

Software Developer Software Developer Software Developer - Financial Software and Systems
Texas City, TX 1+ years of experience in App development and Web services. Coming from
Computer Science Engineering background, has strong programming knowledge in C, Java,
Python, JavaScript, jQuery and HTML. Experience developing user interfaces, testing,
performance optimization, debugging and troubleshooting. Academic project experience in
steganography, visual cryptography and search engine design and development. Work Experience
Software Developer Financial Software and Systems - Chennai, Tamil Nadu July 2017 to Present
Spring,web development and web services, app development Python Developer SRM University
September 2016 to December 2016 TECHNICAL SKILLS Programming Languages: C, Java,
Python, HTML, CSS, JavaScript, jQuery Software Developer FSS - Dallas, TX March 2016 to May
2016 With the growing need to store, send and receive data in a secured manner, an encryption
approach is implemented where the data is transformed into different forms and can be returned
back to its original form when needed. This can be achieved by using steganographic techniques
and visual cryptography. Education Technology SRM University June 2013 to May 2017 NRI Junior
College - Hyderabad, Telangana June 2011 to April 2013 Secondary State Board May 2010 to April
2011 Nalanda Good Samaritan High School - Hyderabad, Telangana Skills algorithms (Less than 1
year), application design. (Less than 1 year), Data structures (Less than 1 year), Database (Less
than 1 year), Database systems (Less than 1 year) Additional Information Operating systems:
Windows, Linux Database systems: Oracle DB Applications: MATLAB, MS Office CORE
COMPETENCIES Problem-solving ability Data structures & algorithms Creative thinking
Technical writing Excellent communication skills Effective in a cross-functional environment
EXPERIENCE DESCRIPTION Software Developer Financial Software and Systems (FSS),
Chennai, India #Project: Spring Web Services (Feb 2018 - Present) Responsibilities: Developing
user interface (UI) screens using HTML, CSS, JavaScript and JQuery. Designing and developing
web applications using Java and Spring framework. Designing spring 5 rest services #Project:
Web Development (Nov 2017 - Jan 2018) Responsibilities: Evaluating end-user requirements,
custom designing solutions, troubleshooting for complex information systems management.

Designing, developing and deploying applications using python and J2EE technologies. Contribute to the design and development of application features. Integrating complex technical processes to develop solutions and implementing application design. #Project: R&D (Jul 2017 - Oct 2017)

Responsibilities: Participated in R&D activities to develop a sound payment app like 'Tez'. Analyzed data to created core component spec and presented it to the team. Worked closely will other developers to define the technical scope of the mobile app and its features. Contributed to the design and development of the app using Python. Python Developer SRM University, Kattankulathur, India #Project: Search Engine Design (Sep 2016 - Dec 2016) Responsibilities: Independently built a search engine using C programming. The logic behind the design had three functions - crawler, indexer and searcher.
