

Sr Dot Net Developer Sr Dot Net Developer Sr Dot Net Developer - United Airlines ? Over 7 years of IT experience in all phases of software development life cycle (SDLC) - Project Analysis, Requirements, Design, Development, Testing, and Deployment and Documentation. ? Experience in .NET Framework 4.6/4.5/4.0/3.5/3.0 Web based application development using Microsoft.NET technologies including ASP.NET, C#, VB.NET, ADO.NET, WCF (Windows Communication Foundation), WPF (Windows Presentation Foundation), Silver light, AJAX, MVC (Model, View, Controller) 4.0, Entity Framework 5.0/4.5 and VB scripts and ASP. ? Experience in front-end and Client Side technologies like JavaScript, JQuery, HTML5, CSS3, Angular JS, Angular 2 and Bootstrap etc. ? Hands on experience in SQL Server and Oracle database design and development, writing Constraints, Indexes, Views, Stored Procedures, Cursors, Triggers and User Defined Functions. ? Expertise in creating State Management related controls in .NET such as Grid View, Details View, Repeaters and also other ASP.NET Server Controls. ? Strong hands on programming, design, understanding and deep functional experience in creating, deploying and consuming of XML Web Services, WCF services, REST Services and Web API. ? Extensive Experience of LINQ and ORM technologies like Entity Framework 5.0/4.3, Database First, Code First and performance tuning in Entity Framework. ? Expertise in creating Views, Partial Views, Strongly Typed Views, Sections, and Areas etc In ASP.NET MVC. ? Worked with jQuery and JSON for the retrieval of data. ? Experience in Software Configuration using tools like Team Foundation Server (TFS), GitHub, Visual Source Safe (VSS). ? Experience in designing and branding Master Pages utilizing Server Controls, User Controls, Data Grid control, Form Validation controls, Custom controls and CSS. ? Proficient in Object Oriented Design/Development (OOD), Object Oriented Analysis and Design (OOAD), Model View Control (MVC) design pattern and Test Driven Development (TDD). ? Experienced in XML Web Services (SOAP, WSDL and UDDI), Service Oriented Architecture [SOA] concepts using .NET Framework. ? Experience in Single Page Applications (SPA) framework for creating efficient and interactive web applications that work across all popular browsers using Angular JS. ? Worked with Serialization concepts in .NET and Securing Web applications using, Windows Based Authentication, Form Based Authentication and SOAP

Envelope. ? Hands on experience with SQL Server Reporting Services (SSRS), SQL Server Integrating System (SSIS) using SQL 2008/2005. ? Involved in IIS migration. From IIS 5.0 / 6.0 to IIS 6.0 / 7.0/9.0. Work Experience Sr Dot Net Developer United Airlines - Houston, TX January 2019 to Present Responsibilities: ? Developed Agile Software Development methodologies to enable efficient and effective high-quality software development. ? Made extensive use of OOPS concepts (generics and inheritance) throughout the project and involved in gathering the requirements, analysis, design & development of the project. ? Used Team Foundation Server (TFS) for Source Code Control, project related document sharing and team collaboration. ? Integrated process into build system which auto-generates REST API documentation from source code improving API documentation quality. ? Responsible for Designing and Developing the Reusable UI Components Like MVC Master Pages 'Layouts and Nested Layouts', 'View Start' and MVC User Controls 'Partial Views'. ? Implemented WEB API Services for CRUD operations with HTTP verbs GET, POST, PUT and DELETE. ? Used JSON to transmit data between Server and Web Application, an alternative to XML Serialization and performed CRUD operations. ? Established a mix of Test Driven Development (TDD) and extreme programming-style (XP) iteration-based planning process for client, resulting in faster feature turnaround, and better customer responsiveness. ? Developed Entity Framework MVC pattern for the DAL (Data Access Layer) and UI (User Interface) with Bootstrap/ jQuery for the front end. ? Created LINQ enabled database layer using API such as LINQ to SQL and Entity Framework. ? Used jQuery for page scripting, AJAX calls and JSON and XML for passing objects from Controller to View and vice versa. ? Provided a common Server and Client side transparent data manipulation API that can operate both inline and in an asynchronous fashion. ? Developed Multi-Tier Application in .NET. Presentation layer was developed using MVC, business layer using C#, and the data access layer using Entity framework. ? Worked with ASP.NET Web Forms, State Management, caching features, configuring optimizations and securing the web application. ? Used ADO.NET objects such as Data Reader, Dataset and Data Adapter, for Consistent access to SQL data source. ? Used Database CODE FIRST and Entity framework CODE FIRST to improve the overall performance of the application. ? Developed web pages using

