

Senior MySQL Database Administrator Senior MySQL Database Administrator Atlanta, GA
Authorized to work in the US for any employer Work Experience Senior MySQL Database
Administrator World Finance Corporation - Dallas, TX September 2013 to December 2014 Worked
on MySQL test and production environments; analyzed and identified business requirements
Performed moderately complex server-class database activities across various platforms and
environments Conceptual, and logical physical database design as well as data modeling and
mapping Moderate to complex programming and coding to automate or support the database
environment Managed MySQL database using Navicat for MySQL tool Experienced with the use
of MySQL 5x suite in the LAMP environment IT service management, including agile modeling and
development Experienced using the Ixdbmon to monitor databases. MySQL Database
Administrator AlphaGRC Consulting LLC - Dallas, TX July 2011 to August 2013 Managed MySQL
databases (over 50 databases in a replication environment) Performed moderately complex
server-class database activities across various platforms and environments Business requirement
identification and analysis; system test planning and execution Conceptual, and logical physical
database design as well as data modeling and mapping Moderate to complex programming and
coding to automate and/or support the database environment Performance monitoring and tuning;
analyzing database metrics and assisting with capacity planning Configuration and execution of
installations, upgrades and migrations, and implementing security controls Backup and recovery of
MySQL databases and managing logs and errors Creation of Oracle database clients for
development and quality assurance Creation of database objects and alteration of database
structures and schemas as required Allocated storage i.e. creating table spaces, adding and
resizing data files to existing table spaces for redundancy Wrote SQL scripts to create tables,
indexes synonyms, views and other objects Provided and sought guidance for troubleshooting
issues that escalated MySQL Database Administrator Safeway Foundation - Dallas, TX July 2010 to
June 2011 Participated in the development of data/ database architectures and management
policies, procedures and standards Installed, configured and maintained all database servers and
worked with network and system engineers to configure robust and scalable systems for our clients

Consulted with and provided guidance to database users and client groups, recommending tactical and strategic solutions Experience using the MySQL 5x suite in the LAMP environment Strong expertise in data modeling, database design and development Managed MySQL databases (over 50 databases in a replication environment) Performed moderately complex server-class database activities across various platforms and environments Business requirement identification and analysis MySQL DBA Amethyst Technologies Inc - Atlanta, GA January 2015 Managed MySQL databases (over 50 databases in a replication environment) Performed moderately complex server-class database activities across various platforms and environments Business requirement identification and analysis Conceptual, and logical physical database design as well as data modeling and mapping Moderate to complex programming and coding to automate and support the database environment Managed MySQL database using Navicat for MySQL tool Experience using the MySQL 5x suite in the LAMP environment Worked on MySQL administration in a production environment- installation, tuning, backups, resources optimization and distribution, InnoDB and MyISAM storage engines, and replication in large-scale environments. Solved MySQL query optimization and performance problems Installed MySQL server and client software applications in a large environment (100 databases with at least 500G) Created user accounts and appropriate privileges as well as maintaining database security Database backup and recovery for MySQL, 10G and 11G databases Performed tuning to maintain & troubleshoot database problems Created different table spaces, tables, schemas and users accounts Responsible for database management and monitoring (alert log, memory, disk I/O, CPU, database network connectivity) Ensured daily export backups are completed and valid for restore and recovery Worked with my supervisor to configure, administer and manage Oracle 11g databases Monitored and analyzed RDBMS for performance, and administering performance tuning Working knowledge of Solaris and Linux Operating systems, UNIX shell scripting and Perl programming Education MBA in Management Info Systems University of Dallas - Dallas, TX 2009 to 2011 Bachelors in Business University of Lagos - Lagos 2003 to 2007
