Consultant July 2012 to June 2013 Software Consultant Hexagon Capability Center (Intergraph)  
May 2011 to June 2013 DESIGNATION SPRD Plus May 2011 to June 2013 This Component  
Management System allows you to manage reference data by using classification systems. These  
classifications are available from different publishers and facilitate the exchange of component

information among companies. You can also create a classification tree according to the needs of each customer.

**Component Management System - WCF Services** Smart Plant Reference Data databases are isolated for end users like Smart Plant Foundation users, and hence access to data is limited. CMS exposes a set of contracts through public services so that applications can query for data from the Smart Plant Reference Data database. The services address query, insert, update, and delete operations for template commodity codes.

**Thomas net Integration.** XML import - Idea is to load vendor catalog data directly from TIN Website. A ZIP file can be downloaded which will include XML for CMS loading, One Bitmap for Symbol and one or more data files which can be the symbol DLL. The ZIP, once downloaded, all its information should be automatically extracted and loaded.

**Roles & Responsibilities:** Technically leading the India Scrum Team. Analysis and gathering requirements. Design object oriented principles. Coding. Code review. Major role doing scrum activities. Deploying & testing the application. Tracking the bugs using JTS. Part of the SCRUM ISO audit.

**Software Used:** .net 4.0/Oracle 11g/WCF/Winform/WPF/Asp.net Webservices/VS unitTest/UML/ V1/VSS/ Tor/SQL Navigator/Visio/Fiddler/JTS
