

Senior Software Engineer Senior Software Engineer Senior Software Engineer - Express Scripts
Troy, IL A self motivated, adaptable developer who reliably delivers well-crafted solutions. A
passionate technical leader who improves team s ability to consistently and expediently promote
features to the customer. Work Experience Senior Software Engineer Express Scripts - St. Louis,
MO April 2016 to Present Guided the transition to new tools and agile practices for multiple teams
during crucial ramp up year. As technical lead, anchored the creation of a new development team
that set shop standards for process, development, and delivery. Designed and coded new features
for the company and rapidly converted error prone legacy features. Senior Web Developer Federal
Reserve Bank of St. Louis - St. Louis, MO December 2014 to March 2016 Senior developer for the
modernization of multi-client web application. Quickly assimilated technical and business
requirements, delivering code that was a repeatable template for later efforts. Was assigned the role
of technical lead due to the strong contributions to the design and development of the application.
Led large development team and dramatically improved team practices around documentation, unit
testing, peer review, and continuous integration. Software Engineer / Senior Software Engineer
Reed Elsevier - Maryland Heights, MO November 2008 to December 2014 Lead developer for
business intelligence team delivering Java based web services and Talend driven ETL systems.
Developer for shared service team building out Java based access and entitlement web services.
Piloted development of custom solutions that required quick turnaround with minimal requirement
definition. Forward thinking designs frequently became common components for other efforts;
reducing code time and standardizing processes across applications. Contributions were essential
for keeping 100% of releases on time and on budget. Senior Application Programmer NCI - Scott
AFB, IL April 2007 to November 2008 Contracted as lead developer for software team tasked with
providing a web based inspection and reporting solution for the Air Force Inspector General.
Responsible for leading system design, establishing team goals, and driving development. Delivered
well received, multifaceted, JavaScript enabled, Java web application on schedule. Application
Programmer United States Air Force - Scott AFB, IL February 2003 to April 2007 {Enlisted -
Honorably Discharged} Developer for Oracle Forms application team enhancing an inspection tool

comprised of standalone applications and a web based reporting client for the Air Mobility Command Inspector General. Showed interest and aptitude for object oriented concepts becoming the lead contributor to the Java redesign by the end of active duty service. Education Bachelor of Science in Computer Information Systems McKendree University - Lebanon, IL August 2006 Skills Spring, Javascript, Java Additional Information Clearance: Top Secret, U.S. AIR FORCE, 2005 EXPIRED
