

Database Administrator/ Database Developer Database Administrator/Database Developer
Database Administrator/ Database Developer - Journal Tech, Inc Fullerton, CA Extensive
experience as SQL server DBA in HA/DR, Clustering, LogShipping, Mirroring setup and
maintenance Database alert configuration in Disk management, failure jobs and db integrity
Master of Computer Science and Engineering with 7 years SSIS, SSAS SSRS experience;
Extensive experience in database mitigation/data transformation with SSIS, TSQL Professional
experience of Oracle Database server, SQL Server Database (2005, 2008/2008R2, 2012, 2016)
SQL*Loader, load large volume of excel data into Oracle database tables and develop Report with
SQL and SSRS. Extensive experience in SSIS complex data flow task (ETL, Extraction,
Transformation, Loading) Building Business Rules and Entity Relationship Diagram with interview
end-user, customer and manager Proven capacity to approach problems effectively and creatively.

Extensive experience of OLTP and OLAP Team Worker, Quick learner, take initiator, and hard
worker. Willing to take responsibilities. Extensive experience in VB.net programming and
application development Database modeling (ERD design, factor, dimensional, star schema, snow
flake, etc.) Work Experience Database Administrator/ Database Developer Journal Tech, Inc - Los
Angeles, CA 2015 to Present HA/DR, Clustering, automatic failover setup and maintenance with
standard and enterprise version Data performance monitoring/turning with SQL Profiler and other
SQL tools. Database migration from various legacy system to SQL server Database Administrator/
Database Developer Team Foundation - Santa Fe Springs, CA 2011 to 2015 Responsibilities
Implemented Sales Analysis Business Intelligence Solution for Executive Management Involved in
writing scripts to de-duplicate data records, delete/modify records depending on the business rule
Building Tableau reports from scratch and KPI design with business users Involved in writing
stored procedures to parse information in the legacy system and update data based on the business
rules. Created and maintained ETL specifications and process documentation (Data profiling,
source to target maps, ETL flows). Data migration using ETL Tools in BIDS/SSDT from diverse
data sources. Created cubes, dimensions and KPI using SSAS (MAX, Tabular)/Power Pivot
representing data aggregation. Query performance tuning and performance optimization

Designed and tested data integration services using T-SQL stored procedures, functions, views, etc.

Database Engineer 2Phase Technologies, Inc - Santa Clara, CA 2006 to 2011 Responsibilities

Developed detailed and summary reports including line and pie charts, trend analysis report and sub-reports

Data integration from multiple source (FoxPro, Access, Excel, Flat File, XML, etc) with SSIS

Transfer weblog data from flat file source to SQL server database with bulk insert, cleaning data and develop reports

Designed and analyzed the SQL Server database and involved in interviewing end-user, customer and manager.

Created new tables, stored procedures for Application Developers and some user defined functions.

Created Triggers to enforce data and referential integrity.

Maintained the database, renew and improved it from time to time and make sure safe storage of data

Education M.S. in Computer Science and Engineering University at Buffalo 2002

Skills Crystal Report (Less than 1 year), Excel (5 years), MS SQL SERVER (8 years), SQL (10+ years), SQL server (8 years), Sql Db, DBA, Oracle Db, ETL, MYSQL, DBA, ETL, MYSQL, Sql Db

Additional Information TECHNICAL QUALIFICATIONS RDBMS: SQL SERVER 2005/2008/2008R2/2012/2017, MySQL, Oracle

Reporting: SSRS, Excel Power Pivot, SSAS Tabular, Crystal Report, ACCESS

Language: Java, MATLAB, PL/SQL, VB, VC#

MS Office: Word, Excel, PowerPoint, Outlook, Access, Project

Operating System: Win8/Win7/Vista/XP/2003/2000/CE /2000/NT/98, UNIX, LINUX
