

Sr.Net developer/ UI Developer Sr.Net developer/ UI Developer Sr.Net developer/ UI Developer -  
New York Power Authority White Plains, NY ? Around 9 years of application Development & Support  
experience that includes Analysis, Design, Development and Enhancements of applications built on  
Microsoft Technologies ? Experience in diverse business sectors including Financial,  
Telecommunications and IT Services ? Extensive experience of designing and developing software  
applications with the C#, .NET Framework 3.0/3.5/4.0/4.5, MVC4.0/5.0/6.0 ADO.NET, AngularJS,  
Angular 2.0, ENTITY FRAME WORK, AJAX, LINQ, WCF, WPF, LINQ, TYPESCRIPT, CSS, SOAP,  
C#.Net with backend as SQL Server ? Experience in working with Web Forms, User Controls, and  
Web Controls using HTML5, DHTML, CSS, CSS3, ', JavaScript, jQuery, Angular JS in Visual Studio  
? Strong experience in Systems Analysis, Design, Development and Implementation in developing  
Web and Windows using N-tier Architecture in all stages of Software Development Life Cycle  
(SDLC) ? Extensively developed applications in WinForms, Web Forms, MVC6.0, MVVM and  
Single Page Application Architectural patterns ? Industry experience developing Single Page  
Application AngularJS projects with Web API ? Experience with all phases of SDLC in the Waterfall  
model and Agile (SCRUM) methodologies. ? Used Multi-threading to set different execution paths  
? Involved in developing RESTful APIs/Web API and task based asynchronous programming. ?  
Use LINQ to retrieve the data from the backend through Entity framework ? Experience using Silver  
Light in creating and using interactive user experiences for Web Application ? Experienced in  
building sophisticated distributed systems using REST/hypermedia web APIs (SOA) ? Proficient  
experience in developing Queries, Stored Procedures, Triggers and Functions ? Implemented VB  
6.0code in module Windows operating-system functions ? ANGULARJS, KnockOut.JS and used  
Bootstrap for Responsive Web Design(RWD) ? Used REST software architecture style for creating  
scalable Web Services ? Experience in building and consuming .NET Web Services using SOAP  
and REST ? Implemented Web Forms to build Dynamic Websites and powerful User Interface (UI)  
driven sites with Data Access ? Implemented MVC on server side for handling GUI elements and  
service layer between front end and data layer. ? Worked with BSA to provide a TDD environment  
? Design and developed Enterprise Eligibility business objects and domain objects with Object

Relational Mapping framework such as Hibernate ? Expertise in implementing Object Oriented Programming(OOP) concepts including Inheritance, Abstraction and Polymorphism ? Experienced in Database Design and Development using MS SQL Server, MS Access, and My SQL & Oracle ? Proficient in developing systems built on SQL Server 2005, 2008, 2008 R2&Oracle using Tables, Triggers, Views, Packages and Stored Procedures in T-SQL & PL-SQL ? Used versioning tools Microsoft Team Foundation Server (TFS), Visual Source Safe (VSS), Visual Studio Team System (VSTS) and Tortoise Sub Versioning System (SVN) for version controlling of the Application. Experience in versioning of assemblies and working with GIU

**Technical Qualifications/Skills List**

**.Net Technologies** .NET Framework 4.6/4.5/4.0/3.5, Web Forms, Win Forms, ADO.NET, WCF, WCF, ASP.NET 4.6/4.5/4.0/3.5, wcf, Web Services, Windows Services, Silverlight 4/3.0/2.0/1.1, WPF 4/3.5/3.0, Entity Framework 4, LINQ, SSIS, SSRS. Web Based HTML5, CSS3, Bootstrap, XML, XSL, XSD, XHTML, SOAP, JSON, JavaScript, VB Script, toolkit, Silver Light, AngularJS, Angular 2.0, Typescript

**Program Languages** C#, VB.Net 11.0/10.0/9.0, XAML, XML, SQL, PL/SQL, T-SQL. Database SQL Server 2014/2012/2010/2008/(T-SQL), MS Access 2013/2010, Oracle 12c/11g/10g/9i (PL/SQL). Versioning Tools Visual Source Safe and Team Foundation Server (TFS)

