If interested, details are included on my website. Independent Sales Rep Changes / Prostar - Myrtle Beach, SC 1993 to 2003 My experience in web development dates back to the late 1990's where I started building brochure style webpages using nothing more than Notepad. This small business blossomed into learning how to template one website where several hundred independent sales reps had tools to build their own business. This is a very interesting story that I would love to expand on in an interview.
