

Front End Engineer Front End Engineer Front End Engineer ? Over 8.5 years of experience. ? C# / Visual Basic .Net Developer. ? SQL Server Developer & Analyst. ? Web Developer (ASP MVC 5 C#, PHP5/MySQL, NodeJS, HTML5/CSS3, Bootstrap, JavaScript, Query, Ajax, AngularJS and React). ? 4D Developer and Database Designer. ? Good knowledge in database structure, optimization and management (Backup, Restoration, Indexing, Roles, Login). ? Extensive experience in Different RDBMS technologies (Access, SQL Server, 4D, MySQL). ? Advanced T-SQL programming (Queries, Cursors, Transactions, Views, Functions, Stored Procedure, Triggers and Performance Improvement). ? Technical Support (MS Office Products, Windows XP, Vista, 7, 8, Printers, VPN, Local Networks, Antivirus, Programs install and upgrades). ? Self-motivated, hard-working, professional team player with strong problem-solving skills. ? Ability to learn quickly and adapt to a new environment. ? I have a full understanding of a software development life cycle.

Work Experience Front End Engineer Robert Half Technology - Raleigh, NC May 2019 to August 2019 I have developed a proof of concept that covers all the major features of the application and had it packaged to work on MS Surface Pro / Windows 10. Using React, Bootstrap, Electron JS and NodeJS. Responsibilities: ? Design, development of UI using React and Bootstrap 4. ? Building the Web Application on top of Electron and Deployment for win 10 - Microsoft Surface Pro. ? Development of reusable components using React. ? Development of modules to access MS Surface device-specific hardware and software. ? Collaboration with other team members to understand the needs and business logic ? Work alongside the UX Designer to design good UI.

Environment: Windows 10 Programming Languages and Frameworks: NodeJS, Electron JS, React, .Net Core Web Technologies and Languages: HTML/ CSS, JavaScript ES6, jQuery, Ajax, Twitter Bootstrap, React, ASP MVC5(C#) Tools, MS Azure, GIT, VSCode, Visual Studio Full-stack Web Developer - Consultant KOURTIM September 2018 to April 2019 Project: Development of Kourtim.com, a digital platform for the planning and real time management of transport flows. Programming Languages: Web Technologies and Languages: 4D Database, HTML/ CSS, JavaScript, Twitter Bootstrap, Angular 5. Ionic 3 for the Mobile App. .Net Software Developer / .Net Web Developer Sitelink - Raleigh, NC March 2014 to September 2018 Responsibilities: ? Design,

development, debugging, maintenance of software components using .Net Technologies. ? Design, development of web applications. ? UI development using HTML/CSS (Bootstrap) and AngularJS. ? Design and development of new reports as well as improvement of the existing ones using VB.NET/ Crystal Report. ? Development, performance and security improvement of Data Layers. ? Interact with customers, internal testing and Technical Support to improve the product.

Environment: Windows 10/8/7/XP/VISTA, Windows server 2008 and 2012, Programming Languages: VB.NET, C# and T-SQL Web Technologies and Languages: HTML/ CSS, JavaScript, jQuery, Ajax, Twitter Bootstrap, AngularJS, ASP MVC5(C#) Tools: Visual Studio 2008/2013/2015, MS Team foundation Server 2013/15, MS SQL Server Management Studio, IIS6/7. Project: Design and development of a Phone Integration Feature using TCP/IP .NET Sockets Objective: add a feature to track calls and measure marketing campaigns to our existing product. Solution: ? Added a functionality to our existing API in order to communicate with the Client Application as well as Functions to interface with industry-typical number tracking providers. ? Created a new report that provides a Campaigns Summary and Call Tracking Log. ? Provided support and troubleshooting to our VoIP partners. Project: Data Layer Improvement Objective: Improve the Security and performance of our Data Layer. Tasks: ? Convert all the static queries in the program to dynamic SQL Stored Procedures. ? Optimizing and performance improvement of the existing SQL stored Procedures and Functions. ? Improving the way, we are passing parameters in the program. ? Data Access Layer Security Improvement. Project: Reporting (Crystal Report, VB.net / SQL Server): ? Designing and maintaining reports, mostly financial reports ? Created complex reports that calls third party APIs and gather data from multiple sources. Project: Converting our existing Windows Application (VB.net / SQL Server) to a Web Application (ASP MVC 5/ C# and AngularJs) Tasks: ? Analyzing and Migration of the existing Business Logic (VB.net) to our new Web Application. ? Development of new Web Services and Business Models. ? UI Migration using HTML5/CSS3, Bootstrap and ASP.NET Razor / Views ? Working on Front End Architecture and Development of Generic Reusable functions to handle out front end Business logic. ? Working on Data Binding Using AngularJS 1.5 (Modules, Services, Factories, Directives and Dom Manipulation)

? Development of Shareable and Reusable UI Components using Custom Angular Directives.

Technician Support USmibn Inc - Cary, NC June 2013 to October 2013 Responsibilities: ? Provides PC hardware, software and Network technical support (printer issues, hardware and software install and maintenance) ? Installation and configuration of the new Computers and devices. ? Server backup and management. ? Company Website update and Development. Environment: Windows 8/7/XP/VISTA, Windows server 2008 and 2012, Tools: Ghost & Acronis, AllWay sync, Kaseya, VNC & Terminal access, Auto-task, Active Directory.

Web Developer Euro ERP - Paris, FR January 2012 to April 2013 Responsibilities: ? Web based application development. ? Development of Business desktop application. ? Database Design, development and management. ? Project coordinator. ? Testing. Environment: Windows 7, Windows server 2008. Tools: 4D v11, v12 and v13, Team Speaker, Thunderbird, Filezilla, Notepad++, Twitter Bootstrap library. Project: Customized CRM & ERP projects.
