

Network Administrator Network Administrator Fredericksburg, VA I am currently seeking a position as a Systems Support Engineer, hardware and software specialist and LAN Network Support Administrator to apply my experience and technical skills gained throughout the years. Self-motivated and willing to learn new technologies and always go the extra mile to accomplish my goals and to keep myself up to date with industry standards. Authorized to work in the US for any employer

Work Experience Network Administrator School Nutrition Association - National Harbor, MD 2007 to Present

- * I plan installation of new systems and assure the uninterrupted operation of the LAN and management of all server components in order to ensure SNA's network reliability.
- * Troubleshooting issues with HW and SW. HW includes servers, workstations, communication devices, printers, remote access, etc. SW includes OS, backup software, communications and applications.
- * Consult with customers concerning their needs and requirements, write technical documents for users. Implement solutions such as HW and SW upgrades as well as extensive knowledge on troubleshooting techniques.
- * Talk and deal with vendors to manage projects.

Network Administrator DTI/Haverstick Consulting - Arlington, VA 1999 to 2006

- * I planned installation of systems and assured the uninterrupted operation of the LAN. This involved creation and maintenance of accounts and security on the servers.
- * Found answers for client difficulties with HW and SW. HW included servers, workstations, communication devices, printers and remote connectivity. SW included OS, backup software, communications and applications, also experienced with VeriSign PKI Certificates.
- * Implemented solutions for all types of situations. Wrote technical documentations.

Desktop Support Specialist Affiliated Computer Services - Fairfax, VA 1998 to 1999

- * As contracted by the U.S. Senate I provided extensive support for Senators and staff members. As part of a team I installed new systems and provided immediate support.
- * Installed new and existing printers on the LAN and configured systems to work properly for each office. Installed SW and HW including servers, workstations, printers, operating systems, backup software, also provided training for existing users.
- * The Senate environment included simultaneously operating numerous LANs and many times required making on-the-spot decisions to revise priorities and devote immediate attention where needed.
