

Security Analyst Security Analyst Professional Experience Inver Grove Heights, MN    Summary:

Over 30 years of experience in the Information Security Industry, helped to create the Information Security Policies, Risk Management and architectural design for the Department of Homeland Security Counter-Terrorism Program in Washington, D.C. Worked with the Director of National Intelligence Information Sharing Working Group to ensure regulatory and compliance with all agencies. Ensured NIST, HIPAA and PCI standards using custom vulnerability management scans based on OS, WMI calls, files, applications, services or other custom needs. Configured firewalls for servers, desktops and worked with network teams. Implemented production level security from desktops to servers including firewalls, endpoint protection, encryption, anti-virus, installing certificates (client and server), implementing SSL, implementing Vulnerability scans and remediation (Patch Management) for OS, files, services, registry and other needs.    Risk Assessment: Established Risk Management program to include custom common control framework for Allina Health. Performed qualitative risk assessments and quantitative risk assessments as well as mitigated risk for high risk environments like CLASSIFIED systems within the intelligence agencies such as DIA, NSA and CIA. Contributed to Risk Management assessments to prevent any compromise or loss of critical data. Built cross-discipline team for all future support throughout the government classified networks to ensure level 3 support in remote facilities would not compromise data.    Compliance: Established repeated process for conducting compliance reviews for Allina Health, through the use of GRC tools. Conducted compliance review of IBM new facilities and systems that support government classified systems and changed the architecture to meet requirements.    Privacy: Developed and published Department of Homeland Security Data Privacy Policy and was responsible for building the case for hiring their first ever Chief Privacy Officer.

Audit Experience: Performed audits of IT departments in every position held within the last 15 years to evaluate operational practices and quickly correct any vulnerabilities with training and operational awareness briefings. Auditing is a continuous process within the government information assurance protocols.    Vendor Security Assessments: Established a Vendor Risk Management Program for Allina Health. Spent five years in Department of Homeland Security assessing vendors for long term

solutions to integration of systems throughout the interagency. Personally involved with the SDLC process, evaluating the vendor according to the requirements and best selection to meet ongoing needs.

CISSP, CISA, or Similar Certification: Does not have CISSP, but possesses the experience and trained to overall manage security programs for IT Systems. Pursuing a CISM Fall 2019. Authorized to work in the US for any employer