Asp.Net, JavaScript for Client Side Validation. ? Involved in preparing Service Definition Documents (SDD's) and Technical Specification Documents (TSP). Environment: Visual Studio 2017, C#, ASP.Net 4.0/3.5, HTML, Web API, jQuery, MVC, XAML, CSS, TFS, GitHub, IIS 7.0, Entity Framework, TDD, XML, SOA, AJAX, LINQ, JavaScript, React JS, RESTful Services, SharePoint, SDL, Web Services, MS Visio, JSON, ADO.net, SQL Server 2017, Agile (Scrum). Sr Dot Net Developer Change Healthcare - Alpharetta, GA April 2018 to December 2018 Responsibilities: ? Developed Agile Software Development methodologies to enable efficient and effective high-quality software development. ? Involved in development of Web Forms, classes using ASP.NET that incorporates both N-Tier Architecture and Database Connectivity. ? Used ASP.NET MVC Page Controller pattern to add functionality to individual pages such that to accept input from the page request, invoke the requested actions. ? Extensively used TFS commands to manage code in repository. ? Created, Consumed & Debugging Security implemented by using WCF SOAP service, EDMX, LINQ and Lambda expressions for data. ? Developed stored procedures, triggers, cursors using Oracle for authorization and card details database. ? Hosting of Windows WEB API's, Asp.Net applications in IIS and creating Cloud Instance using AWS for deployment in product environment ? Applied Domain Driven Design (DDD), Test Driven Development (TDD) and Agile methodologies for developing the core C# business classes. ? Created ER (Entity Relationship) diagram for the database by discussing with future users and using MS Visio. ? Developed web services in the business layer to communicate with the application layer using VB.Net and C# .Net ? Consumed Restful Web Services (GET, PUT, POST, and DELETE) for updating the Model and Views of the application. ? Responsible for designing the ASP.NET application authentication using .NET Framework 4.5, Model View Controller MVC 4.0 and IIS security model. ? Designed and developed SOA architecture with WCF binding concepts for making data binding for end points. ? Leveraged angular 2 resources for all data access, encapsulating URLs and standardizing data access interfaces. ? Implemented Angular built-in dependency injection mechanism to divide AngularJS application into multiple different types of components which AngularJS can inject into each other. ? Worked on web technologies including HTML5, CSS3, AngularJS, Bootstrap, Web

API and Entity Framework. ? Developed web application for support team using Bootstrap Framework, AngularJS and REST APIs. ? Manipulated data using CRUD operations of Oracle database management system and handled database access and data transmission based on RESTful web service. Environment: Windows Server 2008 R2/2008, Visual Studio 2015, C#, VB.NET, ASP.Net 4.0/3.5, WCF, JQuery, XAML, TFS, IIS 7.0, AJAX, Entity Framework 4.0, MongoDB, TDD, XML, Oracle 11g, SOA, LINQ, JavaScript, Angular JS, ER Diagrams, RESTful Services, SSRS, Web API, Web Services, MS Visio, NUNIT, JSON, SQL Server 2008 R2, Agile (Scrum). Dot Net Developer First Data Technologies Inc - Atlanta, GA July 2017 to March 2018 Responsibilities: ? Involved in the complete Software Development Life Cycle including Analysis, Design, Implementation, Testing and Maintenance. ? Developed complex view using ASP.NET MVC Razor engine, JQuery UI, server-side scripting with C# and .NET Framework 4.5 ? Experience with strongly typed view models and helpers and partial views using ASP.NET MVC 5, HTML5, CSS 3, jQuery, C #, Visual Studio 2013. ? Consumed Remote Web Services using WCF service model and called Web Services Asynchronously. ? Used N-tier architecture for presentation layer, the Business and Data Access Layers and were coded using C#. Net. ? Developed modules of the application in ASP.NET and involved in writing VB.NET classes. ? Provide inputs in architecting, designing, and implementing a Service Oriented Architecture (SOA) for the application development group ? Involved in development of web graphics and graphical (UI) Pages using the HTML, Cascading Style Sheets (CSS) Master Pages & ASP.NET Controls and UML / Modeling Tool. ? Used Object Oriented features such as Inheritance, Encapsulation and Polymorphism in the implementation. ? Effectively used JQuery a concise JavaScript Library for traversing HTML document, event handling and AJAX interactions. ? Designed the framework in C# based on repository pattern to access the MongoDB. ? Created various Angular Services and injected them into Angular Controllers (using Dependency Injection) to enable AJAX calls and created Custom angular directives to create own HTML tags and induce some kind of functional behavior to those tags. ? Developed Razor views with strongly typed view models and helpers and partial views using ASP.NET MVC4.0, CSS3 and C #. ? Created message handlers in Web API to implement global

