

I/T Specialist Database Systems I/T Specialist Database Systems IT Specialist Database Systems
Shelton, CT Work Experience I/T Specialist Database Systems IBM - Southbury, CT 2006 to March
2015 Senior I/T Specialist IBM 2010 to 2010 System Administration: Team Lead provisioning 72
Linux target machines. DBA Storage: Volume Strategy, clustering and data replication. Oracle
Applications System Integration Oracle Database Subject Matter Expert IBM 2008 to 2010 Tuning:
Oracle database configuration resulting in sub-storage optimization, superior version control
measures on numerous UNIX platforms. Consistent Strategy, design and implementation of
database re-engineering solutions. Documented exceeding availability, performance and cost
reduction goals by demonstrating predictive performance metrics. Implementation: Creation of all
target database requirements for development, testing, and production environment promotion.
Project: Liaison between IT and Business for all DBA support setting up communication protocol and
performance agreements (SLAs). Support Key Account Administration Oracle Database
Administrator Advanced IBM 2006 to 2008 features Replication: Meet project deadline resolving
DW bottleneck using inexpensive Oracle Data Capture mitigation to exceed customer expectations.
Disaster Recovery: Called upon to help facilitate 5 successful database recoveries. Frequent
participation in disaster recovery exercises and resolution of top performance issues on multiple key
accounts. EXPERIENCE. Tuning of SQL statements and normalization of database objects.
UNIX SYSTEM ADMINISTRATOR Fort James Corporation March 1995 to May 1998 Worked as a
Group leader on project designs and implementation using HP UNIX and SUN Solaris serves.
Conversion of data from AS400 legacy system to Oracle Enterprise Edition 8.1.5. Troubleshoot
Oracle applications and provide support to application users. Responsible for all types of upgrades
and patches for Oracle. Assisted in installation and administration of Oracle. System Material
Expert for Oracle Enterprise Manager Application role in Senior Database Administrator position).
Responsible for troubleshooting Oracle applications and provide support to application users. UNIX
SYSTEM ADMINISTRATOR Fort James Corporation February 1993 to March 1995 Support of
custom applications using PL/SQL Built and maintained custom Oracle programs. Developed
conversion programs to convert legacy IMS programs to Oracle. Designed and developed

relational databases for senior management staff consisting of modules, which manage information about inventory, tracking of long and short term production schedules, and manufacturing data. Business contact for vendors and in-house staff (delivering business requirements). Designed and developed different Oracle reports for application users Performed TCL Scripting. Education Electrical Technology Farmingdale State University - Farmingdale, NY 1980 Electrical Technology Farmingdale Community College