**Reporting Tools** SQL Server Reporting Service (SSRS), SQL Server Integrated Service (SSIS), Crystal Reports ss

**Authorized to work in the US for any employer**

**Work Experience** Sr.Net developer/ UI Developer New York Power Authority - White Plains, NY May 2016 to Present

**Responsibilities:** ? Object Oriented Design & Development using C#.NET and VB.NET as the main programming language. ? Created serializable class by defining the serialization functions. ? Involved in the requirement gathering, design of the systems and development using Agile. ? Developed the User Interface using HTML5, CSS3, Bootstrap, JQuery, JavaScript, AngularJS. ? Designed and developed front-end Graphic User Interface with JSP and also used DOM API to write the XML documents. ? Implemented different validation control on the web-pages using AngularJS ? Utilized a few highlights in Angular 2 like Router PARAM Map, Animations and Source maps for formats. ? Used WCF for developing and deploying services on windows in line, third party services and applications with the Service Oriented Architecture (SOA). ? Used Microservice architecture,

based services interacting through a combination of REST and leveraging AWS to build, test and deploy Identity Microservices. ? Experience in design micro services deployment using Docker. ? Experience in using the Docker and Ansible. Coordinated with software development teams and QA teams, in deploying application packages for various application servers. ? Involved in complete application stack in Amazon Web Services (AWS) like EC2, S3 Bucket. ? Responsible for maintaining and expanding AWS (Cloud Services) infrastructure using AWS (SNS, SQS) and also monitored instances using Cloud watch. ? Used security groups, network ACLs, Internet Gateways, NAT instances and Route tables to ensure a secure zone for organizations in AWS public cloud. ? Implemented a 'server less' architecture using API Gateway, Lambda, and Dynamo DB and deployed AWS Lambda code from Amazon S3 buckets. Created a Lambda Deployment function, and configured it to receive events from your S3 bucket ? Created REST based APIs to form middle layer for the UI systems (JSON input stream). ? Created and deployed Web Services using ASP.NET, SOAP and XML for Pulling Customer Service Records and database objects using Cassandra. ? Design the Database entities from Business Models using Entity Framework. ? Created LINQ enabled database layer using API such as LINQ to SQL and Entity Framework. ? Used LINQ to build set of operations, parameters and expression during execution a set of data from SQL Server. ? Used Docker for automating the provisioning of environments and deployments to achieve Continuous Delivery. ? Extensive Knowledge on .NET designs Patterns including Dependency Injection (DI), MVVM and MVC. ? Extensively involved in developing components for Business Layer and Data Layer. ? Worked on JQUERY lib and also used internal defined templates by Nlog. To post data to MVC action method. ? Wrote queries, stored procedures to deliver reporting tools. ? Involved in the complete life cycle of the project from the requirements to the production support. ? Used processes leveraging tools like Jenkins for implementing CI/CD. ? Extensively involved in fixing production issues and support. ? Involved in fixing UAT, production Bugs and support to the application. ? Performed unit testing on the code and delivered test driven approach development. ? Created web applications that analyze based upon machine learning to show recommendations. ? Participate and lead in the scrum calls. ? Used TFS (Team Foundation

Server) and Git for version control and collaboration of team effort. Environment: Visual Studio 2015, C#, ASP.NET MVC 5.0/4.0, Entity Framework 6.0/4.3, HTML5, CSS3, Angular JS, AJAX, .NET Framework 4.5, Rest full Services, Docker, Ansible, Amazon cloud watch, SQS, SNS, WEB API, TFS 2013, JQuery, Java script, AJAX, JSON, Nlog, IIS 7.0, HTML5, CSS3, AWS SERVICES, Oracle 11g, SQL Server 2012(T-SQL, PL/SQL, Stored procedures, Triggers). Sr.Net Developer/ UI Developer CVS Health - Richardson, TX March 2015 to March 2016 Responsibilities: ? Experience on web technologies like ASP.NET, C#.NET, VB.NET, Silver Light, HTML, CSS, Web API, JAVASCRIPT, J-Query, AngularJS, Knockout, Bootstrap and AJAX in designing and developing the web projects. ? Understanding and exposure to the Software Development Life Cycle (SDLC), Agile Methodologies and extreme Programming techniques (Unit testing and Build Automation). ? Creating applications using VB.NET and enhancing projects for .NET applications. ? Created Front-end Applications using HTML5, CSS3, JavaScript, J-Query, Angular JS, Node.js, OOP, DOM, Twitter Bootstrap, AJAX, XML and JSON. ? Used jQuery and AJAX to make asynchronous calls to the Controllers to validate business logic and load partial views in MVC 4.0/5.0. ? GUI Design and Development. (Page Layout Design, HTML5 Design, JavaScript, jQuery and CSS3 Styles). ? Utilized multithreading and parallel programming, and interfaced between optimization tool and geographic information system. ? Maintained and updated server and client software in multithreading environment. ? Create and Consume WCF service in ASP.NET web application. ? Designed several modules using WPF, MVVM pattern. ? Used J-Query in designing and to navigate a document, DOM elements, create animations, handle events, and develop AJAX Applications. ? Used MVC 4, MVC 5 for separating the application object model from GUI. ? Created and utilized Web API methods for database operations (CURD) through Entity Framework. ? Responsible for handling advance data querying capabilities with LINQ to SQL/Objects/XML and Object Relational Mapping using Entity Framework. ? Proficient in developing and consuming WCF Services, Web Services (REST and SOAP) and Windows Services. ? Experience with Traditional Methodologies (Waterfall, RAD), Agile Software Development Methodology and Test-Driven Development (TDD). ? Used LINQ to retrieve the data from the backend through N Hibernate. ?

