Expert June 2019 Measures a candidate's ability to analyze relevant information when solving problems. Full results: [https://share.indeedassessments.com/share\\_assignment/t5myxxy3mnjgj4oa](https://share.indeedassessments.com/share_assignment/t5myxxy3mnjgj4oa)

Indeed Assessments provides skills tests that are not indicative of a license or certification, or continued development in any professional field. Additional Information While I consider myself most proficient in C# and Java, I also have experience in SQL, scripting, and web markup. In my spare time I enjoy hiking, cycling, and video games. I also write my own desktop applications. Before graduating from college I occasionally worked on painting and landscaping projects with my father, who is a handyman. My CS Degree from WPI included a minor in English. Throughout high school and college I made extensive use of the Microsoft Office suite. More recently I began using LibreOffice. I am a lifelong user of the Windows operating system, my mother being an employee of Digital (later Compaq and then HP). While attending college I began using Ubuntu Linux as well.

During my coursework at WPI I was also introduced to virtualization. My virtualizer of choice is generally VirtualBox, though I have also made use of VMWare.
