

Database Administrator Database Administrator Database Analyst - Fit-Wel Custom Clothes, LA, CA Los Angeles, CA * Over 5 years of IT experience in Database Design, Data Modeling, Development, Migration, Implementation, Administration using SQL Server * Strong experience in Stored Procedure, User Defined Function, TSQL coding, Performance Tuning and Query Optimization, Triggers, Tables, Views, Indexes, User Profiles, Relational Database models, Data integrity, query writing and SQL joins * Worked on SAP ERP implementations, administration. SAP Work load analysis, database backups & restore, SAP transports, Disaster and Recovery, creating jobs using Redwood CPS and Tidal job scheduler. Dump Analysis, Kernel Upgrades, patch updates, applying SAP NOTES, User administration, User Roles & Authorizations, creating secure connections with SAP satellite servers * Experienced in S.E.O (Search Engine Optimization), Google Analytics and Google Adwords, to Advertise and Market Websites, and increase the web traffic and leads * Experience with SQL Server AlwaysOn Availability Groups, replication, log shipping, and mirroring. * Configure encryption, Configure data access and permissions and auditing. * Manage backup and restore of databases, Manage database integrity, Monitor database activity, Monitor queries, Manage indexes, Manage statistics. * Monitor SQL Server Instances, Manage high availability and disaster recovery. * Expertise in Creating, Configuring and Fine-tuning ETL workflows designed using SSIS * Performing Workload Analysis, Performance tuning, backups, refreshes, upgrades, patches, migrations and Disaster and Recovery * Data Conversion, Normalization and Data Modeling, Multi-Dimensional Modeling and creation of Fact Tables, Dimension Tables, Star Schema and Snowflake dimensional schema using Erwin Tool, Creating sub reports and defining query for generating drill down reports using MS SQLServer Reporting Services (SSRS) * Developing and Extending MS SQL Server Analysis Services 2008 (SSAS) Cubes, Data Mining Models, Deploying and Processing SSAS objects * Developing and Implementing Disaster Recovery Model, and Replication Models * Experience with MS SQL Profiler, Database Tuning Wizard, Windows Performance for monitoring and tuning SQL Server performance Authorized to work in the US for any employer Work Experience Database Administrator Fit-Wel Custom Clothes, LA, CA October 2016 to Present Responsibilities: *

Perform general DBA tasks such as install, configure, perform migrations, backup/restore and implement database designs

- * Gathered business requirements, definition and design of the data source and data flows, data quality analysis
- * Monitor and maintain daily ETL jobs and batch processes
- * Writing SQL stored procedures to extract data from multiple data sources.
- * Designed SSIS Packages to transfer data from various sources such as Text Files, XML Files, SQLServer, Excel and Access to SQL Data Tools
- * Collaborating for projects with the Design team and UI team for increasing the web presence and traffic, using Google Adwords. Google Analytics and S.E.O.
- * Creating landing pages using HTML, CSS, Javascript, bootstrap, PHP and MySQL
- * Optimized queries using Database Engine Tuning Advisor and SQL Profiler
- * Worked with different control flow items like Execute Package, Execute SQL, Send mail and Bulk Insert tasks. Created layout wizard and data block wizard in oracle forms
- * Monitored database performance using Oracle Enterprise Manager (OEM)
- * Created and managed database maintenance, backup and disaster recovery plans
- * Analyzed, designed and developed oracle forms 11g queries, layout, report triggers, parameter form, data models etc
- * Worked on CDC (Change Data Capture), Captured the inserted, updated and deleted data into SQLserver tables by using CDC
- * Writing T-SQL programming, Complex SQL queries to implement Stored Procedures and Functions for different tasks and created Triggers to enforce data and referential integrity
- * Monitoring and tuning the database to provide a high availability service and workload analysis
- * Scheduled reports for daily, weekly, monthly reports for executives, Business analyst and representatives for various business needs using Subscription in SQL Server Reporting services (SSRS)

Technologies: MS SQL Server 2014/2016, T-SQL, SSIS, SSRS, Tableau 9, Oracle 11g, ODBC, Microsoft Excel SAP Database Administrator Caterpillar - Morton, IL January 2014 to December 2015 Responsibilities:

- * Implement SAP core patches, Ensure high availability of SAP systems and databases, Analyze and troubleshoot lockouts, work process and job terminations or other issues, Administer transport management and SAP basis standard jobs, Spool management, Perform system integrations and migrations, perform Kernel Upgrades, apply SAP NOTES, patches, hot fixes
- * Designed SSIS packages to Extract data from different sources like SQL server 2012, MS Excel, MS Access, DB2

and transform and then load into Dimension and Fact tables in Data Warehouse using SSIS. *

Developed database schemas (Tables, Views, Store Procedures, Functions) *

Performed backups, restores, recovery models, database shrink operations, DBCC commands, Clustering, Database mirroring, Replication. *

Database migration from various legacy system to SQL server *

Maintain the integrity, security and availability of multiple databases *

Performed disaster recovery, performance analysis and tuning, index maintenance, and monitoring of data *

Created SSIS packages to load data into Data Warehouse and created SSIS packages to extract data from multiple data sources, such as Excel, CSV, XML, Oracle and FTP *

Deploy packages, projects and reports utilizing tools such as SSIS (SQL Server Integration Services), SSAS (SQL Server Analysis Services), and SSRS (SQL Server Reporting Services) *

Worked on SQL Profiler to view indexes performance to mostly eliminate table scan *

Provided design, implementation and maintenance for custom reports using different techniques like data filtering, adding interactivity, deploying reports to report server using SSRS

Technologies: MS SQL Server 2012/2008 R2, SSIS, SSRS, Win 2003 Advanced Server, Erwin v7.2, Oracle 11g, SAP ECC 5.0 Jr. DBA SoftHQ - San Diego, CA May 2013 to December 2013

Responsibilities: *

Worked with project lead and business users to understand business processes, gather and document project requirements and translate them into functional and non-functional specifications for BI reports and applications *

Experience with High Availability (HA) and Disaster Recovery (DR) options for SQL Server *

Used ETL to implement the SCD transformation, to maintain historical data in data warehouse. Applied various data transformations like Data Conversion, Multicasting, Conditional Split, Derived column in SSIS *

Developed and deployed data transfers packages using SSIS 2012/2008, also maintained the jobs running on Servers *

Developed and maintained Oracle Forms and Reports for various applications using SQL*Plus and PL/ SQL. Developed oracle forms 11g database triggers, cursors and stored procedures

Technologies: MS SQL Server 2012/2008 R2, T-SQL, SSIS, SSRS, SSAS, Win 2003 Advanced Server, Erwin v7.2

Work Status: H1B Education Master of Science in Engineering Management Syracuse University

Skills SQL (6 years), SAP (3 years), Google Adwords (2 years), Google Analytics (2 years), HTML 5 (3 years), CSS3 (3 years), Javascript (2 years), MS Excel (8

years), DBA (6 years), ETL, PL SQL, Tableau, Sql Dba, Oracle Dba, Sql Server, MYSQL, DB2
Certifications/Licenses Splunk 6.x Present IBM Blockchain fro developers Present