Optimized NHibernate queries by looking at raw SQL generated. ? Implemented VB 6.0 code in modeling Windows operating-system functions. ? Used WCF services for communicating with Microsoft SCCM (System Center Configuration Manager) server. One of the purposes was for license management. ? Used List, Trees, Toolbars, Menus and Context Menus for navigating between pages in Windows Presentation Foundation (WPF). ? Created multiple reports (SSRS) in Drill mode using tables, financial tables, cross tabs and chart. ? Design, deployment, and maintenance of various SSRS Reports in SQL Server. ? Designed and implemented Parameterized and cascading parameterized reports using SSRS. ? Experience Working on MVVM (Model View, View Model) in applications. ? Used SQL Server 2012 Standard Edition for database. ? Creating databases and logins with permissions in MS SQL server as per the developer's request. ? Used ASP.NET MVC 4.0 Data annotations to enforce data validation. ? Used Team Foundation Server (TFS) for version control. Environment: ASP.NET Framework 4.0, C#.NET, ASP.NET MVC 4.0, VB.Net, XML, Silver Light, NHibernate, SOA, AJAX, HTML5, CSS3, LINQ, JavaScript, bootstrap.js, AngularJS, jQuery, N-unit, Entity Framework, ADO.NET, WCF, WPF, REST AND SOAP, WEB API, JSON6, SQL SERVER 2012, Visual Studio 2012, IIS. Developer/ UI Web Developer Cerner Corporation - Kansas City, MO February 2015 to December 2015 CVS Health provides evidence-based healthcare solutions in the areas of Radiology, Radiation Therapy, Cardiology, Lab Management, Oncology, Pain Management and Sleep Management. Exports Services is a platform comprised of over 30 products that range from UI, Web Services, Windows Services, and Database Systems. The day to day maintenance for these platforms entails building new database scripts, creating new web services, implementing new customers onto the platform, and enhancing existing products. Responsibilities: ? Experience working on Agile (Scrum Framework) Methodologies to meet timelines with quality deliverables. ? Expertise in developing applications using Microsoft technologies such as .NET Framework [ ] Web Applications using ASP.NET MVC6.0, ASP.NET WEB API, Win Forms using Microsoft Visual C#.NET and VB.NET, Database Access using ADO.NET, Entity Framework, LINQ and distributed applications using WCF ? Created stored procedure, trigger on the database to provide/insert specific data from multiple tables for Web API

