

Oracle Database Administrator Oracle Database Administrator Oracle Database Administrator - General Motors Canton, GA Over 8 years' experience as an Oracle Database Administrator in a 24x7 production business system setting Bachelor's degree in Computer Engineering and Master's degree in Information Systems Oracle Database 11g Administrator Certified Professional (11g OCP), Oracle Database 10g Administrator Certified Professional (10g OCP) Successfully upgraded multiple Oracle databases from 10g to 11g, 11g to 12C Worked in a 24/7 mission critical environment supporting of production database services to ensure the highest standards of availability, resilience, integrity, security and performance Good working knowledge of Oracle RAC, ASM, Golden Gate, Data Guard (both physical and logical) Experience with database backup, restore and recovery using RMAN Good experience applying quarterly patches to Oracle databases An impressive communication and creative problem solving skills Work Experience Oracle Database Administrator General Motors - Roswell, GA February 2014 to Present Work as a part of a 25 person Operation DBA team providing production support for over 2000 Production oracle databases primarily in an Oracle 11g, 12c, RAC, Golden Gate and Data Guard environments.

Co-ordinates and collaborate with internal organizations and internal business partners such as innovation DBAs, security compliance, UNIX system administrators, Database Engineers and Storage Engineers. Foster virtual team collaboration working with team members in three other Innovation Centers through out the United States, along with team members in Europe and Brazil. Monitor the health of 115 assigned databases Shift lead in 24 x7 rotational on- call support Performs oracle software software upgrades and quarterly PSU patches. Used Grid Control for system performance tuning and monitoring. One of GM's Security DBAs that ensures that sox databases are compliant and audit ready. Perform refreshes on oracle databases One of the OEM Support DBAs that install, configure and manage Oracle Agent, Grid Control, and 13c Cloud Control Perform Day to day administration of Oracle Databases Assist the innovation team in building databases of various complexities ranging from standalone, RAC, ASM and Dataguard. Perform Disaster recovery using an Oracle Data Guard fail over solution and completed several planned switchovers. Configure and use RMAN backups for Hot and Cold backups Perform

Recovery of Oracle Databases    Trained new Oracle DBAS on day to day procedures Oracle Database Administrator IBM - Dubuque, IA February 2014 to April 2014    Worked with a team of 12 DBAS supporting two Accounts: State of Georgia and State of California with over 500 Databases. These databases range in size from 2 gigs to 25 Terabytes.    Performed regular maintenance to oracle 11g, 10g, 9i and 8i databases.    Interfaced with account management to resolve critical situation issues.    Performed oracle software, client and oracle grid infrastructure installation for a standalone server    Performed single server database installations with /without ASM.    Applied Oracle patches to databases    Performed database upgrades from oracle 10g to oracle 11g Managed 4 node Oracle 10g Real Application Clusters (RAC) databases with ASM Storage Configured and use RMAN for hot and cold backups    Implemented home grown scripts scheduled via crontab for redundant database monitoring    Monitored backup operations, and schedules manual backups as needed    Created users, schemas and performed imports and exports of oracle schemas    Worked with system administrators and configure the system for optimal performance Created and monitored data files, controlfiles, tablespaces and archivelogs    Monitored space usage, and adjust database as needed    Performed Security Health Checks including user privileges, user profile review, database parameter preview and security re-validation remediation Used Grid control for system performance tuning and monitoring    Monitored Oracle trends for hardware usage and user load    Planned and coordinated data migrations between systems Assisted senior DBA in maintaining documentation, lessons learned, best practices, and quality improvement documentation    Maintained strong relationships with all lines of business and business units, through customer focused service delivery.    Contacted Oracle Support for assistance on problems which are beyond internal capabilities to resolve    Trained new hires and Junior DBAs on day to day procedures PC Tech State Personnel Administration - Atlanta, GA September 2010 to December 2010    Provided computer systems support to over 100 end-users by troubleshooting and resolving hardware and software issues.    Built and restored workstation images.    Maintained accurate, up-to-date inventory records of all computer equipment, printers, and software licenses.    Contributed a technology article published in the monthly online newsletter

for state employees.      Provided assistance in IT product evaluation and recommendations.

Education Master of Science in Information Systems in Information Systems Kennesaw State University - Kennesaw, GA December 2009 Bachelor of Engineering in Computer Engineering University of Benin December 2005 Skills AIX (Less than 1 year), databases (5 years), HP-UX (Less than 1 year), Hummingbird (Less than 1 year), Linux (Less than 1 year), Microsoft Windows (Less than 1 year), OpenText (Less than 1 year), Oracle (5 years), RMAN (5 years), SunOS (Less than 1 year), UNIX (5 years), UX (Less than 1 year), Solaris (Less than 1 year), DBA, RAC, XML, SQL, Oracle Db, Oracle Database, MYSQL, Sql Db Additional Information TECHNICAL SKILLS:

Oracle Databases Administration: 8i, 9i, 10g and 11g    11g RAC and Grid Infrastructure with ASM

Oracle RMAN, RAC and ASM, Data Guard, Golden Gate    Oracle Enterprise Manager, Recovery Manager (RMAN), Data Pump Export/Import, Regular Export/Import etc.      Multiple platforms: HP/UX, SunOS/Solaris, Linux, AIX and Windows Server.      Client connectivity tools: OpenText, Putty, Hummingbird, WinSCP, Remote Desktop Connection etc.      Microsoft Windows (7, Vista, XP, 2000, etc)
