQL, MS-Sql, OAuth, SaaS, SOAP, REST, CI/CD, Linux, UNIX, Ubuntu. Sr. Software Developer Spirent Communications - Holmdel, NJ
March 2015 to June 2018 Responsibilities: * Development and customization of a wide array of opensource projects and frameworks, including; Magento EE, Opencart, Ubercart, Coding in LAMP (Linux, Apache, MySQL, and PHP) environment. * Develop web applications within a LAMP (Linux, Apache, MySQL, and PHP) environment. * Developed the application on LAMP architecture. * Migrated internal operational IT from a legacy mainframe to a custom web-based application platform using LAMP open-source tools. * Develop of an API system to create/update Magento product catalog (price, inventory, product data). * Strongly used LAMP (Linux-Apache-MySQL-PHP) platform. * Development of custom layered navigation in categories pages using LAMP, PHP, AJAX and JQuery. * Development of custom modules using LAMP, PHP and XML. * Developed modules for back-end system in custom PHP and CodeIgniter. * Develop web application using LAMP, Magento, and PHP. * Development of an interactive section to allow customers see earrings and piercings with the help of a virtual ear using LAMP ,PHP / JS / AJAX / jQuery * Updated modules as per requirements in Yii and CodeIgniter. * LAMP, PHP code refactoring and optimization according best practices. * LAMP, PHP scripting to update catalog data and inventory data through a csv file. * Implemented OAuth provider and accompanying login view to allow distributors to login to the Mobile Back Office Ionic application. * Implement OAuth 2, SAML 2 for AAA & Single Sign On (SSO) using Spring Security. * PHP backend development of custom modules CRUD * Integration with client's ERP system to update prices through a LAMP, PHP / SOAP Web service call. * LAMP, PHP Web Development for Back end scripting, Code refactoring, addition of new modules. * Customizing HTML, CSS, Java script and JQuery scripts for UI/UX development according to client's needs * Used all aspects of MYSQL/PHP Programming (object oriented PHP), in LAMP environment. * Fixing reported bugs. * Worked on MVC frameworks like ZEND, CodeIgniter with PHP on IDEs like Eclipse, Microsoft Visual Studio. * Identifying and solving issues caused by

plugins or third part APIs under PHP, MYSQL, HTML, CSS, JavaScript and JQuery Technology. *

Customize product detail page so customers can buy the main product's extended warranty at the same time using PHP and AJAX. *

Worked on end-to-end design, setup, integration and maintenance of CI/CD pipeline from source-control to production. *

Configuring, automation and maintaining build and deployment CI/CD tools Git/GitLab, Docker registry/dFon, Nexus and JIRA for Multi-Environment. *

Implemented CI/CD process, CIT automated testing, deployment using Hg/GIT, REST API, Ansible & Puppet. *

Developed CI/CD solutions for running an AngularJS application from a Tomcat container using Jenkins and Sonatype Nexus. *

Customize Magento's PHP core checkout to equals the view as the USA website. *

Integrate Magento with SAP system to get live inventory data updates while customer is attempting to finish his order through a WS call using SOAP / PHP, LAMP. *

Implemented User interface (UI) entire application using HTML, CSS, Custom Tag Libraries, JavaScript, XML and XSLT. *

Developed user interface using HTML, XHTML, CSS, JSON and JavaScript to simplify the complexities of the application. *

Leading Frameworks Team like Ember, Angular.js, backbone.js, bootstrap.js, Node.js & D3.js. *

Providing a responsive, AJAX-driven design using JavaScript libraries such as, backbone.js, Node.js AngularJS and Bootstrap.js - Using Subversion for version control. *

Designed SPA (Single page applications) in Flux architecture using React.js. *

Worked on variety of Frontend JavaScript frameworks like Angular.JS, Backbone.JS, React.JS, JQuery, JQuery UI and good knowledge in EmberJS. *

Implemented second level cache and query level cache in Hibernate using EHcache plug-in. *

Used JSON for data exchange between application modules along with XML. *

Created client website running on a Node.js, using the Express framework, Jade, AngularJS and Backbone.js for front end MVC/templating. *

Built front end UI for a suite of SaaS compliance products. *

Developed the UI pages using HTML, CSS, JAVASCRIPT, ANGULAR.JS, and D3.JS. *

Develop application using Ember, AngularJS, Bootstrap, RequireJS. *

Developed frontend application using React.js, Express.js and Knockout. Js. *

Create web service component using REST, SOAP, WSDL, XML to interact with the middleware *

