

Enterprise Architect Enterprise Architect Enterprise Architect Newark, DE Defining solution architectures with interoperability between platforms. Sponsorship required to work in the US Work Experience Enterprise Architect AVIANCA AIRLINES - Bogot , Cundinamarca June 2017 to Present I've been establishing standards, policies and guidelines for enterprise architecture and solution architecture. I've been designing the AS-IS architecture and defining the TO-BE architecture from the IT perspective for the core airline business. I've been supporting development projects with software-test factories and internal requirements, ensuring compliance with quality standards. Information Architect Banco de Bogota - Bogot , Cundinamarca December 2015 to June 2017 I made the analysis, organization, disposition and structuring of the data in information spaces, and of their selection and presentation in the interactive and non-interactive information systems. I adopted information management patterns based on the DAMA and BIAN frameworks. I designed the diagrams-views of information architectures and I issued concepts of data architecture, SOAP architecture, REST and IFX messaging. Business IT Project Manager DHL/ Excel Logistics - Bogot , Cundinamarca January 2012 to April 2015 I managed technology projects complying with the triple extended restriction. I designed a solution architecture to leverage the business strategy of B2C market diversification. I implemented the billing system. SAP collections management; improving the portfolio collection process by 17%. I managed to reduce logistic costs of invoice delivery and paper expenses by 35% with the integration between electronic billing project and other legacy systems. IT Manager Compuline - Bogot , Cundinamarca November 2011 to January 2012 I led a work-team for the development of innovation programs and projects with state-of-the-art technology in different architectures and IT platforms. I managed the customization of the SCRUM framework for software development; improving deployment times by 20%.