level authentication. ? Developed many T-SQL queries to fetch data as per the business requirements with proper tuning technique. ? Create various Tables, Views and also Triggers for auto incrementation of primary key columns in SQL server 2012. ? Implemented Unit Testing, Integration Testing and System Testing using N-UNIT. Environment: ASP.NET 4.6/4.5/4.0/3.0, C#, VB.NET, Visual Studio 2013, WCF, Silverlight 4.0/3.0, LINQ, NUnit, .NET Framework 4.0, SQL server 2012, Microservices, Azure, MongoDB, HTML5, Oracle 11g, CSS3, JavaScript, Angular JS, IIS 7.0, JQuery, Web Services, SOA, TDD, JSON, Windows Forms, RESTful Services, Web API, TFS, Agile (Scrum). Dot Net Developer Fidelity Investments - Cary, NC March 2016 to June 2017 Responsibilities: ? Involved in full software development life cycle for analysis, design, development, documentation, testing, delivering projects on Time. ? Worked on enterprise solutions development with rapid SDLC Agile Methodologies (SCRUM). ? Designed of large-scale business applications and systems in a web-based multi-user environment. ? Used Ajax on server controls to avoid page post back and page flickering. ? Develop reports using complex formulas and to query the database to generate different types of ad-hoc reports using SSRS. ? Developed and hosting WCF Services on IIS by following Service Oriented Architecture (SOA). ? Created Web pages using JQuery, JavaScript and JSON with Ajax web service method call and page methods. ? Leading the developer team for the new application development in Visual C#, ASP.NET 3.5 / Microsoft Enterprise Patterns and Practices Framework/ SQL Database, LINQ, WCF. ? Proactively involved in SQL Server Performance tuning at Database level, T-SQL level and operating system level. Maintained database response times and proactively generated performance reports. ? Designed the UI using the ASP.NET, HTML5, Bootstrap, JQuery, CSS3, Web Forms and AJAX controls. ? Used HTML5, CSS3, AJAX toolkit and JavaScript in order to design a user-friendly, responsive UI and achieve the consistent look and feel of the website. ? Created Restful Web API's to expose the analytics data to the clients. ? Created various Angular Services and injected them into Angular Controllers (using Dependency Injection) to enable AJAX. ? Configuration and Version Control by Microsoft Team Foundation Server (TFS). ? Used Custom Controls, User controls, and Server controls to design the screens. ? Created data access layer to communicate with the Oracle 11g

and PL-SQL (Stored Procedures, Replication, Index, Functions, SQL scripts, SQL injection, DTS packages, triggers, Updated tables, Created Views, cursors, tables, views). Environment: Visual Studio 2013, .NET Framework 4.0, SQL Server 2012, TFS, WCF, ASP.NET 4.0, C#, VB.NET, Oracle 11g, PL-SQL, SSRS, IIS 7.0, AJAX, XML, JSON, WEB API, SOA, Windows Forms, Web Services, LINQ, JavaScript, CSS3, JQuery, Angular JS, Entity Framework 4.5, XHTML, HTML, Agile (Scrum). Dot Net Developer M & T Bank - Buffalo, NY April 2015 to February 2016 Responsibilities:

- ? Involved in Design and Code Construction with OOPs Implementation.
- ? Responsible for Database design, and creating of Stored Procedures, triggers to perform the Data retrieval from multiple tables using SQL Database.
- ? Used SSRS to create, execute, and deliver tabular, matrix and charts reports.
- ? Developed GUI using MS Visual Studio, ASP.NET Web Forms with Ajax controls.
- ? Used Oracle to write Stored Procedures and functions where some of the stored procedures would do a nightly job.
- ? Managed and administered multiple web sites/ web applications using IIS.
- ? Used Form-based Authentication and Role based Authorization for security.
- ? Designed, supported, and updated MS SQL Server database and tables, SQL stored procedures and indices for new developed and existing programs.
- ? Development of ERP solution using architecture and Microservices.
- ? Used Data contracts, Message Contracts and Error contracts in WCF to give message and email alerts to the staff and technical teams.
- ? Responsible for writing stored procedures.
- ? Involved in Design, Development and Testing of Web Forms and Web Services using IIS 6.0, ASP.NET, XML, dataset and .NET Framework.
- ? Responsible for applying JavaScript on Web Forms for client-side validation.
- ? Created a TFS Source control Context Menu item for automatic branching and merging.
- ? Used LINQ extensively for data retrieving, querying, storage and manipulation.
- ? Developed Web User Controls and Custom User Controls to minimize code redundancy.
- ? Extensively used ASP.NET Grid View, Repeater, Details View, Tree View, Data List and Repeater controls for displaying the data in a clear format.
- ? Developed Unit Test Scenarios and tested Test Scenarios in Web methods using N-Unit.

