

Jr. PYTHON DEVELOPER Jr. PYTHON DEVELOPER Jr. PYTHON DEVELOPER -
HASHMOVE.COM Fremont, CA ? Having 10 years of IT Software Development and nearly 3 years
of experience in Python application development. ? Also designing and development experience in
Django with web based applications using Python. ? MySQL dB for database connectivity and
Cassandra to improvise software development process. ? Experience with Data migration from
Sqlite3 to Apache Cassandra database. ? Cassandra data model designing, implementation. ?
Familiarity with implementing Model view control architecture using Django for web based
applications. ? Proficient in using editors like, Notepad ++, Sublime Text while developing different
applications. ? Used Amazon Web Services (AWS) for improved efficiency of storage and fast
access. ? Having good experience in using NoSQL databases like Apache Cassandra. ? Having
working knowledge using Web services like Amazon s3, EC2, SQS, RDS. ? Good Knowledge in
deployment of applications using AWS. Familiarity with development best practices such as code
reviews and unit testing. ? Proficient in writing SQL Queries, Stored procedures, functions, tables,
views, triggers on various databases like Oracle, DB2, MySQL. ? Experience in working with
different operating systems Windows, UNIX, Linux. ? Good knowledge on hosting Python
applications using WSGI module. ? Active participation in various phases of SDLC Requirement
Analysis, Design, Development and Testing on various Development and Enhancement Projects. ?
Hands on experience in debugging and fixing the bugs and also very good with support and
maintenance. ? Understanding of Python Best Practices (PEP8). Work Experience Jr. PYTHON
DEVELOPER HASHMOVE.COM - San Mateo, CA January 2015 to Present Writing reusable,
testable, and efficient code ? Maintain and extend the existing Python/Flask REST ? Parsing
Excel, XML data in to database. ? Writing Unit, Functional, and Integration test cases for Cloud
Computing applications on AWS. ? Responsible for designing, developing, testing, deploying and
maintaining the web application. ? Involved in debugging and troubleshooting issues and fixed
many bugs in so many applications ? Attended many day to day meetings with developers and
users and performed QA testing on the application. ? Design and implementation of low -latency,
high -availability and performant applications ? Integration of user-facing elements developed by

front-end developers with server side logic ? Implementation of security and data protection
Environment: Python, Django API, HTML, CSS, AJAX, Git, AWS, Apache HTTP, Flask, XML, OOD,
Shell Scripting, jenkins, MYSQL, Cassandra, Linux. MANAGER, SALES & MARKETING GOLD
CASHING - Emeryville, CA January 2010 to December 2014 Involved in assisting new and existing
customers to install, use and maintain the company's key products, experience of Ubuntu or Debian
Linux as well as excellent working experience of Windows network principles (domains, IIS, and
Firewalls) ? Diagnose and troubleshoot technical issues, including account setup and network
configuration ? Ask customers targeted questions to quickly understand the root of the problem ?
Track computer system issues through to resolution, within agreed time limits ? Talk clients through
a series of actions, either via phone, email or chat, until they've solved a technical issue ? Properly
escalate unresolved issues to appropriate internal teams (e.g. software developers) ? Provide
prompt and accurate feedback to customers ? Refer to internal database or external resources to
provide accurate tech solutions ? Ensure all issues are properly logged ? Prioritize and manage
several open issues at one time ? Follow up with clients to ensure their IT systems are fully
functional after troubleshooting ? Prepare accurate and timely reports ? Document technical
knowledge in the form of notes and manuals ? Maintain jovial relationships with clients, research
and identify solutions to software and hardware issues. GOLD BUYER SUKH-SANA ENTERPRISE