Wrote test cases using JUnit testing framework and configured applications on Weblogic Server. *

Developed bug management system for internal usage, using

MySQL, Bootstrap, Backbone.js * Usage of version control repository SVN (Subversion by apache) and JIRA * Worked with Oracle RDBMS for writing complex queries and PL/SQL, SQL for Stored Procedures, Triggers and Events, for generating some important responses needed by the application * Developed Angular-JS unit test cases using Jasmine and Karma. * Used JPA Hibernate and Spring to perform CRUD operation with MYSQL and perform persistence for Hazelcast cache. * Have broken down the application into multiple angular modules for simplicity purposes and have done unit tests using Jasmine * Worked on JDBC to select and update the data from the MySQL database * Developed framework using Java, BIRT Runtime, iText, MySQL and web server technologies. Environment: PHP, Magento, WAMP, LAMP, Zend Framework, Apache, HTML, CSS, CodeIgniter, React.JS, JavaScript, Node.js, JSON, Angular.js, Backbone.js, Bootstrap, SaaS, Java, DB2, CRUD, PL/SQL, JDBC, Oracle, MySQL, MongoDB, Apache CXF, SOAP, OAuth, REST, CI/CD, Git, Github, Junit, Agile, Scrum, Linux, Ubuntu, UNIX Software Developer Beacon Hill Technologies - Boston, MA June 2012 to February 2015 Responsibilities: * Developed GUI screens for XTT & LD application using JSP, HTML and CSS. * Development UI modules using HTML, JSP, JavaScript and CSS. * Maintained and developed e-commerce website using PHP-based framework Magento, jQuery, HTML and CSS. * Wrote various PHP scripts in the header, footer, multiple contact pages, etc * Responsible for both back-end programming in PHP and front-end functionality using JavaScript, Ajax, JQuerylibraries, and other technologies. * Wrote JavaScript functions to get Dynamic data and Client side validation. * Used JQuery to make the frontend components interact with the JavaScript functions to add dynamism to the web pages at the client side. * Created DOM for datasets. Worked with datasets in JSON format. The datasets are collected from back end server PHP file using API and these datasets are then rendered on front end using JavaScript, HTML, DHTML and CSS. * Developed PHP based server side API using Zendframework and implemented MVC architecture. * Created front end interface using object oriented JavaScript and AJAX with API The front end interface is able to interact with server side PHP code which is called by using REST API through AJAX. The JSON data sets returned are then rendered in appropriate format such as pdf, xls, csv and charts. * Strong expertise in Web

Application development using PHP with OOPs, CVS, SVN, MySQL, MS SQL Server JavaScript, JQuery, AJAX, CSS, Flash ActionScript and XML. * Created Web back-end user interfaces to new and existing databases utilizing PHP and MySQL/Oracle databases. * Implemented a Node.js server to manage authentication. * Created Node.js middleware application server to encapsulate modern JS widget framework Worked with JSON objects and JavaScript and JQuery intensively to create interactive web pages. * Implemented web based front-end using HTML, CSS, JQuery, and AngularJS * Involved in developing the UI panels using JSF, XHTML, CSS, DOJO and JQuery. * Set up the deployment environment on Web Logic Developed system preferences UI screens using JSP and HTML. * Developed web Components using JSP, Servlets and Server side components using EJB under J2EE Environment. * Rich UI development experience and well versed in client side technologies like AngularJS, jQuery, Backbone.js, Google Widget Toolkit, Sencha UI * Developed HTML, Swing and JSP pages for user interaction and data presentation. * Created a Rich Single Page Application using HTML, CSS, Angularjs, JQuery and REST Services * Designed and implemented UI layer using JSP, JavaScript, HTML, DHTML, JSON, XML, XHTML, XSL, XSLT, XSL-FO and business logic using Servlets, JSP, EJBs and J2EE framework. * Used Backbonejs, Node.js, Bootstrap and other JavaScript libraries to create intuitive and rich Single Page Applications. * Used JQuery JavaScript libraries for providing richer user interface and facilitates asynchronous request invocations using AJAX. * Integrate the ExtJs/Sencha framework with Oracle BPM. * Prepared statements are used for communication Sql database * Involved in developing custom taglibs, JSP, EJB's, Portlets and DB2 - stored procedures. * Involved in Requirement analysis, design and Implementation applying the Water fall model. * Wrote Servlets programming and JSP scripting for the communication between web browser and server. Environment: LAMP, Zend Framework, PHP Java, J2EE, HTML, CSS, JQuery, MySQL, TOAD, SQL, DB2, Apache Axis, WSDL, Netbeans, JBOSS, Mercurial, Coherence, ClearCase, Selenium, Water Fall Model, UML, JSP, Servlet, Ant, XML, Jira, Swing, Cognos Software Developer Syncro Technology Corp - Langhorne, PA April 2010 to May 2012 Responsibilities: * Involved in analysis and design of the application and in building pilot application. * Involved in the development of Data Access Layer

