

Front End Web Developer Front End Web Developer Front End Web Developer Los Angeles, CA

Front end web developer who successfully addresses problems and solves them. Looking to build mobile first web solutions and help a company succeed. Authorized to work in the US for any

employer Work Experience Front End Web Developer GRANICUS January 2016 to March 2019

Built cross browser, responsive, local government websites in an agile/scrum environment. ?

Tackled tough coding blocks with team members which refined technical communication ability. ?

Sliced layouts from a PSD comp and made certain that the sites provided great user experiences

across all browsers and screen resolutions. ? Integrated HTML markup into a Content

Management System with DevOps software. ? Interacted with project managers, design and

development leads on a regular basis. ? Did internal QA testing and created how to guides for team

members. ? Handled backend tasks in the CMS such as adding and customizing widget content,

debugging razor code, adding HTML elements, backing up the database and adding user control

columns. ? Efficiently solved HTML, CSS and JavaScript related issues and met all deadlines. ?

Some issues were related to the CSS box model, mobile responsiveness, floats, Flexbox, IE

compatibility, CSS positioning, z-index, DOM manipulation and JavaScript console errors. Front

End Web Developer MOTION LIT September 2015 to December 2015 Made HTML updates using

Wordpress' CMS. ? Worked out CSS styling issues. ? Did cross browser compatibility testing.

PREVIOUS CAREER WAS AS A STORYBOARD ARTIST Created storyboards and animatics that

solved communication problems, helped sell concepts and provided a vision for the production of

commercials. Also worked on animated feature films and video games doing game design,

rotoscoping, digital paint and storyboards. Education Certificate in Web Design and Programming
