

SQL Server DbA SQL Server DbA SQL Server DbA Arlington, TX Work Experience SQL Server DbA  
Dove Technology January 2017 to June 2019 Performs database administration activities  
including; installation, configuration, capacity planning and space management Upgrading  
database (in place and side by side) Proactive and active Performance monitoring and tuning of  
production databases Taking reporting request through ticketing systems Making copies of  
databases for development and production testing Developing backup strategies and recovery  
solutions Database maintenance tasks (rebuilding and reorganizing indexes, upgrading statistics,  
running integrity checks (DBCC), Shrinking data files Data migration (2000, 2005, 2008, 2008R2,  
2012, 2014, 2016) Setting up and administering Security (creating windows and sql server logins,  
assigning appropriate server, database and schema roles and permission Working with  
developers, support and QA team to maintain all database environment Scheduling maintenance  
jobs and backup Creation of stored procedures, triggers, tables and indexes High availability  
Solutions Setting up and monitoring replication (transactional, snapshot, and merge) Setting up  
and monitoring database mirroring and log shipping Performs technical analysis and  
troubleshooting on complex database problems Administers, maintains, develops and implements  
policies and procedures for ensuring the security and integrity of the company database  
Troubleshooting production issues (performance, connectivity) Developing sql server integration  
services (SSIS) packages Developing parameterized, tabular, and matrix reports (SSRS) SQL  
query tuning Physical database designing Monitoring SQL server Clusters (Active active) and  
(Active Passive), Always on Availability group. Database Administrator Alondo LLC July 2012 to  
December 2016 Writing, debunking, and tuning Transactional SQL and stored procedures SQL  
Server database physical model creation and implementation (data type, indexing, table design)  
Setting up and administering SQL Server Database Security environments using Profiler, database  
Privileges and Roles Database mirroring, clustering, replication, and performance tuning  
Database support in HA production data center Database administration including installation,  
configuration, upgrades, capacity planning, performance tuning, backup and recovery and managing  
clusters of sql servers Supervise all aspects of the assigned team including day-to-day

supervision, performance evaluation, and assignment to IT Projects and/or Production Support functions    Server consolidation and space management    Proactive and active performance monitoring and tuning    Designing backup and restore strategies and Database Recovery solutions    Implement security policy design for current and new applications    Coordinate team meetings with groups for any new design/strategies    Creating database design for new project support    24x7 production support    Coordinating and facilitating change review meeting and helping in the management of incidents according to SLAs    Developing information systems testing strategies, plans, or scenarios    Ensures that project and program deliveries and benefits align with the customer objectives and advice for change    Managing all applications and IT infrastructure projects including major, minor or emergency releases using SDLC and PMI-guide to cost, time, schedule, quality, and customer satisfaction    Managing annual routine preventive maintenance projects of all hardware and software (e.g. BI, Data warehouse &ERP)    Using problems solving skills and root cause analysis to resolving and/or mitigating IT operational issues    Ensuring conflict resolutions and managing project risks, issues, actions and change logs    Use AWS, RDS & EC2, SQL Azure elastic pool to manage databases    Exposure to sharepoint Education Certification in Real Estate Tarrant County College 2015 Associate in Business Management Tarrant County College 2014 Database Administration NIIT Technology 2010 Skills Sql Db, Sql Server
