

Business Owner Business Owner Business Owner - Encodec LLC Work Experience Business Owner Encodec LLC - Muscatine, IA October 2016 to Present Responsible to provide resources for IT projects where I search, hire and maintain sub-contractors on Encodec. Contractor: HNI Corporation Worked with CET and Web development projects. CET is a proprietary language from Configura where we had to learn the language, plus create tools and extensions to improve and optimize our workspace. It is a language to develop 3D and we have done over 2000 products for Allsteel (one of the HNI companies) in 1 year and half. For the web development, we had projects using Asp.Net MVC, Asp.Net Web Api, Polymer, Node.js, Mongo and Elasticsearch. Contractor: Nokia Corporation Worked temporary to help develop and maintain a project started by a previous supplier. The project was developed in .Net 4.6, Angular 1.0 and Web API. Contractor: The X Consultoria I worked at the same time on 2 projects, dividing the daily schedule for each one, where the first was a front end in Angular 6 and the back end was a WebAPI where I used MediatR for the first time. The second project was a RESTfull Web API all done in functional programming. Both projects were in .NET Core 2.1. Tools: CET, Asp.Net MVC, Web API, Node.js, Angular 1/6, .Net 4.5/4.6, .Net Core 2.1 Software Architect Vertice Technologies (AltaReturn) - Miami, FL March 2012 to November 2016 Worked on .Net projects, as a SharePoint Architect and SharePoint Administrator for the farms. I work with a support, administration and development team and I am currently the main responsible to deploy new and old custom code to more than 90 clients on SharePoint 2010 and SharePoint 2013. I were part of the team to migrate our in loco environment to the Azure cloud, keeping all the customizations and external solutions working for the clients. I work also directly with some clients by creating custom solutions to migrate their documents from an old environment to our SharePoint portal. We have some external portals developed on Asp.Net MVC 4 and they are under my responsibility regarding the maintenance and development. Sometimes I am required to help on creating scripts and plugins for the Microsoft Dynamics CRM 2011/2013. Tools: SQL Server 2005, Zope, Python 2.4 Education Bachelor Computer Science in Computer Science UNIBH - Centro Universit rio de Belo Horizonte - Belo Horizonte January 2007 to December 2011 Skills C# (10+ years), .Net (10+ years), Javascript (10+ years), Html (10+ years), Angularjs (1 year), Node.Js (2 years), Web Development (10+ years), Oracle PI/Sql (8 years), SQL Server (8 years), Github (2 years) Links <https://www.linkedin.com/in/paulo-pellucci-769239b/> Certifications/Licenses .Net Framework 2.0, Web Applications Present .Net Framework 4, Web Applications Present SharePoint 2010, Application Development Present Additional Information Hi there, I'm Paulo, a Brazilian software developer with 10 years of experience on web using C#, Asp.Net and Javascript (jQuery, Angular, Node.js). I've worked through several projects from Asp.net Webforms to the MVC, from the .Net Remoting, WCF to Web.Api. Worked with SharePoint 2007/2010/2013. Mainly used Oracle or SQL Server for those above, but also had my share of MySQL, Postgre and MongoDB. Had quick experiences with React, Python, C/C++, Elastic Search and some others which I don't recall as every day we have a new technology and we keep testing some to really get us where we need. Created dev/qa/prod environments on Azure and Amazon. Had my code secure from SourceSafe, SVN to Github. I consider myself a quick learner, easy to work with and a team player.
