

Oracle Database Administrator Oracle Database Administrator Oracle Database Administrator,
Bachelor degree in Computer Science. United States Professional Summary: 7 years of
experience in information technology as Oracle Database Administrator Proficient in Oracle 10g,
11g and 12c Database Administration Proficient in Enterprise Manager Proficient in RMAN,
Backup and Recovery Proficient in Database Migration, Upgrade and Patch Application
Managing user access, permissions and privileges Data import and export Performance Tuning
Real Application Clusters (RAC) Data Guard Administration A self-motivated, responsible and
reliable team player with a set of strong technical skills. Strong in solving problems of diverse
scope where technical analysis and evaluation is required Results-driven IT personnel with skills in
team building and problem-solving with an established reputation for effectively working with diverse
groups of people and adaptability to changing environments. 24x7 on-call Production support for
database activities. Authorized to work in the US for any employer Work Experience Oracle
Database Administrator CSC Baltimore - MD August 2014 to August 2015 Responsibilities
Supporting more than 40 instances. Maintenance of production database and development
database which includes tablespace space management, user creation, privileges, roles etc.
Automated hot backups using a combination of incremental, differential and full RMAN backups.
Maintaining archive data on appropriate storage devices. Tracing, troubleshooting with database
performance and tuning issues. Export/Import of oracle databases. Tuning SQL queries.
Debugging, troubleshooting Oracle PL/SQL packages, stored procedures and functions.
Analyzing and validating database objects. Coordinating with team members. On call support
24x7. Environment: Oracle Server 10g/11g SQL Server, HP-UNIX. Oracle Database Administrator
Chaveran Inc Bowie - Bowie, MD February 2012 to July 2013 Responsibilities Responsible for
installing Oracle Database, setup Instance Creation, Database Space Management. Installed
patches and upgrades for various bugs. Implemented traditional Hot and Cold Backups &
Recovery. Distributed the data in different Tablespaces by table partitioning to get the high
performance and I/O balancing. Performance tuning of Database, SQL queries. Performed
Export/Import and full database scanning. Monitoring and resizing Tablespace, relocating data

files for better disk I/O. Maintained standby databases for production and staging environments. Created roles and users and Managed there privileges. Responsible for monitoring & resizing Oracle database objects (Tablespaces, Tables, and Indexes etc.) Responsible for managing Redo logs, Archive logs, Data files. Troubleshooting of the database. Documented the problems and solution in the failures of production databases. Responsible for extensive use of SQL, PL/SQL, SQL*PLUS Environment: Oracle 10g/11g, SQL, PL/SQL, SQL*PLUS, SQL*Loader, Import/Export, OEM, RMAN, HP-Unix, windows. Oracle Database Administrator Professional Experience ? Planning, installation, configuration, management and troubleshooting of Oracle 10g,11g and 12c databases on Linux and Windows OS ? Expertise in the creation of databases, table spaces, tables, indexes and other database objects. ? Installed and manage Oracle Enterprise Manager. ? Install and configure relevant network components to ensure database access as well as database consistency and integrity ? Troubleshoot and resolve various Oracle connectivity problems. ? Provide network troubleshooting and administrative support for the development staff. ? Installation and management of Oracle database using database control ? Create and manage documentation on the configuration and support of the Oracle databases ? Perform bulk load into the database using SQL Loader ? Perform standard and fine grain database auditing. ? Documented database structure, changes, problems, issues for future reference ? Administer database user accounts. Create, modify and deactivate user accounts; assign and monitor user access rights ? Created Testing and Development databases following OFA compliance rules. ? Provide database administration on production, testing and development database servers. ? Managing Schema Objects. ? Regular Monitoring Alert log Files and trace files on Day to Day Basis. ? Identifying and removing Fragmentation, row migration/chaining of database objects. ? Analyzing the Tables and Indexes on performance base regularly ? Monitoring Tablespaces and Datafiles utilization. ? Managing Undo Tablespaces, Redo Logs, Control files and Archive logs. ? Implemented multiplexing control files and redo log files ? Configuring various RMAN parameters as per the requirement. ? Performing physical backups using RMAN utility. ? Identify and recover the corrupted db blocks using Block recover option in RMAN utility ? Performing Complete Media

Recovery of Database depends on the nature of failure. ? Configure and implement the use of Oracle Recovery Manager (RMAN) for cold and hot backup to the databases ? Extensively using DATAPUMP and Export /Import utilities for logical backups. ? Performing database cloning using RMAN. ? Monitoring the user sessions and take appropriate action to kill the inactive sessions ? Creating and rebuilding indexes as necessary. ? Performed various performance goal oriented database tuning. ? Use explain plan, AWR, ADDM and various Oracle Advisors to tune the database. ? Created and tuned various materialized views. ? Tuned various slow running query ? Performed instance tuning, memory tuning query tuning and complete database tuning. ? Creates and implemented various table partitions for large tables ? Resolved various complex issues with the database. ? Apply quarterly CPU patches to different version of databases. ? Upgrade Oracle 10g database to 11g. ? Upgraded Oracle 11g databases from 11.2.0.1 to 11.2.0.3 using patch set

Education Bachelor in Computer Science University of Lagos - Lagos Certifications/Licenses Oracle Certified Associate Oracle Certified Professional Additional Information TECHNICAL SKILLS * SQL and SHELL scripting abilities * Operating Systems: Windows 2008 Server, Linux, UNIX * Tools: RMAN, SQL Developer, SQL Loader, AWR, TOAD, ASM and OEM * Performance tuning with partitioning Reference upon request.
