

SQL Server Database Administrator SQL Server Database Administrator Dacula, GA SKILLS

SUMMARY: Experience writing, debugging, and tuning Transactional SQL, and stored procedures Ability to ensure the integrity of databases are protected against loss or misuse of information Responsible for improvement and maintenance of the databases to include release rollout and upgrades Database administration including installation, configuration, migrations, consolidations, upgrades, capacity planning, performance tuning, backup and recovery in managing clusters of SQL servers Maintenance and tuning of the databases and replication. Experience with setup and administration of SQL Server Database Security environments using Profiles, database Privileges and Roles. Provide SQL Server database physical model creation and implementation (data type, indexing, table design) Experienced in configuring HADR using SQL server 2012, 2014, and 2016. Experienced in setting up partially contained databases using SQL server 2012, 2014, 2016. Experienced in deploying SQL server 2012 cluster solutions. Responsible for improvement and maintenance of the databases to include release rollout and upgrades. Database administration including installation, configuration, upgrades, capacity planning, performance tuning, backup and recovery in managing clusters of SQL servers. Provide SQL Server database physical model creation and implementation (data type, indexing, and table design). Experience working with merge and transactional replication. Management of multi-terabyte production clustered systems using ACTIVE-PASSIVE Clustering. Experience with implementing Database Disaster Recovery and Planning Experienced with the design, implementation, and administration of SQL Server and Oracle database solutions. Have good understanding of virtualization, storage and Server configuration for SQL Server. Authorized to work in the US for any employer Work Experience SQL Server Database Administrator Greater Pisoniac LLC - Atlanta, GA March 2018 to Present Create and maintain various databases and database objects on Production QA & development environments using SQL Server 2008R2, 2012, 2014, 2016 Monitor the complete environment for resource utilizations to avoid any bottlenecks. Expertise in Always-On Availability Groups (AAG) and HA/DR Setup and Configuration Migrate SQL server 2008 to SQL Server 2012 in Microsoft Windows Server 2012 Enterprise Edition.

Extensively worked on SQL Server Integration Services (SSIS), and Tableau Reporting Expert in Using DMVs, Performance dash board, Mirroring. Rebuilding / Monitoring indexes at regular intervals for better performance. Recovering the databases from backup in disasters. Implementing Point-In-Time Recovery solutions. Involved in trouble shooting and fine-tuning of databases for its performance and concurrency. Involved in Source Data Analysis, analysis and designing mappings for data extraction also responsible for Design and Development of SSIS Packages to load the Data from various Databases and Files. Responsible for monitoring and making recommendations for performance improvement in hosted databases. This involved index creation, index removal, index modification, file group modifications, and adding scheduled jobs to re-index and update statistics in databases. Created alerts for successful or unsuccessful completion of scheduled jobs. Developed ad-hoc queries for end users. Migrated production databases from physical servers to VMs

Database Administrator VILLA I.T Consultants - Atlanta, GA March 2014 to January 2017 Created and maintained various databases on Production and development environments using SQL Server 2008R2, 2012, 2014, 2016 Monitored the complete environment for resource utilizations and to avoid any bottlenecks. Evaluating the current infrastructure and proposing revisions based on licensing cost. Building out new clusters to handle mission-critical databases. Creating documentations for installations, migrations, upgrades, backups, restores, index maintenance. Planning for consolidation of databases. Mentoring less experienced teammates on changes and the technology in general. Revise current DR and HA strategies and improving them, thereby reducing downtime in the event of any failure. Proactively monitoring the entire instances and databases for any abnormalities. Troubleshooting issues and carrying out root cause analysis on the issues as well as finding lasting solutions to those problems and documenting findings.

Participating in on-call rotation with the team. Maintaining all environments (prod, uat, test, training and dev). w Performing mini health checks every morning. Analyzing daily reports for mission-critical databases. Setting up and managing replication, mirroring, log shipping, clustering and ALWAYS ON.

Database Administrator Support Guinness Nigeria (Subsidiary of Diageo) June 2012 to February 2014 Participating in upgrade and migration efforts for various clients from SQL

Server 2008 to 2008R2 Installed and configured multiple SQL Server 2008 and 2008R2 Multi-Node for Mission critical production databases. Utilizing expertise in Always-On Availability Groups (AAG) and HA/DR Setup and Configuration to improve uptime as well as reduce RPO and RTO of business. Saves business over \$300,000 in license costs by pushing the use of SQL Server 2008R2 Std Edition based on the application requirements and the improved HADR capabilities in the SQL release. Working with developers to improve query execution times and boost performance. Performing periodic database maintenance on all databases across all environments. Implementing, monitoring and troubleshooting SQL Server Replication and Mirroring across all SQL database servers in the enterprise. Participating in periodic database refresh operations for lower environments. Participating in root cause analysis of performance issues within the environment. Participating in Project and SQL Team meetings on a regular basis. Education MBA Obafemi Awolowo University 2015 B.Sc in Finance University Of Ilorin 2002 Skills Sql Server, Sql Db, DBA, ETL