using ADO.Net * Involved in the development of Site Monitoring Tool using Windows Services * Responsible for Development of UI/UI Controls, Business Layer, Data Access, Database and Support of the EBNR Application using Visual Studio, .NET, WCF, WPF , Silverlight 4, C, PL/SQL with SOA(Service Oriented Architecture) and upstream/downstream system integration. * Involved in the development of Key Generator's that use External web services. * Involved in interaction with professional services to come up with the change orders, analyze changes in change orders and preparation of technical specification documents and prototypes. * Prepared development estimates and unit test plans and task assignment. * Involved in the development of web components, Web services, Stored Procedures. * Involved in the Test Driven Development * Executing walkthroughs and functional reviews for newly implemented Tasks and Enhancements to demonstrate to Professional Services team. * Code reviews for the Enhancements and software bugs that are fixed by the development team. * Involved in the performance improvement of the application by implementing proper State management, memory management and exceptional handling. * Preparation of Push documents for Production and test pushes. * Involved in the Application Deployment on Test and Production Server. * Mentoring or Knowledge sharing to the new team members in educating them technically as well as functionally. Environment: .Net Framework 3.5, C#.NET, VB.NET, ASP.NET, WCF, WPF, REST, Multithreading, Agile, ADO.NET, LINQ, Entity Framework, TFS, HTML, XML, CSS, JavaScript, , Ajax, jQuery, IIS, Oracle PL/SQL, T-SQL, Visual Studio. Software Developer Broadridge Financial Solutions - Edgewood, NY June 2008 to March 2010 Responsibilities: * Developed the modules of Purchase Request, Purchase Order, Item Master modules. * Involved in the Enhancement of Summarization module. * Developed the web pages using JSP, CSS and HTML * Developed the RTM interface module to map the requirements to the test-case and Test design modules * Generic Tree Navigation control). * Used several J2EE Design Patterns (Session Fa ade, Aggregate Entity) for the Middle Tier development. * Developed EJBS (Session and Message-Driven Beans) in (RAD) for handling business processing, database access and asynchronous messaging. * Made extensive use of Java Naming and Directory Interface (JNDI) for looking up enterprise beans. * Developed

Message-Driven beans in collaboration with Java Messaging Service (JMS). * Involved in writing JSP/HTML/JavaScript and Servlets to generate dynamic web pages and web content. * Wrote various stored procedures in PL/SQL and JDBC routines to update tables. * Wrote various SQL queries for data retrieval using JDBC. * Involved in building and parsing XML documents using SAX parser. * Exposed business logic as a web service and developed WSDL files for describing these web services. * Involved in preparing technical specification documents. * Involved in User Interface design of the application using HTML, CSS and JavaScript. * Client side validations using JavaScript. * Involved in coding of the Business and Data Access Layer using ADO.Net. * Involved in writing the Server validations. * Extensively used SOAP formatted messages for communication between web services. * Developed the application on IBM WebSphere Application Server. * Developed the plug-in interfaces for the TMS features (TEE, Requirements, Version Control) * Developed Form Beans, which are used to store data when the user submits the HTML form * Coded various Java beans to implement the business logic * Development of GUI using AWT * Developing global functions library and procedures using SQL. * Involved in Performance improvements of the Server code. * Involved in the Performance improvements of the SQL Queries and Stored procedures * Involved in code reviews and code optimization. * Unit testing and integration testing of the system. Environment: .NET Framework 3.5, Visual Studio .Net 2008, IIS, C#.NET , ASP.NET, ADO.NET,HTML, CSS, AJAX, JavaScript, Web Services, SQL Server 2008,SSRS, XML. Education Bachelor's Skills .net, Visual studio, C#, Javascript, Typescript