services ? Designed the application as 3-tier architecture with extensive use of Object Oriented programming techniques ? Implemented multithreading to improve the performance of the job ? Used VB.NET to develop code for business and repository layer ? Helped migrate from SOA to RESTful services using ASP.NET Web API ? Implemented VB code in modeling Windows operating-system functions ? Developed Test-driven development (TDD) strategy guiding use of the N unit testing framework. ? Implemented MVC6.0 on server side for handling GUI elements and service layer between front end and data layer ? Experience in using AngularJS ability to test views and able to do end to end unit testing. Also, using continuous integration ? Used AngularJS HTTP (post and get) to retrieve data through Web API from entity framework. ? Used the latest WPF/XAML vector based UI framework for the front end and WCF to implement the diverse services such as the QA Services ? Used List, Trees, Toolbars, Menus and Context Menus for navigating between pages in Windows Presentation Foundation (WPF) ? Involved in coding member validation business functionality using WCF and client front end layers using WPF ? Experience in Working on MVVM (Model View, View Model) in applications ? Created and executed SQL Server Integration Service (SSIS) packages to populate data from the various data sources, created packages for different data loading operations for many applications ? Created SSIS Packages using SSIS Designer for exporting heterogeneous data from OLE DB Source, Excel Spreadsheets to SQL Server ? Well-versed knowledge in SQL, T-SQL. Stored procedures, functions, cursors, triggers, views, joins, using SQL Server ? Deploy web applications using tools like Visual Studio .NET 2013, Visual Studio Team Foundation Server 2013, Ajax, MVC6.0, Bootstrap, JavaScript, jQuery, AngularJS, HTML ? Extensive use of MVVM (MVC) and WPF for a unified user interface ? Developed Stored Procedures using T-SQL in relational database MS-SQL Server and knowledge of PL/SQL commands in DDL, DCL, DML and TCL ? Developed C#Classes, Web Services, MVC and Line to SQL ? Used SQL Server 2008,2012 Standard Edition for database ? Involved in writing test plans and test scripts for Unit Testing ? Experience in Versioning Tools like Team Foundation Server(TFS) Environment: ASP.NET 4.5/4.0, ASP.NET MVC6.0, C#.Net, AJAX, HTML5, LINQ, JavaScript, bootstrap.js, AngularJS, jQuery, Silver Light, N-unit, Entity Framework, ADO.NET, REST

AND SOAP WCF, WPF, WEBAPI, JSON6, VB.Net, VB 6.0, SQL SERVER 2012, T-SQL, Visual Studio 2015/13, IIS8. Net Developer/ UI Developer Premier Health Care - New York, NY December 2013 to January 2015 Responsibilities: ? Involved in gathering of requirements and creation of functional specifications for the project, based on the existing use cases and new use cases proposed by the client ? Involved in Software Development Life Cycle (SDLC) through the process Software developer CITI Bank - Irving, TX July 2009 to September 2011 Responsibilities: ? Used Microsoft Entity Framework Code First approach for the Data Access Layer for the ASP.NET MVC4 application. ? Involved in migration of the current ASP application to ASP.NET. ? Experienced in developing and consuming Web Services and n-tier web applications using ASP.NET, C# and ADO.NET Designed and developed various abstract classes, interfaces, classes to construct the business logic using C#.NET. ? Involved in analysis, design, and development and testing of the application. ? Interacted with the client, for documenting business details and designing Software Requirement Specifications and Project Management. ? Created the User controls and worked on custom controls for the presentation layer. ? Used several server-side controls like Data Grid, Calendar control, and validation controls. ? Generated entity classes based on the database schema and improved the development of N-tier architecture using LINQ. ? Performed unit testing on every new version before sending it for User Acceptance Test. ? Used Team Foundation Server for integration, maintenance, and Security of code. ? Developed Presentation layer (Web Forms) using ASP.NET, HTML, and JavaScript and C#. ? Implemented GUI using HTML, XML, Ajax control library, CSS, and Web Form Controls to create web pages, developed Master Pages, classes for reuse. ? Implemented AJAX support for better user experience and good performance. ? Implemented client-side validations using JQUERY. ? Creation and implementation of stored procedures, triggers, views, and queries. ? Established communication between different applications running on same/different platforms using WCF. ? Implemented of WCF services and better logging and exception management support to help in the premature detection of new problems. ? SSIS was used for creating packages and automating them using SQL scheduler. ? Used GitHub for Version control. Environment: Microsoft Visual Studio, .Net 2012/2010, .NET 4/3.5,

C#.NET, Oracle 10g, ASP.Net, AJAX, ADO.Net, HTML, CSS, JavaScript, XML, XSLT, IIS 6.0 and TFS. Education Bachelor's Skills TESTING (5 years), UNIT TESTING (5 years), UI (4 years), USER INTERFACE (4 years), SOAP (3 years) Additional Information Operating Systems Windows, Linux Testing Tools N-Unit Testing, SOAP UI (Web-Service Testing)