Environment: ASP.NET, C#, VB.NET, ADO.NET, Visual Studio 2010, .NET, Agile (Scrum), TFS, LINQ, Web Services, SOAP, Silverlight, JavaScript, Ajax, HTML, CSS, XML, JSON, Oracle 10g,

Windows Forms, IIS, WCF, SQL Server2008, Web API, JQuery, SSRS, Windows XP/2003/2000/NT. Dot Net Developer Broad Ridge Financial Solutions, LA, CA January 2014 to March 2015 Responsibilities: ? Participated in requirements gathering and compiled them into design document. ? Involved in application enhancements and bug fixing and developed concepts using C#.NET, MVC ASP.NET, Entity Framework. ? Extensively used TFS Command line and PowerShell for automation. ? Used ADO.NET for data retrieving, querying, storage and manipulating interface screens developed using ASP.NET. ? Used ADO.NET while implementing business logic middleware. ? Created Restful services using ASP.NET Web API for exposing these to mobile device Involved in requirement gathering, analysis and documentation of assigned modules. ? Created and consumed Web Services. ? Configured multiple jobs on Jenkins for different projects with different plugins for SCM, Unit testing, code analysis, release, deployments. ? Worked with Oracle SQL Developer for writing complex stored procedures. ? Used AJAX extensively for creating User Controls and speed up web applications by providing partial page updates. ? Involved in development of User Interface using MVC3 Razor view, HTML5, CSS3 ? Utilized ASP.NET validation controls and JavaScript to perform client side validation. ? Created Joins, Views, functions, stored procedures and triggers as part of the database programming. ? Developed WinForms Application to calculate the monthly payments. Environment: .Net Framework 3.0, Visual Studio 2005, ASP.NET, VB.Net, HTML, WCF, CSS, JavaScript, Web Services, XML, XSD, XSLT, SQL SERVER 2005, WinForms, Web API, Oracle 10g, JSON, JQuery, UML, LINQ, SSRS, TFS, MS Visio, IIS, Agile (Scrum). Dot Net Developer Fiserv India Pvt Ltd - Chennai, Tamil Nadu January 2013 to December 2013 Responsibilities: ? Involved in requirement analysis, design and prototype development, effort estimation and team management. ? ADO.NET objects such as Data Set, Data View, Data Reader and Data Adapter are used in the Data Access layer to communicate with the database to access, update data in the database. ? Developed presentations layer using HTML, CSS, Master Pages & Themes to create user interfaces using web pages and controls. ? Used C# for ASP.NET server side state management features such as application state, session state and profile properties. ? Designed, developed and enhanced the application using

.NET Framework 4.0 and Visual Studio 2015. ? Imported Data from MS-Access to SQL Server using DTS and Involved in code reviews, presentations ? Used AJAX extensively for creating User Controls and speed up web applications by providing partial page updates. ? Used ADO.NET objects such as Dataset and Data Adapter, for consistent access to Oracle. ? Performed User Acceptance testing (UAT) and System Integrated testing (SIT) to handle deployments in test and production stages ? Maintenance/Enhancement of Project and handling/fixing bug on daily basis reported by Help Desk. ? Handled production issues during the deployments and effectively managed client change requests Environment: C#. NET, ASP.NET, SQL Server2005, JavaScript, WCF, VB.Net, SSRS, Oracle 9i, jQuery, Web Services, AJAX, HTML, CSS, TFS, Web API, Visual Studio 2008, Windows XP, Team Foundation Server. Web Developer Spime India Technologies Pvt Ltd - Chennai, Tamil Nadu February 2012 to December 2012 Responsibilities: ? Gathered requirements. For better understanding of the system, visited some pilot villages selected by DFID. ? Involved in analyzing the requirements. ? Created database snapshots and stored procedures to load data from the snapshot database to the report database ? Translate business requirements into technical specifications and code implementation. ? Designed and developed ASPX Pages with C# as Code behind in VisualStudio.NET. ? Used ADO.NET technology to connect to database and Involved in writing Stored Procedures and Queries. ? Involved in designing the databases using SQL Server 2005 and MS-ACCESS ? Extensively used Visual SourceSafe for version control. ? Maintained regular communication with client during different phases of the system. ? Prepare flowcharts, processing logic diagrams, and other documentation. ? Trained Community Development Officers. Environment: ASP.NET 2.0, C#.NET, Microsoft Enterprise Library, Web API, HTML, Oracle 9i, CSS, Visual Studio.NET 2005, IIS 5.0, Visual Source Safe, SQL Server 2005. Education Bachelor of Technology in Technology Acharya Nagarjuna University Skills .net, Visual studio, C#, Html, Javascript
