

System Integration Analyst System Integration Analyst Software Developer Houston, TX Around 5 years of technical experience Software Analysis Development, serves in a client-facing role translating business requirements into viable, scalable cloud solutions. Expert in Installation, Development, Configuration, Maintenance and Administration of SQL Server in collected environments. Work Experience System Integration Analyst Atos/Syntel - Cincinnati, OH 2019 to Present Plan, coordinate and supervise all activities related to the integration of software Familiarity with Teamcenter, Windchill and understanding of how PLM systems works Self-starter who can technically supports/implementation efforts Good knowledge of Java and cold fusion technologies. Documentation skills as Specs need to be developed. Manager/ Developer The-Lifted/New-Dispensation 2014 to 2019 Providing training and supervised workers Manage budget Maintaining statistically and financial record Assist with workers inquires and complaints Played a lead role in assisting in business role for the organization Managing requirements and developing strategies for solutions to business problems in order to advance the organization's growth efforts. Provides training and supervision for the employees and managing budget for the organization Documents and analyze business needs requirements Interacted with business stakeholders with subjects matters to really understand their needs and problems Solves business problems for the company & according to the needs, designs technical solutions Translate business requirements and specifications into detailed system design specifications Develop, analyze, troubleshoot and tune SQL queries, stored procedures, views, and functions Excellent oral and written communications skills and experience interacting with both business and IT individuals at all levels, including the executive level Experience in database design, data modeling, and development Experience with database backup, restore, replication and recovery models AIU 2015 to 2018 SQL Administrator/ Software Developer AIU 2015 to 2018 Design and help manage backup and recovery processes for databases Design and help manage security structure and approach for databases Design and implement highly available production systems Troubleshoot and resolve SQL Server performance issues using profile traces and other methodologies Built and programmed 4-tier architecture (they are often used in applications as

specific type of client-server system) Programmed ordering system for Hotels, Restaurants and fast food. Worked with Golang/C++/Java, very helpful to execute directly because it is inbuilt

Programmed different applications such as mobile apps, calculators etc. (Using Android Studio, visual Studio, NetBeans, SQL Management studio) Participate in the validation process through the unit and integration testing and providing bug fixes Design and help manage backup and recovery processes for databases Designs and I implements information systems that optimizes organizational efficiency Provide advanced troubleshooting for applications and systems including resolution of database performance issues, database capacity issues, replication, and other distributed data issues Pioneer API development for a growing number of web applications Maintain product quality by carrying out reviews, performing continual tests, analyzing feedback, and managing software integration Designed and built effective and attractive user interfaces for a variety of platforms Created test suites to assess product functionality and performance. Automate data import and update processes, track issues, and maintain system documentation Participate in the validation process through unit and integration testing and providing bug fixes Provide advanced technical support for database related project activities Provide advanced troubleshooting for applications and systems including resolution of database performance issues, database capacity issues, replication, and other distributed data issues Design, maintain, enhance, and develop critical SQL databases Design, manage, and monitor index usage, statistics, and other core database performance items

Education Master of Business Administration in Management American Intercontinental University - Houston, TX April 2019 Bachelor of Science in Information Technology American Intercontinental University - Houston, TX April 2018

Skills Database administration, Database, Microsoft sql server, Sql server, Oracle, Replication, Sql, .net, Ms visual studio, Ms visual studio 6, Visual studio, Visual studio 6, C#, C/c++, C++, Gui, Html, Javascript, Php, Xml Links <http://www.linkedin.com/in/deborah-onoge>

Additional Information SKILLS

Technical Competencies Platforms: Windows 95, Windows XP, Windows Server 2000/2003/2008, Windows 7 32 and 64 bit. Databases: MS SQL, Oracle, Access Tools: MS Office Word, Excel, Adobe Acrobat, MS Visual Studio 6.0- 9.0, AVI Converter, FAR. Data cap software all builds.

HTLM, Css, C++, JavaScript knowledge, PHP, PowerShell, XML and SSL, Tc 10.73    Oops concept and programming language    JavaScript Frameworks    .Net Developer    Knowledge in Angular JS    Knowledge working up E-Commerce sites    Proficient in C/C++, C#, ASP.NET, HTML, Java, SQL Server    Expert knowledge of Agile methodology    GUI (Team center - perspective, reset perspective) (server status responsive or unresponsive) (Organization Views) (Customized Tool bars) (Generate Report in form of HTML file)    KEY SKILLS FOR SQL SERVER DBA    SQL Server Reporting Services (SSRS)    Performance Tuning Replication    SQL Server Integration Services (SSIS)    Transact-SQL (T-SQL)    SQL Tuning    Microsoft SQL Server    Database Administration    SQL Databases
