

Mumbai as Software Developer Mumbai as Software Developer Mumbai as Software Developer

An enthusiastic professional with over 4 years of rich experience in Application Development  
Efficient in liaising with stakeholders during the course of problem diagnoses Experience in  
requirements gathering, detailed level design, development, system test and production  
implementation to ensure that optimal resolutions were achieved Maintained program modules  
including operational support, problem resolution, production support, preventative and corrective  
maintenance and enhancements Efficient in developing software solutions by studying information  
needs, conferring with users, studying systems flow, data usage, and work processes Proficient at  
SDLC with proficiency in mapping business requirements, technical documentation, application  
design, development and troubleshooting for information systems management An effective  
communicator with exceptional relationship management skills with the capability to relate to people  
at any level of business and management and excellent team building capabilities Work Experience

Mumbai as Software Developer SeygenTechnologies India Pvt.Ltd May 2014 to January 2017 Key

Result Areas: Developing software solutions by studying information needs and conferring with  
users Conducting study on systems flow, data usage, and work processes Understanding  
process requirements and providing use cases for business, functional & technical requirements

Participating in the Software Development Lifecycle (SDLC), right from requirement analysis,  
documentation coding and testing to maintenance of proposed applications Gaining experience on  
multithread programming and optimization techniques including Software Structure for Sustained  
Innovation (SSE) and Single Instruction Multiple Data (SIMD) vector processing instructions

Managing the maintenance of program modules including operational support, problem resolution  
and production support Executing preventative and corrective maintenance and enhancements of  
the software Participating in the team's agile software development process Developing unit  
tests and functional/integration tests; supporting production deployments of creating solutions

Working with product management and engaging internal customers to gather feedback on  
solutions Taking care of analysis, design, verification, demonstration and maintenance of products

Highlights: Worked on Microservices architecture customization and build from scratch using

rest services Responsible for developing and delivering the enhancement/CR on time.

Developing UI screens using ReactJS and Redux concept, source code and performed table design changes. Deliver new and complex high quality solutions to clients in response to varying technical requirements Responsible for support to stabilize the application on environment (server).

Responsible to give working demo to product owner and team before delivering. Utilize the Micro-Services and REST Architecture to reduce the complexity, increase readability of code.

Created detailed design of modules such as SXM-BPO along with their implementation, and documentation; integrated software modules developed by other team members, and performed integration testing; successfully implemented Load Testing, Unit test case generator and integration testing between several applications Supervised Unit Testing of applications; identified and resolved the Integrations issues, Exceptions bug in developing module Designed and implemented a web application using technologies such as Jsp Servlets, Groovy rails

**MAJOR PROJECTS**

Comcast Mid-Market (Agile Scrum) SMX-BPO(Orchestration Engine) OCGW(Order Client Gateway) TPGW(Trading Partner Gateway) SFDC Simulator UI (Please refer to annexure for further details)

Pune as Software Developer Amdocs India Pvt.Ltd February 2017 Education B.Tech. in Electronics & Communication Bhabha Institute of Technology 2013 Additional Information SKILL SET Software Development Application Maintenance Technical Support Incident Management Capacity Management Configuration & Deployment Root Cause Analysis Status Reporting Unit and Integration Testing

**IT SKILLS** Operating Systems: Windows -98, 2000, XP, windows -7& 8, Linux MS Office MS Word, MS Power Point, MS Excel Languages J2SE, J2EE(Spring boot, micro services, hibernate) Shell-Scripting, DBMS, kafka React.js
