Project Manager Sounds Perfect Audio Inc - New York, NY 1997 to 2006

The Company is a high-tech residential consulting and installation firm with offices in Hicksville, Long Island. They design, install, and support house control systems, CCTV, computer networks, audio systems, video systems, lighting systems, telephone systems, home automation, and other high-tech goodies. I was involved in million-dollar projects for clients such as Pulte Homes Inc and Roseland properties Inc. I was responsible for the design, wiring, programming, installation, and long-term support of the technical systems. My skills include strong verbal, presentation, and written communication skills, a

good ability to relate and communicate with clients. Meeting with architects, designers, and clients to review system design. Meeting with contractors to locate wiring and other devices. Working with the engineering team to produce wiring plans, engineering reports, programming flow charts, and other technical documents. Brainstorming solutions as needed to overcome jobsite challenges. Being an expert on all the systems supported. Scheduling of resources

**Operations Supervisor Verizon Avenue - New York, NY 2001 to 2003** The primary objective of the company is to provide voice/data services to multi dwelling units (residential/hospitality) through an Ethernet/DSLAM deployment. I was known to be a dedicated team leader with well-developed communication and presentation skills with the ability to resolve many issues in a timely manner resulting in high performance level among the technicians and low operations costs per truck roll.

Supervise installation/repair technicians Daily scheduling, "scrubbing", and dispatching of work orders Coordinate with NOC outages and dispatch on trouble tickets as necessary Support full compliance with the CWA procedures/regulations and provide remediation of grievances Perform spot checks Provide weekly/monthly performance reports to upper management Ensure high productivity levels per technician Provide training on new equipment or methods Coordinate with CWA (union) to ensure correct guidelines were used.

**Field Service Technician** Installation of DSL bridge to connect to DSLAM equipment in the MDF utilizing existing single pair from the living unit. Additionally, installed Proxim wireless AP's and clients where wiring was not feasible. Installation and configuration of software on the end user PC (Win9x, 2k, XP, MAC) Field Test and acceptance of DSLAM (Elastic Networks) and Ethernet (Cisco/HP) deployment Train new technicians Technical support to sales team at launches in promoting voice/data packages

**Education Farmingdale College - Farmingdale, NY 1994 B.S. in Computer Science University of Halesowen - Birmingham 1987** Links <http://www.intercontinentalexchange.com> <http://www.theice.com> <http://www.nyse.com>
